ABOUT THE COURSE

Harmonic Leadership 4 Month Short Course

This program is about embarking on a transformative journey to become a unique leader. It will guide you to explore deep within yourself, revealing an inner understanding that has long been present but not fully expressed. This journey is not just about discovery but also about rediscovery. It's about recalling the essence of who you are as an individual, as a leader, and embracing the way you want to lead.

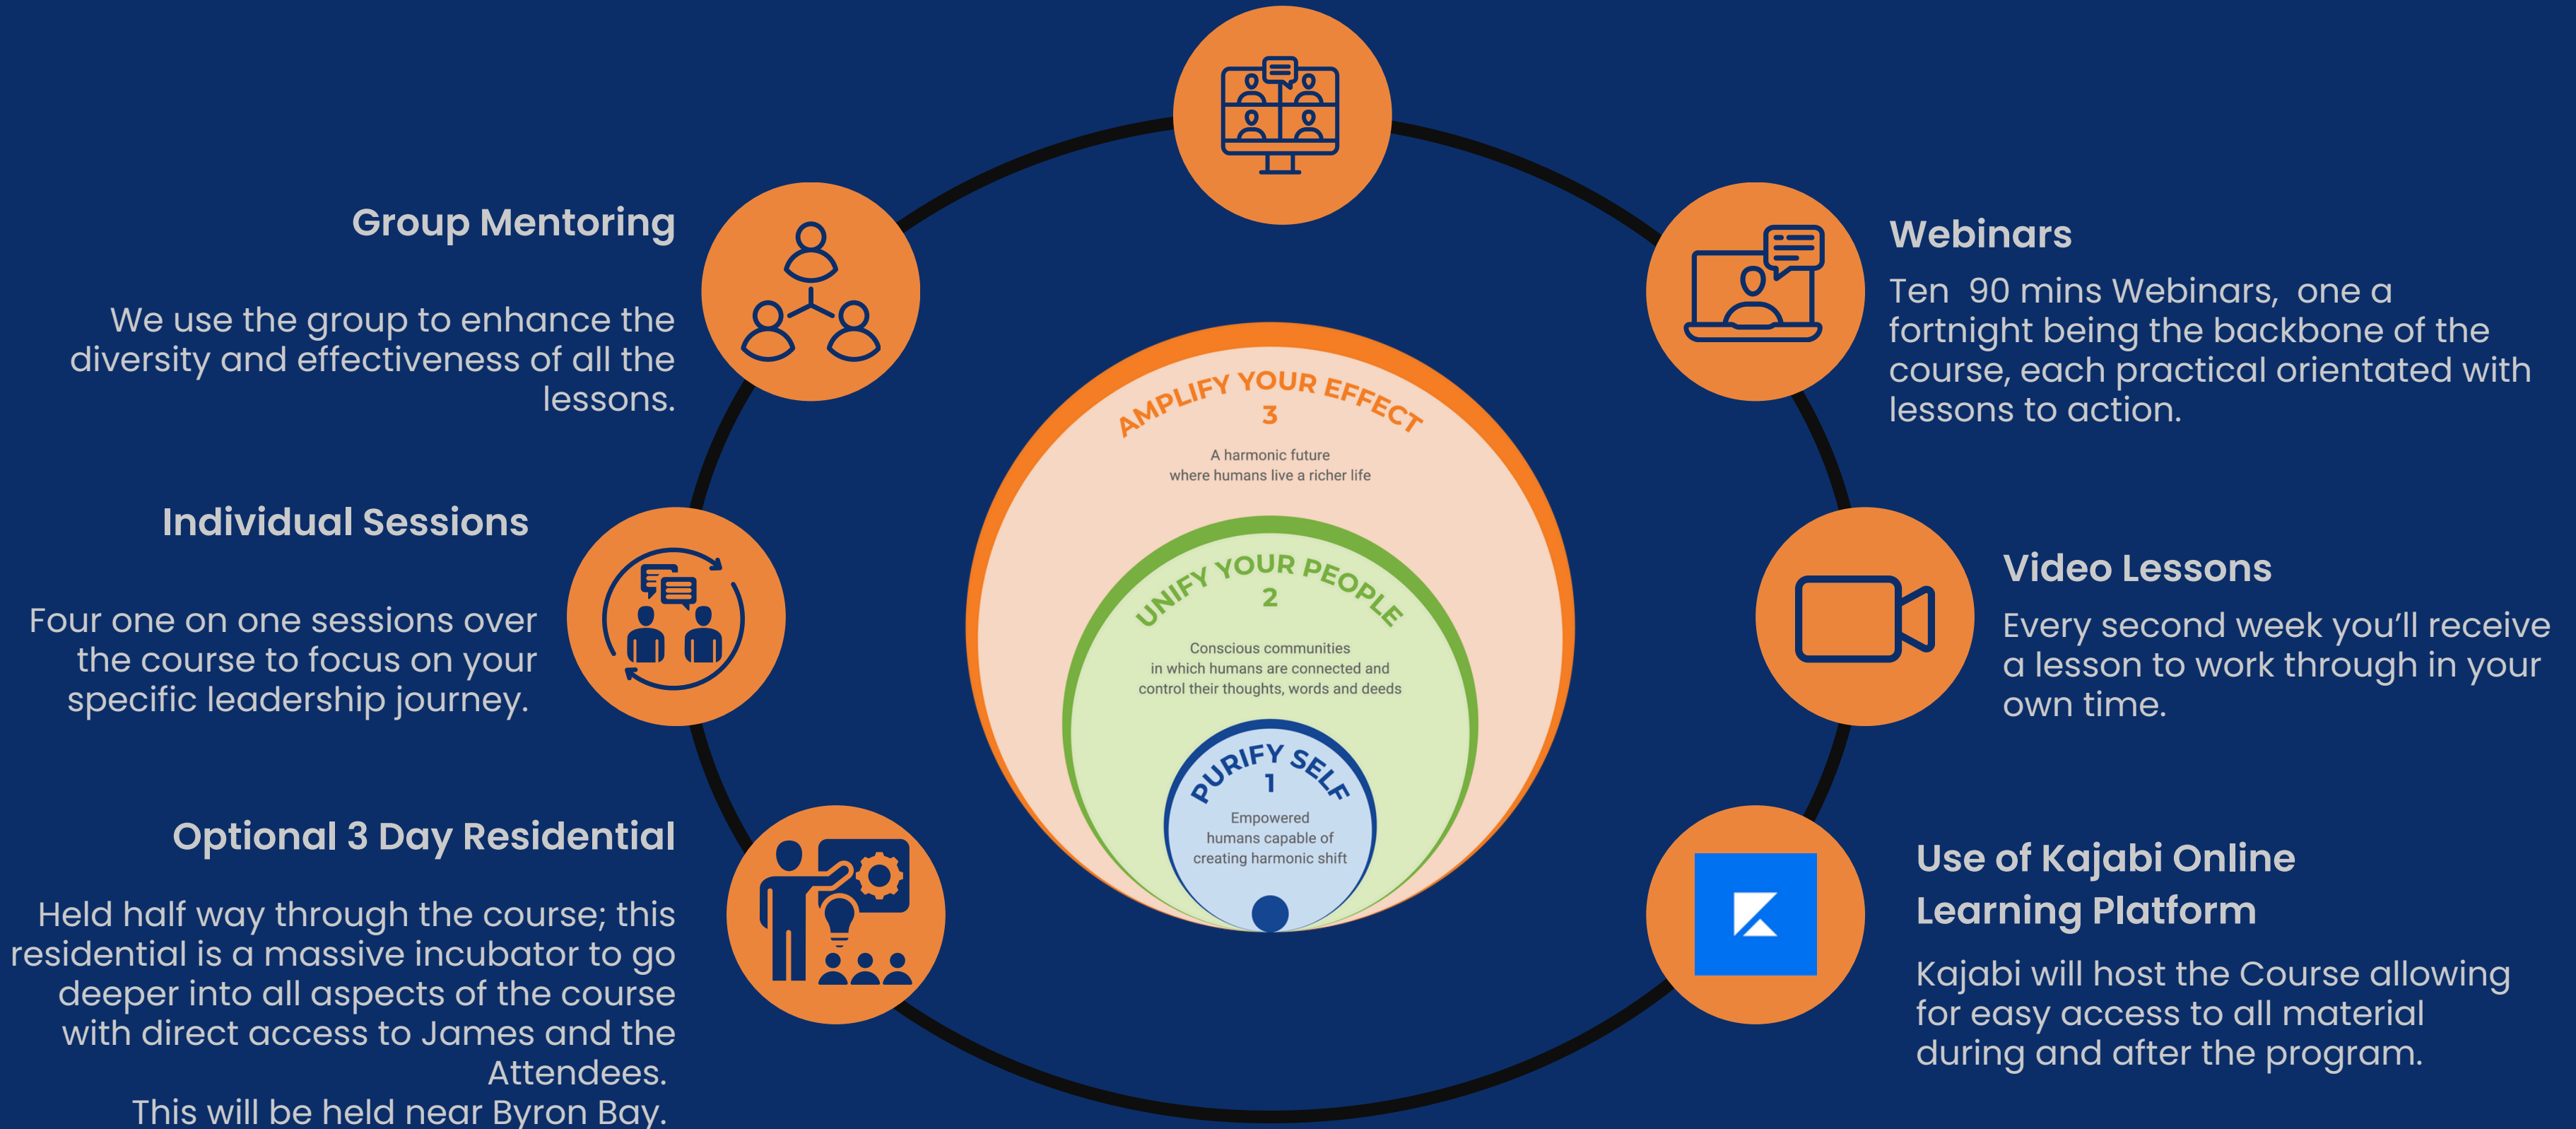

In today's world, embracing a fresh approach to leadership is crucial. Crafting a New Way To Lead is an opportunity waiting for you to seize. Evolutionary leaders bring about change in individuals and circumstances within the system. On the other hand, revolutionary leaders establish new paradigms and subsequently develop systems to uphold them. The decision of becoming either one is entirely up to you.

OUR APPROACH

1. Purify Self

Leading from an inauthentic place, or one which we've been lead to believe we need to, creates resistance and fractures in ourselves.

