Some of my Previous Clients

I worked with Robert Lunte, CEO of CourseCreek, to build and enhance his marketing agency using GoHighLevel. As the Director of CourseCreekHub, I manage client onboarding, handle client requirements, integrate third-party applications with GoHighLevel, and build automation and funnels. I also integrated LinkedIn Lead Generation with GoHighLevel to bring leads directly into our CRM. Our collaboration has improved CourseCreekHub's efficiency and client satisfaction.

We affectionately refer to Muhammad as "Nomi"! It was a challenge for our company to find a competent GHL team leader - someone who is willing to work hard and get things done. However, I decided to take a chance on Nomi, and he has been outstanding! Nomi is the first partner who helped us launch our www.CourseCREEKHub.io platform and made it truly operational. He's been handling everything, including onboarding new clients, and now we are getting clients into our CRM. I find Nomi to be soft-spoken, calm, calculated, and incredibly kind. He is a dependable professional, and you can rely on him. I am grateful for having met him and having him as our GHL leader.

Dr.Tarek is one of Dubai's premier plastic surgeons, known for his exemplary work in body contouring and facial rejuvenation.

I built an automation system for Dr. Tarek using GoHighLevel, including an AI chatbot that interacts with customers. Additionally, I created sales pages and designed automation workflows to nurture leads. I also set up a reputation management system to enhance Dr. Tarek's online presence and customer feedback.

I've had the pleasure of working with Muhammad Nouman as he assists with setting up my Go High-level account. His expertise and responsiveness have been exceptional.

Nouman's deep understanding of digital tools and IT solutions is evident in every interaction. He's quick to respond and thorough in his approach, ensuring every detail is noticed.

His experience creating sales page automation has been a game changer, streamlining my business processes significantly.

Beyond his technical skills, Nouman's ability to seamlessly adapt and integrate into my team has made him an invaluable asset.

Whether tackling a complex project or needing reliable technical guidance, Nouman is the go-to professional. I highly recommend his services to anyone looking to enhance their digital operations.

I built a comprehensive system for Jon Cruz on Gohighlevel, who is involved in real estate wholesaling. This system includes automated workflows, email templates, pipelines, and an AI chatbot that responds to clients and nurtures leads. The AI chatbot is designed to engage with clients effectively, ensuring a seamless and efficient process.

Agency Package: Agency Setup, Onboarding and Client Assistance with GoHighLevel

Agency Setup: One-time cost of \$1297, Client Onboarding: \$497 per client

I will charge \$1297 for the one-time agency setup. This includes snapshot configurations, domain setup, course setup, seamless email integration, custom funnels and website creation, automation workflow implementation, personalized Agency SAAS Configuration, calendar setup, AI chatbot setup, and phone system setup. I'll configure snapshots according to your business requirements. It's not possible to list everything included in this package, as different agencies may have varying needs. For Example, Some may require the creation of one funnel or five workflows, while others may request three funnels and three workflows. Therefore, requirements may differ for each agency. However, additional charges may apply if the amount of work is substantial. While I will strive to accommodate all requests within the one-time setup fee, it's humanly not possible for me to handle extensive tasks in a single package. For instance, if you have ten courses, five funnels, and ten workflows, expecting me to handle everything within the one-time setup package won't be feasible.

Please note that any additional services beyond the initial setup will be charged at \$50 per hour, ensuring flexibility and scalability as your needs evolve.

Client Onboarding:

My Client Onboarding fee is \$497 for each client you bring on board. This fee encompasses your client's account setup and onboarding process. As part of this process, I will personally conduct onboarding calls with your clients, guide them through filling out the onboarding form, gather their requirements, and assist them with setting up their website, funnels, workflows, calendar setup, domain integration, course setup (if any), and AI chatbot setup (if required).

I'm committed to providing you and your clients with the highest service and support throughout your GoHighLevel experience.

HighLevel Custom Integration and APIs - Package Starts from \$497

I offer expertise in HighLevel Custom Integration and APIs. Depending on your specific requirements, I can seamlessly integrate third-party tools via webhooks, leveraging platforms such as native GoHighLevel webhook, Zapier, Pabbly, Make, Integrately, and more. You'll need to book a

strategy call first, and then I can quote a price for your task. **Usually, for webhook integrations using platforms like Zapier, Pabbly, GoHighLevel, etc, my fee is \$497. For custom API integrations requiring coding, the charge is \$1297.**

Hire me to Migrate your existing System from any other platform to Gohighlevel - Only for \$1297

Let me handle your system migration seamlessly, moving from any other platform to GoHighLevel, all for just \$1297. This comprehensive package covers the transfer of your funnels, potentially your website, contact lists exported from CSV files or other systems, importing them into GoHighLevel's CRM, and migrating your courses. Simplify your transition, and let's integrate your system smoothly with GoHighLevel. I've got you covered whether you're currently using Keap, HubSpot, ClickFunnels, ActiveCampaign, Kajabi, etc..

Note: Because different systems have different CRM functionalities, not all data may be able to be moved.
