

CASE STUDY

Transitioned Insurance Company from PC's to Anytime/Anywhere Desktop Services

Background

An insurance company was in a bit of a pickle. Their old desktops were on their last legs, and replacing all of them was going to cost a fortune. They needed a way to save money and boost efficiency without sacrificing performance and security.

Objective

The mission was clear: move the team from clunky old desktops to something more flexible and budget-friendly. Enter Pickle Anytime/Anywhere Desktop Services. This virtual desktop solution lets employees access their work from any device, anywhere, anytime.

Solution

Here's how we made it happen:

1. **Assessment and Planning:** We took a good look at their current setup and came up with a detailed plan to make the switch with as little downtime as possible.
2. **Infrastructure Setup:** We set up the Anytime/Anywhere environment, including virtual desktops, security measures, and data migration strategies.
3. **Implementation:** We moved users to Anytime/Anywhere in phases to keep things smooth.
4. **Optimization:** We kept an eye on the new setup, making tweaks for top performance and security.

Results

Switching to Anytime/Anywhere was a game-changer:

- **Cost Savings:** They dodged the massive cost of new desktops and cut down on maintenance and support expenses.
- **Boosted Efficiency:** Employees enjoyed faster, more flexible access to their desktops from anywhere.
- **Scalability:** The virtual desktops easily scaled with the company's growth, no extra hardware needed.
- **Top-Notch Security:** Anytime/Anywhere had all the security features to keep their data safe and sound.
- **Business Continuity:** Remote work became a breeze, ensuring the business kept running smoothly, even during disruptions.
