AI Mastery

Make AI Your Everday Superpower

Workshop Day 1 introduces AI as your helpful assistant. Day 2 transforms it into your genius sidekick—a powerful companion that effortlessly delivers incredible usefulness in every area of your life.

This is where you gain true digital independence for most of life's daily challenges, rarely needing to seek outside help for research, tech support, learning new skills, or navigating complex decisions.

You'll discover how to personalize ChatGPT by training it to reflect your voice, values, and favorite mentors—creating truly customized AI assistants that understand you.

Genwise Learning

AI Mastery: Turn AI Into Your Everyday Superpower

The course advances into sophisticated content curation, where AI becomes your personal entertainment concierge, and comprehensive learning support, turning ChatGPT into a patient tutor for any subject you've always wanted to master. You'll gain digital independence through expert navigation of complex websites and instant tech support for any device problem.

You'll learn to use AI for deep research mastery - using AI to analyze complex decisions like retirement planning or major purchases with professional-level organization and clarity. Your journey concludes with powerful "super prompts" that create your permanent AI learning coach, deep research assistant, and legacy project manager. These tools ensure you continue growing with AI technology while helping you create something meaningful - whether it's a family cookbook, memoir, or wisdom collection.

By graduation, you'll have evolved from someone curious about AI into a confident creator with personalized AI assistants and the skills to keep advancing as technology evolves.

Master Advanced AI Skills

Transform from AI beginner to confident creator with personalized assistants that understand your unique style and needs.

Curriculum Modules

Module 13: AI That Learns You - Create Your Personal AI Coach

What if you could train AI to think like your favorite mentor, write in your voice, or coach you using your own values? In this module, you'll discover how to upload documents and teach ChatGPT to become truly personalized to you.

You'll see how to:

- Upload personal documents, favorite books, or inspirational content to train your AI
- Blend multiple influences into a custom "hybrid mentor" (imagine Tony Robbins + your own wisdom!)
- Teach AI to write in your exact tone and style
- Create a values-based coach that guides decisions using your principles, not generic advice
- Control what AI remembers vs. what stays private to just one conversation

By the end, you'll have your own personalized AI that reflects your voice, values, and favorite thinkers — like having a wise friend who truly "gets" you available 24/7.

Start Your Journey →

Module 14: Personal Discovery Mode - Your Memory Detective and Storytelling Partner

Ever have a song stuck in your head but can't remember the title? Or try to recall that movie from the '80s with the guy on a motorcycle? In this module, you'll discover how ChatGPT becomes your personal memory detective.

You'll see how to:

- Describe half-remembered songs, movies, or books with just fragments and let AI piece them together
- Turn vague memories ("that intense song that went something like...") into clear answers
- Rediscover forgotten favorites and get recommendations based on your real preferences
- Use memory prompts to spark legacy writing and family storytelling
- Create thoughtful conversations that help you reflect on meaningful life experiences

By the end, you'll have a tireless companion who can help you reconnect with forgotten joys and guide you through meaningful reflection and storytelling.

Start Your Journey →

Module 15: AI for Content Discovery - Your Personal Entertainment Concierge

Tired of scrolling endlessly through Netflix or getting the same generic recommendations everyone else sees? In this module, you'll transform ChatGPT into your personal entertainment concierge.

You'll see how to:

- Get personalized book, music, and show recommendations based on feeling, not just genre
- Build dedicated recommendation chats that get smarter about your preferences over time
- Create themed content bundles around moods, seasons, or life moments
- Move beyond trending lists to discover hidden gems that truly match your style
- Refine recommendations by giving feedback until they're perfect

By the end, you'll never be stuck in that "What should I watch tonight?" loop again. Instead, you'll have a tireless companion who helps you find content that feels like it was curated just for you.

Start Your Journey →

Module 16: Learn Anything, Anytime - Your Personal AI Tutor

Ever thought "I wish I could go back and learn that" or "I've always wanted to understand this better"? Now you can - without classes, textbooks, or schedules.

You'll see how to:

- Get complex topics explained in simple, relatable terms
- Create custom learning plans for languages, hobbies, or skills at your own pace
- Turn lessons into fun quizzes and interactive exercises to test your understanding
- Use analogies and examples that match how you best learn and remember
- Practice languages with voice mode - ChatGPT can hear your pronunciation and speak back to you

By the end, you'll have a patient, tireless teacher who never gets frustrated, always adapts to your style, and makes learning feel joyful again.

Start Your Journey →

Module 17: Using AI to Navigate the Web & Tech Life - Your Digital Guide

Tired of getting lost in confusing websites and feeling frustrated by tech that seems designed to confuse you? This module gives you a patient digital navigator.

You'll see how to:

- Get step-by-step walkthroughs for any website or app by simply describing what you see

- Upload screenshots when you're stuck and get instant "click here, then here" guidance

- Prepare for complex online tasks by getting a roadmap before you even start

- Decode confusing error messages and tech jargon in plain English

- Handle phone settings, app problems, and software updates with confidence

By the end, you'll have digital independence. The internet will finally work for you, not against you.

Start Your Journey →

Module 18: Getting Tech Help with Anything - Your 24/7 Tech Support

Printer won't work at 9 PM? Phone acting strange? Computer showing mysterious error messages? Turn ChatGPT into your personal tech support team.

