

# Feature Update August 2022

## **New Features:**

Save time by setting up a legend for all your sites at once!

You can now create a **Map Legend Key**, or organization-wide site map legend, that is put on all of your site maps. Any map you make after you create the map legend key will have that legend pre-populated.

## **Contact us to turn on this feature for you!**

Call [\(385\) 273-7773](tel:3852737773), or email [support@compliancego.com](mailto:support@compliancego.com).

## **Enhancements:**

- Streamlined the experience on all devices for forms with longer form names.
- Streamlined the zooming functionality in the dashboard map for pins.
- Added a toggle to hide inactive icons on the site map.
- Added room for more notes to the action logs section on inspection reports.

## **Bug Fixes:**

- Fixed a bug that caused the site pages to display improperly on some tablets.
- Fixed a browser based issue that would cause the page to refresh when trying to add users, notification recipients, and inspections on some mobile devices.
- Fixed a resolution issue that could cause the header to cover the buttons at the top of the inspection on some mobile devices.
- Fixed an issue that could cause the text pop up box on a map pin to conflict with the heat map.
- Fixed an issue that prevented copied maps from accessing the new Map Legend Key.