Getting clear on who we are, what stand for, what our Big Why is all provides a solid foundation. Coupling this with the basic knowledge of our psyche and emotions creates a credible platform from which to lead.

2. Unify Team

We must first Purify Self so that we can create a team which is aligned with us, our vision and goals. Knowing self allows us to learn about how others operate and what makes them become the most effective members of this aligned team. Leaders who master constructive influence of the team, create the best space for miracles to occur.

3. Amplify Effect

Having a strong sense of self-awareness and a cohesive team by our side, we are now prepared to press the "Go" button. However, before taking this step, it is crucial to grasp the dynamics of change, the importance of relationships, and the impact of culture to maximise effectiveness.

LEADERSHIP ESSENTIALS:

Though Leadership Essentials are crucial, the power of Harmonic Leadership is in how we approach them. Through structured self-exploration as both an individual and a leader, you can pinpoint any hurdles that may be hindering your development in these aspects. This method will enable you to refine your abilities and seamlessly integrate enhancements into your daily practice.

Strengthen Decision-Making Skills

The ability to make timely, accurate, balanced decisions is essential and one that can be inclusively or exclusively. The Art is knowing which one and when.

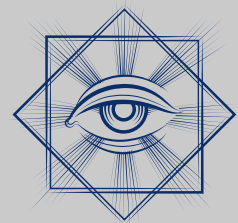

Enhance Group Dynamics.

Reading, working with and influencing teams to enhance their performance is a skill and language that makes good leaders great.

Master Emotional Literacy

Emotions are the gateway to understanding and connection to people, so as a leader we must master ours, become aware of others and understand their meaning.

Leadership Philosophy

Creating a Leadership Philosophy involves delving deep into your identity as a leader, your values, and your approach. It serves as a foundation for maintaining consistency.
