

Step 4 - Integrations

Modified on Tue, 28 Feb 2023 at 06:00 AM

Integrate Your Google Account

Under Settings, click on Integrations. Then click "Sign In With Google" which will open a new window. Select an already logged in account, or enter your login details. Then scroll to the bottom of the next page and click Allow. If your Google account is connected to a Google Business Profile, you can select the business profile you would like to connect from the dropdown on the next page. We recommend leaving Enable GMB Call Tracking checked.

Integrate Your Facebook Account

Next, under the Facebook logo click "Connect" which will open another popup. Login to Facebook now, or click "Continue As..." to connect to Facebook. Once connected, select the Facebook page you would like to connect from the dropdown.
