Bond, Minn. and Its Resources (1853), 362: Six miles n.e. of St. Paul and 4 1/2 miles from St. Anthony. First settled by Michael Brophy, a soldier of the Mexican war, who went into this wild region accompanied by a beautiful and accomplished wife, in the fall of 1850. Entered 160 acres. Soon attracted the attention of other settlers. Drew many settlers to the neighborhood. Lake Johanna situated in the midst of the settlement.

Minn. Democrat, June 24, 1851, p. 2, c. 6: Farmers of capital are settling in the Brophy Settlement, about 5 miles north-west of St. Paul. That is a very desirable neighborhood for settlement. That the soil is of superior quality, is, we think, abundantly established by the luxuriant crops now under cultivation on these farms.

Upham, 442, 443: The Sioux or Dakota village of the successive hereditary chiefs name Little Crow, early located on the east bank of the Mississippi near the Grand Marais, where Pike saw it in 1805 and Long in 1817, was several times changed in place, being even removed to the vicinity of the mouth of Phalen Creek or near the site of the Union Depot in St. Paul, as known by the narratives of Cass and Schoolcraft in 1820, Long and Keating in 1823, and Latrobe in 1833. Again in 1835 it was near the Grand Marais, as noted by Featherstonhaugh. After the treaty of 1837, the Kaposia band had their village at the w. side of the Mississippi, occupying a part of South Park, a suburb of South St. Paul in Dakota County, which was its site at the time of the battle of Kaposia. Name means light or swift of foot in running, as defined by Williamson in his list of Sioux geographic names. Little Crow's band had received this name, which thence was applied to their village, "in honor of their skill in the favorite game of lacrosse."

**Comments**

Upham, 442: Pig's Eye Lake. On the alluvial bottomland of the Mississippi about two miles southeast from Dayton's bluff and the Indian Mounds, named in allusion to Pierre Parrant, a whiskey dealer, before mentioned as the first settler in St. Paul, who about the year 1842 removed to the vicinity of that lake. He had a defective eye, whence he received this nickname, applied also to the village of St. Paul at its beginning, until displaced by the present name in 1841. Pig's Eye Lake had been previously called Grand Marais, meaning the Great marsh, by the early French fur traders and voyageurs.

Upham, 437, 441: Reserve Township. Organized May 11, 1858. William Finn was the first permanent settler. Until 1853 was a part of the Fort Snelling military reserve. The north line of the reservation east of the river, surveyed in 1839, coincided nearly with the north line of this township, and with the present Iglehart avenue of St. Paul. In 1887 this township became a suburban part of the city, but much of it yet is a farming district.

Radio address by Mother Antonia, St. Catherine's College, WCCO, November 24, 1933: At the date of its organization, May 11, 1858, Reserve was called Niven because the first election was held in the house of William Niven, but the name was soon changed to Reserve. William Davern, who settled on a 160-acre claim in sec. 16 during the legislature of 1857-58, of which he was a member, had the name changed to Reserve.

Upham, 440,441: White Bear Lake. Named from an old Indian legend, in which they suppose it to be possessed with the spirit of a white bear, which was about to spring on the wife of one of their young braves, but was shot by him, and its spirit had haunted the lake and its island since and had mysteriously disposed of several of their braves.

Andreas Atlas: White Bear Lake.

Folsom, Fifty Years, 545: White Bear Lake named by the Dakota Indians, a tradition existing amongst them that a grizzly bear once made its appearance on the island, with which one of their bravest hunters engaged in mortal conflict, each slaying the other. The Indians called this a grizzly, polar or white bear, and named an ad-

ja cent locality "Mah-to-me-di or (M'de), i.e., Mahto, gray polar bear, and M'de, lake. It is not probable, however, that a polar bear ever reached this spot, and a visit from a grizzly is nearly as improbable. Indian legends are very frequently made to order by those who succeed them as owners of the soil.

Des cription & Name Origin  
 Named because it was located in the midst of a dense Hazel (CORYLUS AMERICANA) shrubbery or "Chapparal" as it was called. CHAPPARAL is spanish and is properly and only applicible to a grove of oak trees, but custom has allowed it to be applied to any dense brushy shrubbery.
