PLAT INCORP

Description & Name Origin by Robert Dickson "a Red-haired Scotchman", whom the British Government had appointed "Superintendent of the western Tribes". In 1823. the expedition of LONG + KEATING found the Columbia Fur Co. occupying this post (or another location near it) under the superintendence of "M M MOORE" Probably HAZEN MOOERS. He was also trading here in 1835 when JOSEPH R. BROWN first came to this post. OBR 7.12.40

Description & Name Origin. Has an early French name, meaning Woods of the Sioux with reference to the woods or narrow groves by which it is bordered along its lowest five miles, next to Breckenridge and Wakarusa. On the map of Long's expedition in 1823, it is called  
(over)

Sisux river; and in the narrative by Keating, as also in the description of the country by Long, it is mentioned as the Sisux river or Swan river. The name Bois des Sisux was used by Keating to note only its fringe of timber. On Nicollet's map, 1843, it is named Sisux Wood River.

Forms the boundary line between Minnesota and North Dakota, on the Wilkin County map the river is named Red River of the North.

Description &  
Name Origin

Valley bluff east of the northern end of Lake Traverse,  
 Toqua twp. (formerly spelled Tokua) received  
 its name from the two Tokua lake in Graceville and  
 the similar pair of lakes in this twp. which later were  
 called by the Sioux, as translated, the Tokua Brothers  
 lakes. This aboriginal name is spelled Ia Kara on  
 Uccallet's map, 1843, Ia being the Sioux name for the

12.

NAME Plaw Kara Paint Co Traverse Sheet No. \_\_\_\_\_

moose, while Kara doubtless refers to the Kara band of the Lakotas or Sioux.

Keating the historian of Long's expedition in 1823, wrote as follows (in his Volume 1, page 403) describing this band. "Kara (Wild Rice). These Indians dwell in very large and fine skin lodges. The skins are well prepared and handsomely painted. They have no permanent residence, but frequently visit Lake Traverse. Their hunting grounds are on Red River. They follow Tatankanage (the Standing Buffalo), who is a chief by hereditary right, and who has acquired distinction as a warrior."

Nicolllet also used the word Kara as the final part of other names, Plaw Kara and Manstitea Kara

12.

 Form 7 Classi- Natural Features Ref Upham 55 3-  
 No. 7 fication Natural Features (page)

given on his map as to two points or hillocks of the valley bluff east of the northern end of Lake Traverse. Riggs, however, in his Dakota Dictionary published in 1852, rejected all use of the letter r in that language, so that the name Kahra or Kara may not be identifiable in that work. Tokua (or Toqua) was the white men's endeavor to spell the Sioux name for these pairs of lakes, which Tillet spelled as La Kara.

Samuel J. Brown, of the village of Brown's Valley, has stated that this name "was taken from a picture carved on a tree, meaning some animal so pictured." This accords well with

Ta being the Sioux word for moose, while Kara doubtless refers to the Kahra band of the Dakota or Sioux.

Keating, the historian of Long's expedition in 1823, wrote as follows (in his Volume I, page 403), describing this band. "KAHRA (Wild Rice). These Indians dwell in very large and fine skin lodges. The skins are well prepared and handsomely painted. They have no permanent residence, but frequently visit Lake Travers. Their hunting grounds are on Red River. They follow Tatankanaje (the Standing Buffalo), who is a chief by hereditary right, and who has acquired distinction as a warrior."

Nicollet also used the word Kara as the final part of other names, Plan Kara and Manstitsa Kara, given on his map to two points or hillocks of the valley bluff east of the northern end of Lake Travers. Riggs, however, in his Dakota Dictionary, published in 1852, rejected all use of the letter r in that language, so that the name Kahra or Kara may not be identifiable in that work. Tokua (or Toqua) was the white men's endeavor to spell the Sioux name for these pairs of lakes, which Nicollet spelled as Ta Kara.

Samuel J. Brown, of the village of Brown's Valley, has stated that this name "was taken from a picture carved on a tree, meaning probably some animal so pictured." This accords well with the meaning of the name given by Nicollet, as the moose of the Kara, or Kahra band of Sioux, perhaps a family totem or their mystic patron of the clan (as we might say, a mascot).

Description & Lake Traverse (Lac Travers in French), (is) a translation of the Sioux Name Origin name. Keating wrote of its significance: "The lake has received its present appellation from the circumstance that it is in a direction nearly transverse to that of the Big Stone and Lac qui Parle lakes, these being directly to the northwest, while Lake Travers points to the northeast." Williamson gave its Sioux name and meaning: "Mdehdakinyan, lake lying crosswise."

By the way of Lakes Traverse and Big Stone, whence two counties are named, and by the Minnesota river valley, . . . the River Warren outflowed from the Glacial

(over)

Lake Agassiz, which in the closing part of the Ice Age filled the basin of the Red river and Lake Winnipeg. The Ojibways have given quite another name to Lake Traverse, referring to this deeply channeled ancient watercourse of the continental divide, noted by Gilfillan as follows: "Lake Travers is Ga-edawali-mamiwung sagaigun, the lake with a breast or pap (like a woman's) on either end; one on the northern, and one on the southern (flowing into Big Stone lake in high water); so flowing either way."

In exceptionally high flood stages of the upper Minnesota river, flowing into this channel of the Glacial River Warren at the village of Brown's Valley, a part of its water goes northward into Lake Traverse, so that canoes or boats can then have a continuous water passage from Big Stone lake to Lake Traverse; but probably no flood conditions in recent time have permitted any southward outflow from Lake Traverse.

At the east side of the southwest end of Lake Traverse, Major Long and his party in 1823 were entertained by Wanotan, chief of the Yankton Sioux, for whom, with changed spelling, Wahnata county of Minnesota Territory in 1849 was named, including the present Traverse county.

LOC

northern part of Lake Traverse bordering west side of Lake Valley township  
 Description & Name Origin This part of Lake Traverse, northward from its marshy tract  
 at the mouth of Mustimber river, is called as above on Nicollet's map a  
 Sioux name meaning the end.

It has an extent..... being at the ordinary stage of low water  
 an area of marsh..... in which are several spaces of open water a mile or two  
 in length.

GEN LOC

Description & By the way of Lakes Traverse and Big Stone, . . . and by the Minnesota Name Origin river valley, . . . the River Warren outflowed from the Glacial Lake Agassiz, which in the closing part of the Ice Age filled the basin of the Red river and Lake Winnipeg. . . .

In exceptionally high flood stages of the upper Minnesota river, flowing into this channel of the Glacial River Warren at the village of Brown's Valley, a part of its water goes northward into Lake Traverse, so that canoes or boats can then have a continuous water passage from Big Stone lake to Lake Traverse; but probably no flood conditions in recent time have permitted any southward outflow from Lake Traverse.

Description &  
Name Origin

While the Glacial Lake Agassiz flowed south along the valley of Lakes Traverse and Big Stone, its outlet stream, named the river Warren, eroded that remarkable valley, with gradual reduction of the lake level. Five stages of the ancient lake during its southward outflow are shown by so many distinct beaches, each lower than the preceding. In their descending order they are named, from places where they are well developed and were first recognized and mapped, being Herman and Norcross beaches, for villages in Grant county, the Tintah beach for a village in Traverse county, and the Campbell and McCauleyville (over)

beaches in this county. Thence each of these old lake levels, recorded by the successive low beach ridges of sand and gravel, are traced far along each side of the Red river valley, in Minnesota and North Dakota and onward in Manitoba.
