

#### **PROBIOTIC**

## **Pro-Culture**

A yeast culture resulting from the fermentation of Saccharomyces cerevisiae yeast on a corn-based media for use in animal feeds as a probiotic.

#### **Features & Benefits:**

- Improves feed intake, growth, FCR, and digestion
- Improves production performance
- Helps maintain intestinal integrity
- · Increases digestibility of the feed
- Reduces incidents of acidosis in ruminants
- Effective in both mash and pelleted feeds
- Safe and natural, low-cost solution to replace antibiotic growth promoters (AGP's)
- · Compatible with organic acids and acidifiers
- · For use in a wide variety of species
- Safe to add to all feeds with no residue or withdrawal concerns
- All ingredients are GRAS certified (Generally Recognized As Safe)
- · Manufactured in the United States of America
