

MYCOTOXIN BINDER

Pro-Bond Max

A concentrated source of mannose oligosaccharides (MOS) derived from the cell wall of yeast Saccharomyces cerevisiae in combination with highly absorbent hydrated sodium calcium aluminosilicate (HSCAS) for use in animal feeds as a mycotoxin binder.

Features & Benefits:

- Alleviates mycotoxicosis symptoms
- Small particle size provides high surface area for binding capacity
- MOS molecules include high level of esterified phosphate groups which increase binding capacity
- Highly effective in controlling toxins produced by Fusaria and Aspergillus molds
- Stable during feed handling
- Provides prebiotic effect by improving immunity and promoting growth
- · Effective at low inclusion rates
- Safe to add to all feeds with no residue or withdrawal concerns
- All ingredients are GRAS certified (Generally Recognized As Safe)
- · Manufactured in the United States of America

Guaranteed Analysis

PARAMETER	SPECIFICATION	
Al ₂ O	18.0	%
Crude protein	1.5	%
Mannose	2.5	%

Directions For Use:

Add at the rate of 1.0 – 2.5 kg per ton of animal feed.

The amount of molds and mycotoxins in the feed should be considered when determining the usage rate.

Ingredients:

Sugarcane molassas distillers solubles condensed (MOS), hydrated sodium calcium aluminosilicate (HSCAS)

Appearance & Odor:

Tan colored, free-flowing powder with a slight yeast odor

Packaging:

25 kg kraft bags, 40 bags per pallet

Safety:

All ingredients are Generally Recognized As Safe by the United States Food and Drug Administration. There are no adverse effect, interactions or contraindications with the product. No withdrawal time is required.

Storage & Shelf Life:

Three (3) years from manufacture date; store in a cool, dry area. Keep container closed when not in use.
