Pioneering Vision in Education & Entertainment

We are proud to be the developer and owner of Moov Park – a comprehensive technology ecosystem designed specifically for educational models and complex entertainment venues. We do more than provide software; we deliver a “Business-in-a-Box” solution that enables investors to standardize quality, optimize profitability, and scale without limits.

- **Core Values:**

AI-Driven Innovation

Financial Transparency (FinTech Core)

**Rapid Replication & Expansion
(Hyper-Scalability)**

Are You Running the Business - or Burning Through Profits?

- **Block 1 (Financial Issues):**

Revenue leakage and errors caused by manual reconciliation across different franchise locations.

- **Block 2 (Operational Issues):**

Teachers are overwhelmed by administrative workloads, spending up to 80% of their time on paperwork.

- **Block 3 (Re-enrollment Issues):**

Low student renewal rates due to the lack of automated, real-time progress tracking.

Moov OS Franchise Ecosystem Solution - Eliminate every barrier by automating the entire process, from student enrollment and management to real-time revenue-sharing calculations.

Moov OS Enterprise – Executive Control at Your Fingertips

A visual, real-time dashboard for monitoring and managing multiple branches.

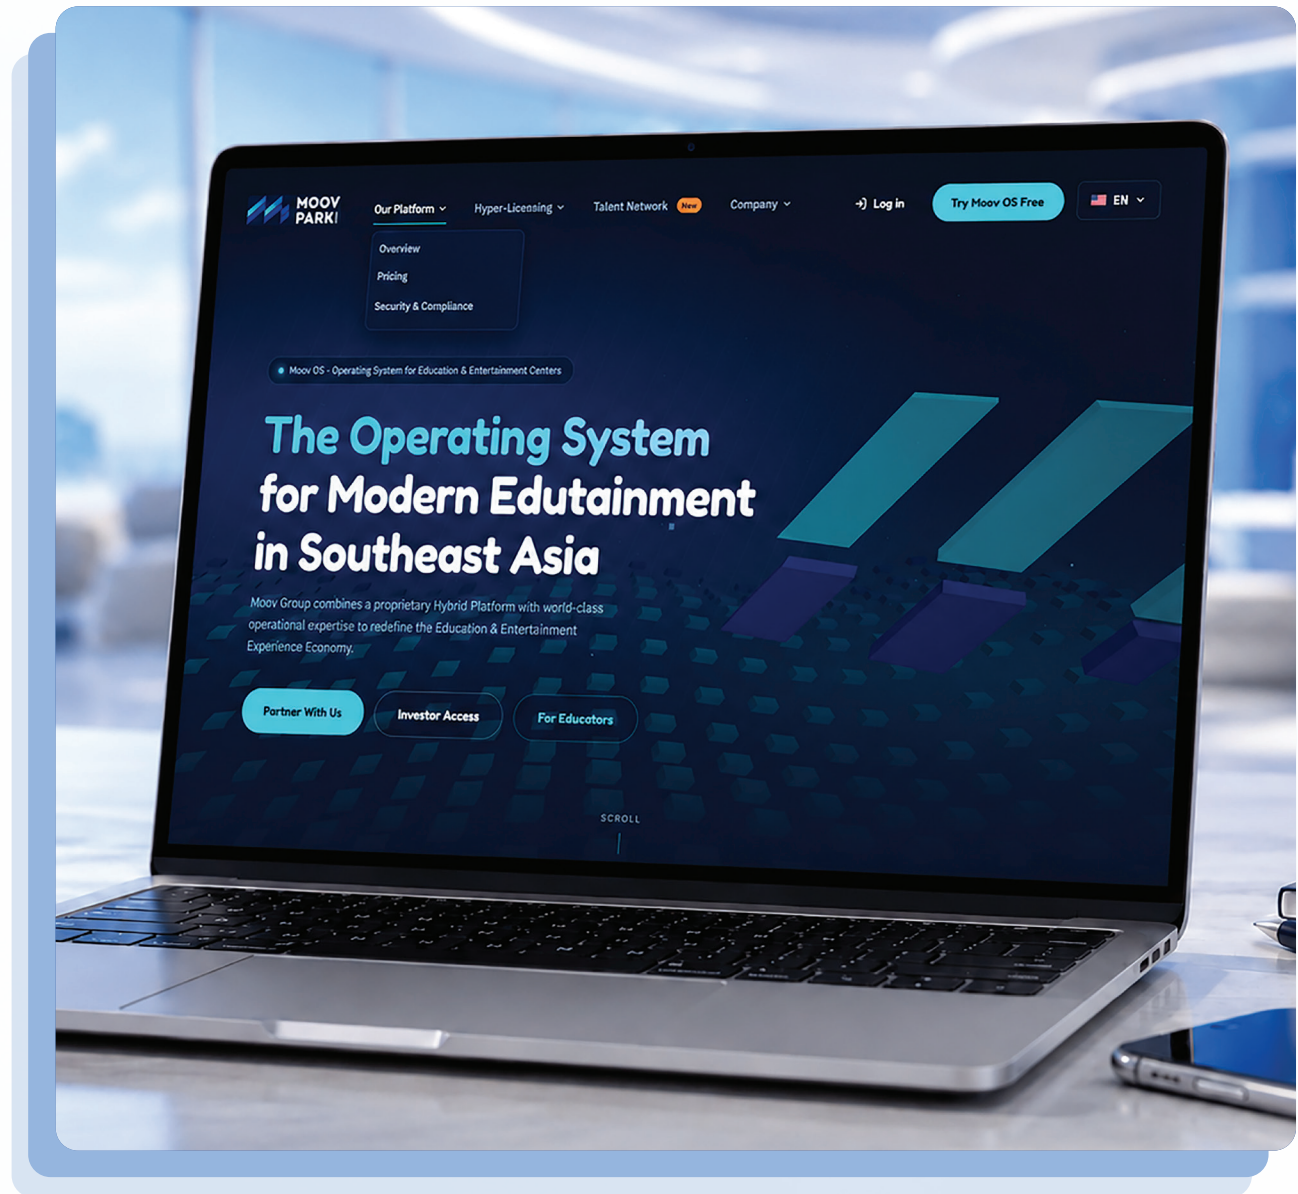

Key Features:

- **Centralized Data Management:**

Digitize and centrally manage student records, class schedules, and course information.

