# Guide to Wavy Hair Extensions

## Wavy Hair Extensions

Congratulations on your purchase of our wavy hair extensions! To help you make the most of your beautiful new hair, we've compiled this aftercare guide to ensure your extensions stay stunning and healthy.

### **Why Choose Wavy Hair Extensions?**

Wavy hair extensions add beautiful texture and volume to your hair with a natural appearance, low maintenance, and versatility.

### **Understanding Wavy Hair Properties**

- **Hair Type:** Wavy extensions typically range from Type 2A-2C, offering gentle to defined S-shape waves.
- **Maintenance:** Wavy hair can be prone to frizz and dryness. Proper care is essential to maintain their natural wave and prevent damage.
- **Weather Sensitivity:** Wavy and curly hair, including extensions, are more reactive to changing weather conditions and require extra care to keep them looking their best.

# Styling Wavy Extensions

### Proper Aftercare

**Minimal Brushing:** Avoid excessive brushing to prevent frizz and maintain the wave pattern. Use a wide-toothed comb on wet hair, starting at the ends and working your way up.

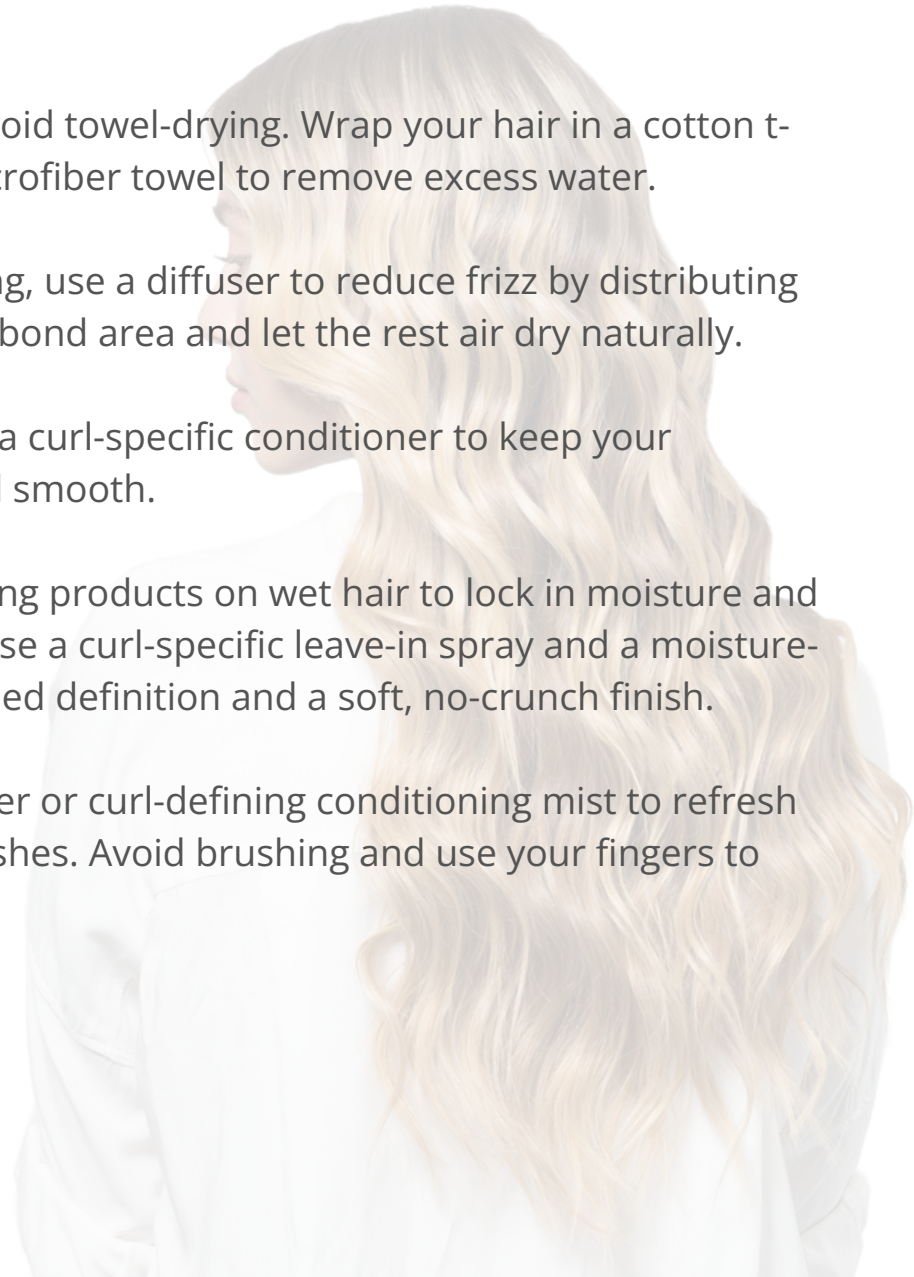

**Gentle Drying:** After washing, avoid towel-drying. Wrap your hair in a cotton t-shirt or gently scrunch with a microfiber towel to remove excess water.

**Use a Diffuser:** When blow-drying, use a diffuser to reduce frizz by distributing heat evenly. Focus on drying the bond area and let the rest air dry naturally.

**Nourish with Conditioner:** Use a curl-specific conditioner to keep your extensions moisturized, soft, and smooth.

**Product Use:** Apply curl-enhancing products on wet hair to lock in moisture and maintain thick, lustrous waves. Use a curl-specific leave-in spray and a moisture-rich, alcohol-free mousse for added definition and a soft, no-crunch finish.

**Natural Wave:** Use a water mister or curl-defining conditioning mist to refresh and enhance waves between washes. Avoid brushing and use your fingers to style.

## FAQ

### **Do wavy extensions feel drier than straight ones?**

Yes, wavy hair tends to be drier and needs more moisture. Use hydrating products, heat protectants, and leave-in conditioning mists.

### **What if my extensions are not as curly as I expected?**

To enhance curls, use a curl-enhancing mousse or product. Scrunch it into the extensions and let them air dry or use a diffuser. Avoid brushing to maintain the wave.

### **What if I accidentally brushed the wave out? Are my extensions ruined?**

No, simply re-wash or wet your hair to reset the wave pattern.

### **Can I straighten or curl my wavy extensions?**

Yes, your wavy extensions are real human hair, so you can style them as you like. Just remember to apply heat protectant and use low heat settings.
