

Cybersecurity Freelancer Program

Are you looking to build a career as a cybersecurity freelancer? Our comprehensive 16-week program is designed to provide you with the skills and hands-on experience needed to excel in Governance, Risk, and Compliance (GRC), with a strong emphasis on working with legal teams.

The program covers subjects including:

- **GRC Consulting:** Providing governance, risk, and compliance consulting services.
- **Policy Development:** Creating and maintaining cybersecurity policies and procedures.
- **Gap Analysis:** Identifying discrepancies between current practices and required standards.
- **Compliance Consulting:** Assisting organizations in meeting regulatory requirements.
- **Risk Management:** Conducting risk assessments and developing mitigation strategies.
- **Security Plan Development:** Creating System Security Plans (SSPs).
- **Incident Response Planning:** Developing and implementing incident response plans.

Why Choose Our Program?

Tailored for Freelancers

At Threatelligent LLC, we understand the complexities of the cybersecurity landscape and the unique challenges faced by freelancers. Our program is specifically tailored to equip you with the knowledge, skills, and real-world experience needed to succeed.

Practical Application:

Students engage in hands-on labs, real-world scenarios, and cyber range simulations to reinforce learning and ensure they can apply their knowledge effectively in their careers.

Holistic Training

The curriculum is aligned with the latest industry standards and includes advanced training, policy development workshops, and cyber range exercises.

Cybersecurity Freelancer Program

KEY DATA

Course Name: Cyber Freelancer Program

Key Data:

- Duration: 16 weeks
- Language: English
- Format: Instructor-led Course (Lecture and Lab) Live Virtual Training

Prerequisites: Ideal for individuals with a foundational understanding of cybersecurity concepts and a desire to specialize in Governance Risk and Compliance (GRC).

Materials Provided:

- Templates and Study Guides
- Lab Exercises and Practice Scenarios
- Access to Online Learning Portal with Additional Resources
- Practice Exams and Quizzes
- Certification Exam Voucher (included in the course price)

Course Fee: TBD

BENEFITS

As a result of this program, participants will gain advanced knowledge and skills in Governance Risk and Compliance (GRC) with a focus on working with legal teams. Graduates will be equipped to handle real-world cybersecurity challenges and provide valuable consulting services. This course prepares students for roles such as GRC Consultant, Policy Writer/Analyst, Compliance Consultant, and more.

COURSE OVERVIEW

The Cyber Freelancer Program is designed to provide comprehensive training in GRC and cybersecurity. The course includes in-depth instruction on the following topics:

- **GRC Consulting**
- **Risk Management**
- **Security Plan Development**
- **Incident Response Planning**
- **POAM Management**

Students will engage in hands-on labs, real-world scenarios, and cyber range simulations to reinforce learning and ensure they can apply their knowledge effectively. The curriculum is aligned with the latest industry standards and includes certification pathways such as CISM, policy development tutoring, and cyber range exercises.

UPON COMPLETION

Participants will:

- Develop and maintain cybersecurity policies
- Conduct gap analyses
- Collaborate with legal teams
- Understand the legal implications of cybersecurity measures

CERTIFICATION

Students will receive a certificate of attendance and be prepared for the Certified Information Systems Manager Exam.

Cyber Community Partnerships

Strategic Relationships for Cultivating Tomorrow's Cyber Workforce

Partner with **Pass IT On, Inc.** to cultivate a pipeline of entry-level cybersecurity talent tailored to meet your company's specific needs while dynamically addressing community and industry challenges. Here's an overview of our Cyber Community Partnership Program in 3 steps:

How Our Program Works:

- 1 Interview:** Pass IT On meets with community business stakeholders to discuss and identify qualities that make a strong entry-level cybersecurity job candidate in their particular organization and industry.
- 2 Customize:** Leveraging those insights, we, along with our training partners, develop cyber ranges, Capture the Flag (CTF) exercises, and mini apprenticeship opportunities that incorporate some of the challenges an entry-level professional would face.
- 3 Present:** Attend or sponsor CTF competitions, then review assessment reports of participants. Track apprenticeship activities that highlight potential job candidates. Gain direct access to a pipeline of skilled entry-level talent.

About Pass IT On, Inc

Mission Alignment

As a 501(c)(3) nonprofit, we are deeply committed to developing impactful IT education and training programs that address both current and future community needs.

Community Engagement

Our initiatives are designed to integrate closely with local businesses and organizations, ensuring that our training programs are both relevant and beneficial to the community and industry.

Practical Activities

Our training is continuously updated to reflect the latest industry standards and needs, preparing candidates who can make immediate contributions to your security efforts.

Transforming Cybersecurity Training and Careers

Understanding the Challenge in Today's Cyber Job Market

At Pass IT On, a 501(c)(3) nonprofit, we believe that real-world experience is essential to complement industry-recognized certifications. That's why our comprehensive training not only includes certification paths but also provides opportunities to work on professional IT projects. Our programs ensure that under-served youth, adults, and transitioning military personnel acquire both the knowledge and practical skills needed to thrive in the cybersecurity field.

- **Cybersecurity Certification Tutoring & Bootcamps Offered through our programs:**
Net+, Sec+, CySA+, CISM, & PMP through our community partner Threatelligent LLC.

- **Training Focus:**
Cyber ranges, immersive simulations, real-client projects with subject matter experts guidance.

Certification Preparation

- Dive deep into courses for critical cybersecurity certifications.
- Features live and online bootcamps, or private tutoring.

e-Sport CTFs

- Hands-on virtual cyber ranges simulating real-world scenarios.
- Focuses on practical skills like gap analysis and incident response.

Client Project Experience

- Operationalizing certification knowledge with real project experience.
- Tailored for entry-level professionals, enhancing skills and marketability.

Training Partners

Network+ Certification

VS

Security+ Certification

Ideal for

Individuals wanting to build a career in network administration and those with foundational IT knowledge seeking to expand their networking skills within cybersecurity.

Ideal for

Those wanting foundational cybersecurity knowledge to expand their IT career and to land an entry-level position in cybersecurity.

Provides essential networking skills and knowledge that prepares individuals for network support and administration roles.

How do they differ?

Security+ validates foundational IT security skills that are necessary for core IT security functions and for the pursuit of higher-level security certifications.