- **Automated Performance Analytics:**

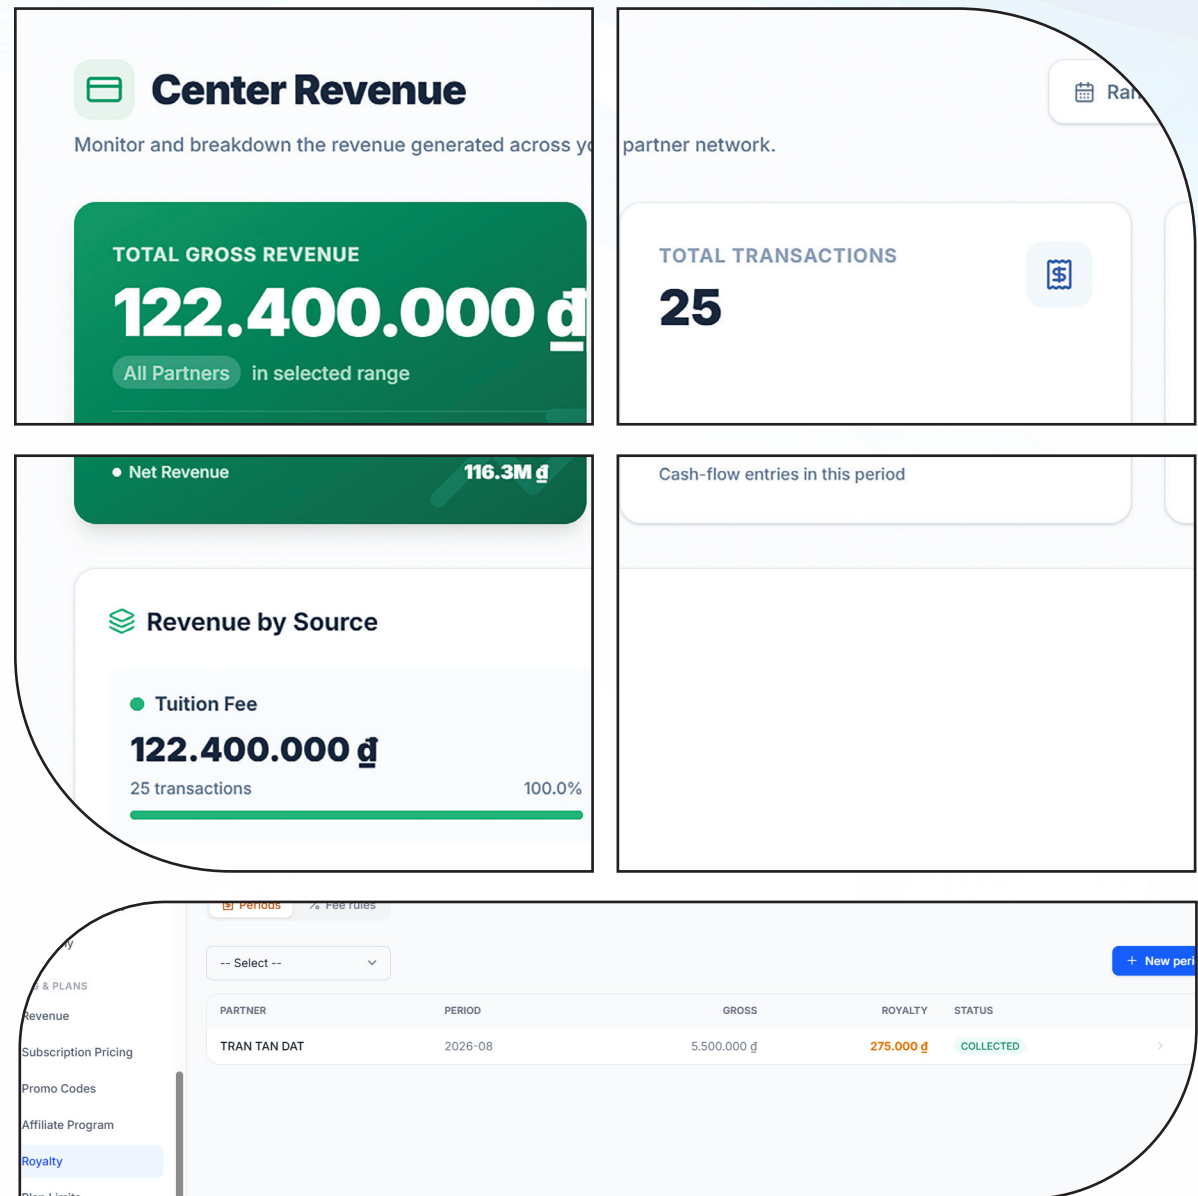

Manage operational KPIs while proactively monitoring and evaluating the performance of managers, consultants, and teachers.

Automated Extraction Engine

An automated financial transparency solution designed for large franchise chains.

When a transaction occurs, the internal FinTech system automatically reconciles transactions, separates cash flows, calculates and deducts royalty fees, and generates daily and monthly reports.

MoovPass – Seamless Contactless Identification

Transform every physical card into a “Digital Passport” for the entire ecosystem.

