

COMPLIANCEGO

Stormwater Inspection Software

Here is Problem #3 that ComplianceGo solves-Inspection reports could not replicate formatting outputs required in many states. ComplianceGo provides Replicated Custom Forms Outputs for required industry/MS4/state forms.

ENHANCEMENTS

- Numerous weather information delivery improvements to provide more timely updates.
- Added 1 hour accumulation readings to the hourly precipitation report.
- Improved sorting in the predefined titles and descriptions options.
- Added a line thickness picker to the site maps line tools.

BUG FIXES

- Fixed an issue that could prevent a user from adding a weather event trigger to a site.
- Fixed an issue that could cause a user to be unable to create a site.
- Fixed an issue that could prevent a user from deleting an in-progress inspection if they had a site map attached to the inspection.
- Fixed an issue that could cause the switcher between MS4 and Company to not display properly for some users.

FEATURES

- Metadata on Photos: Photos uploaded to inspections can now have the metadata displayed on them in the UI and on inspection reports. This is an optional feature.
- Attaching Site Map Links to Inspection Reports: Inspectors can now attach links to site maps to inspection reports.
