

# Feature Update May 2022

## **New Features:**

1. Inspections and action items can be assigned to specific individuals.
2. Action item due dates are now included on the inspections calendar.
3. Action items and inspections on the Inspections Calendar can now be filtered by individual.

## **Enhancements:**

- Additional action item priority, "Operator Signature".
- New site category, "Dewatering".
- Improvements for the navigation for smaller organizations.
- Additional details to the self-sign-up page.

## **Bug Fixes:**

- Fixed the issue where if you unassigned someone from an action item, you could not reassign them without first assigning someone else.
- Fixed an issue that caused Site Viewers to see a white screen instead of their dashboard.
- Fixed an issue that caused some Org Editors to see a white screen when loading their organizations' dashboards.
- Fixed a bug that caused the Operator Signature action item priority to be incorrectly labeled Non-Specific.
- Fixed a bug that would prevent you from deleting an inspection or action item that was assigned to someone.
- Fixed an issue where the organization dashboard map would fail to load for organizations that had a lot of sites.