- **Step 1 (Tap):**

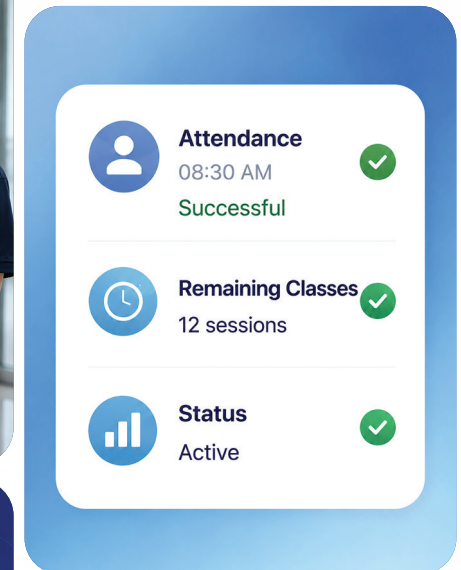

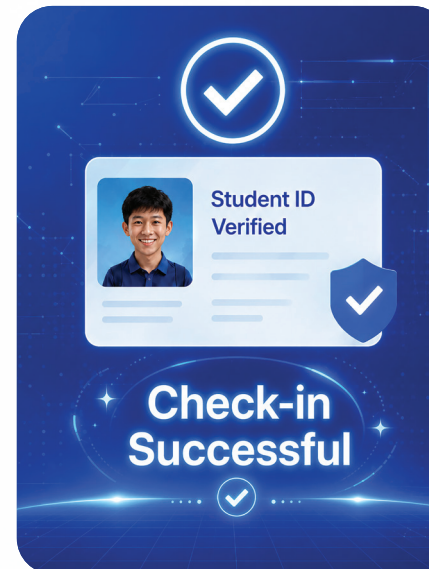

Students scan their MoovPass card at the access gate or check-in station.

- **Step 2 (Verification):**

The gate opens automatically, while the system records attendance accurately in real time.

- **Step 3 (Synchronization):**

The system automatically deducts one session from the student's remaining class balance, and instantly sends a Push Notification to the parent's app.

Artificial Intelligence: Optimizing Sales & Student Care

- **Moov AI Course Consultant:**

A 24/7 virtual assistant is available on the website. It proactively analyzes available schedules, identifies parents' needs, and automatically collects phone numbers, converting inquiries into qualified leads for the sales team.

- **Moov AI Student Evaluation:**

A machine-learning system automatically collects student performance data (physical development and skills) after each session and generates a scientifically structured AI Progress Report, delivered directly to parents. This helps increase the monthly re-enrollment rate by over 20%.

Scale-up Solution – Built for Large-Scale Organizations

Don't let the limitations of outdated software hold back your vision. Our tailored solution package is designed for chain operators and large-scale business developers seeking rapid and scalable expansion.

- **Transparent Partnership Model:**

A fixed monthly Custom Platform Fee. Experience the complete system before signing the contract.

- **Comprehensive Technical Support:**

Full technical support throughout the entire operation.

Expansion Support: Receive strategic consulting for business expansion and gain access to our Southeast Asia network.

The Premier Education Talent Network

Moov Network is an internal talent marketplace where candidates can upload their “Digital Profiles”, allowing center managers to directly identify and invite suitable professionals to collaborate.

- **For Operations Managers:**

Take full control of center operations through data-driven management.

- **For Sales Consultants:**

Maximize commission opportunities through AI-generated customer leads.

- **For Teachers / Coaches:**

Eliminate paperwork and enjoy flexible teaching schedules.

