

Feature Update January 2023

Enhancements:

- Several minor aesthetic adjustments to the inspection report.
- Improved the flow and aesthetics of adding/editing a site contact, both in the site creation wizard and when editing the site information.
- Added a new document type, “Jurisdictional Inspection”.
- Made the “Copy and Edit Last Inspection” feature resilient against form changes.
- Action Items on the site map will now remember the size of the last pin you have put down.
- Enhanced the performance of the action item reports to make them load faster.
- Added the action log report to directors.
- Fixed some file links to be even more secure.
- Fixed some email images that were causing our emails to be marked as spam.

Bug Fixes:

- Corrected permission issues on the map legend key.
- Fixed an issue that could cause action items to prevent an inspection from loading properly.
- Fixed errors when adding a site contact, both in the site creation wizard and when editing the site information.
- Corrected an issue that caused filters on the inspections calendar to reset when you switched months.
- Fixed an issue that would cause an error when adding an action item with a target date.
- Fixed an issue that could cause an error when inactivating a site.
