

A HOLISTIC APPROACH TO HEALTHY, FULLER HAIR

Hair loss is a growing concern for both men and women, especially with post-COVID hair loss and hair thinning associated with Semaglutide (GLP-1) medications used for weight loss. At AnAesthetics, we take a comprehensive, non-surgical approach to hair restoration, combining the latest in regenerative medicine with personalized treatment plans to stimulate natural hair growth and maintain long-term results.

Our Hair Restoration Approach:

We focus on minimally invasive, science-backed solutions to help restore hair growth and improve scalp health without surgery or transplants.

PRP Injections with Regenerative Medicine

We use Platelet-Rich Plasma (PRP) therapy to naturally stimulate hair follicles, improving hair thickness, strength, and regrowth. PRP is packed with growth factors that enhance the body's natural ability to repair and regenerate hair.

Bio-Stimulators for Enhanced Hair Growth

We incorporate bio-stimulating injectables that support collagen production and follicle regeneration, optimizing scalp health and improving hair density over time.

Microneedling for Hair Rejuvenation

Our microneedling treatments help increase blood circulation to the scalp, allowing PRP and bio-stimulants to penetrate deeper and work more effectively for long-lasting results.

Holistic Hair Growth Support

To enhance and maintain results, we integrate a holistic, multi-layered approach, including:

- ✓ *Medical-grade shampoos & conditioners tailored to scalp health*
- ✓ *Signature prescription serums for at-home maintenance*
- ✓ *Nutritional support & vitamin supplements to nourish hair from within*
- ✓ *Customized application process for maximum absorption and effectiveness*

HAIR RESTORATION IS A PROCESS—PATIENCE PAYS OFF

Hair regrowth takes time, and we recommend a series of 3 to 6 treatments, spaced one month apart, to see optimal results. Our team works closely with stylists at The Loft to ensure the best scalp and hair care practices, preventing further damage and maximizing regrowth potential throughout the process.

BREAKING THE STIGMA OF HAIR RESTORATION

Hair restoration is no longer a secret. With increasing openness about hair loss solutions, more people are embracing treatments that restore their confidence. From celebrities to everyday individuals, the trend toward natural-looking, subtle enhancements is reshaping perceptions of hair restoration.

Who Can Benefit from Our Hair Restoration Treatments?

- ✓ *Men and women experiencing post-COVID hair loss*
- ✓ *Patients using Semaglutide (GLP-1) weight loss injections experiencing hair thinning*
- ✓ *Individuals with early-stage hair thinning looking for proactive solutions*
- ✓ *Anyone seeking non-surgical, regenerative hair growth solutions*

Ready to Restore Your Hair?

At AnAesthetics, we offer a personalized, non-invasive approach to hair restoration. Our science-backed treatments, paired with expert hair care and holistic wellness strategies, give you the best possible chance at stronger, healthier hair.

Schedule your consultation today and take the first step toward renewed confidence!