3 Simple Steps to Digitally Transform Your Chain

- **Step 1: Set Up Your Partner Portal**

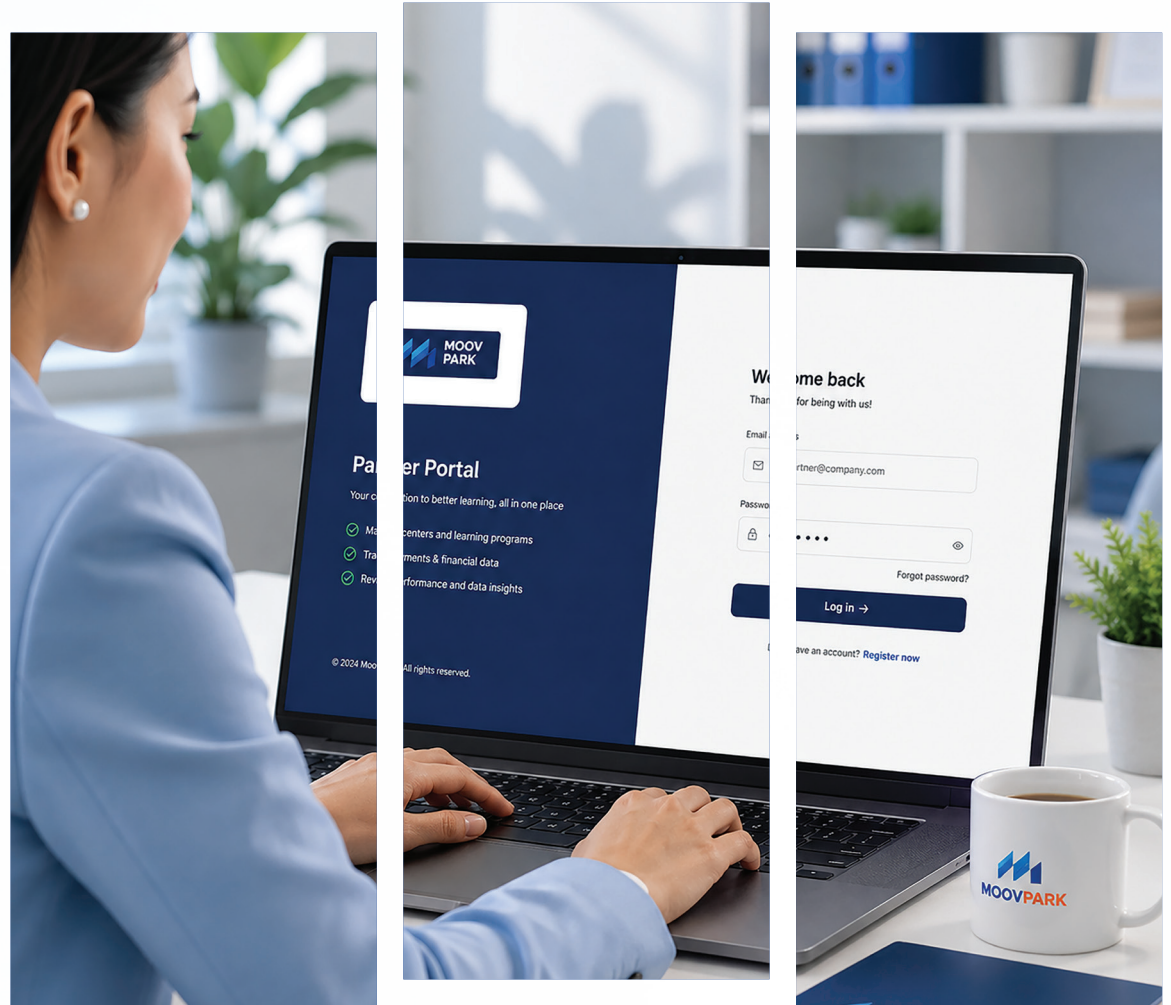

Register for a free account at portal.moovpark.com and configure a digital model that reflects your center's organizational structure.

- **Step 2: Integrate APIs & Hardware**

The Moov Park team supports the integration of payment gateways, check-in access gates, and the MoovPass card system.

- **Step 3: Scale with AI**

Activate the AI virtual assistant, configure the 3P salary framework, and unlock virtually unlimited scalability for your organization.

The background of the slide features a series of flowing, wavy lines in various shades of blue, ranging from light sky blue to a deeper cerulean. These lines create a sense of movement and depth, with some areas appearing more saturated than others. The overall composition is clean and modern, typical of corporate branding materials.