You'll see how to:

- Fix common device problems with step-by-step troubleshooting

- Decode confusing error messages and tech alerts in plain English

- Learn new software or apps at your own pace without feeling overwhelmed

- Set up a permanent "Tech Support" chat you can return to whenever issues arise

- Understand what's actually wrong before calling expensive repair services

By the end, you'll have replaced tech frustration with calm confidence. Tech troubles become manageable puzzles, not overwhelming roadblocks.
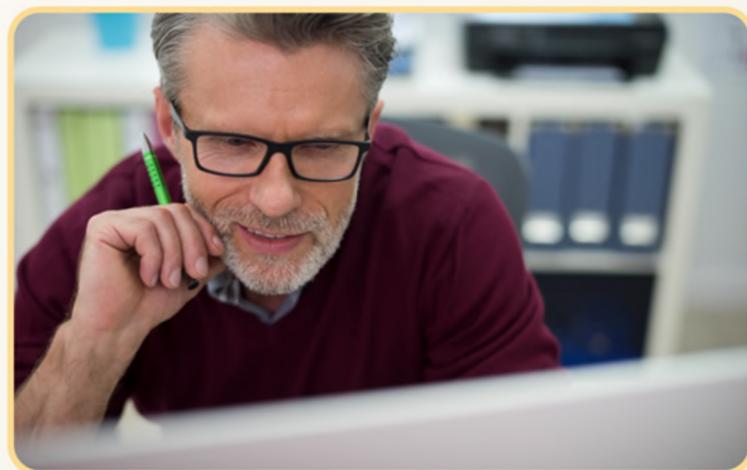

Start Your Journey →

Module 19: Deep Research Assistant - AI as Your Personal Research Analyst

Tired of drowning in Google searches with 25 browser tabs open and still no clear answer? Transform ChatGPT into your personal research analyst.

You'll see how to:

- Start with big, complex questions and guide AI to filter and narrow results systematically

- Get targeted, comprehensive research in minutes that would take hours on Google

- Create custom comparison tables and scorecards based on what actually matters to you

- Use AI as a decision coach that asks you the right questions to clarify your priorities

- Research everything from retirement communities to Medicare plans with structured analysis

By the end, you'll never again feel overwhelmed by big decisions. Decision-making becomes faster, smarter, and stress-free.

Start Your Journey →

Module 20: Chat Memory + Hygiene - Keep Your AI Sharp and Organized

Now that you've learned to create different chats for different purposes, it's time to master the next level: understanding how ChatGPT's memory actually works.

You'll see how to:

- Understand the difference between temporary chat memory and permanent AI memory
- Recognize when conversations will eventually get "stale" and lose focus
- Use "migration briefs" to transfer important information to fresh chats when needed
- Clean up memory clutter and remove outdated or irrelevant information
- Edit what ChatGPT remembers about you to keep it current and useful
- Maintain multiple specialized chats without them interfering with each other

By the end, you'll have expert-level knowledge of how to manage ChatGPT's memory systems. This ensures your AI conversations stay focused and helpful over months and years of use.
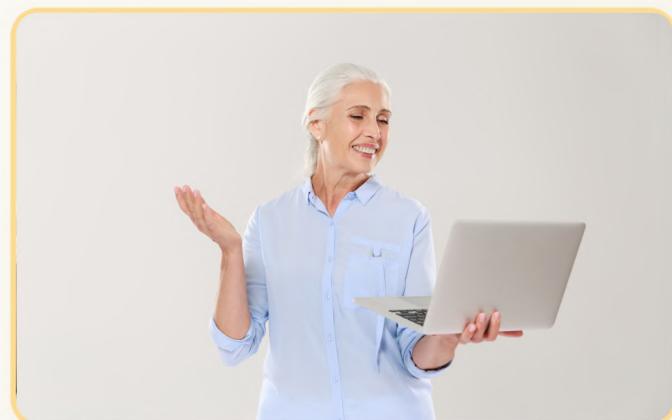

Start Your Journey →

Module 21: Prompt Craft for Non-Techies - Talk to AI Like a Friend, Not a Computer

Worried about "saying it wrong" to ChatGPT? This module eliminates that fear by showing you how to communicate with AI using perfectly natural, conversational language.

You'll see how to:

- Use "meta-prompts" - simply ask ChatGPT to write better prompts for you when you're stuck
- Improve and refine your requests through natural conversation, not technical commands
- Build effective prompts using everyday language and common sense
- Get template cards with proven phrasing patterns you can adapt to any situation
- Set up your permanent AI prompt coach that helps create perfect prompts instantly

By the end, you'll communicate with ChatGPT as naturally as talking to a knowledgeable friend. Communication becomes effortless, and AI becomes truly accessible.

Start Your Journey →

Module 22: AI Mastery - Super Prompts & Your Legacy Project

Module 22 is the pinnacle of your AI learning journey. This capstone module unlocks the most powerful "super prompts" we've saved for last and guides you in creating something truly meaningful.

You'll see how to:

- Set up your permanent AI Skills Expansion Tutor that continues teaching you new capabilities
- Create a Deep Research Manager for comprehensive analysis of complex topics
- Master advanced features like voice conversations, image generation, and visual analysis
- Design a personalized Legacy Project Manager to help you create something lasting and meaningful
- Put everything into practice by creating your own Legacy Project - whether it's a family cookbook, memoir, or wisdom collection

By the end, you'll have transformed from someone who was nervous about AI into a confident AI master with your own suite of specialized assistants. This is your graduation moment - where learning becomes legacy.

Why 2-Day Workshop Takes You Further

- **Advanced capabilities:** Go beyond basics to master consultant-level AI techniques that even many tech savy users aren't aware of

- **True digital independence:** Gain skills for research, tech support, and complex decisions without outside help

- **Personalization mastery:** Create custom AI assistants trained on YOUR interests, values, and favorite mentors and authors

- **Legacy & meaning:** Learn to build something lasting—family cookbooks, memoirs, wisdom collections

- **Extended support:** 8 weeks of live Q&A coaching (vs. 4 weeks with Day 1 only)

- **Exclusive Day 2 resources:** Advanced prompt library with professional-grade "super prompts" for ongoing growth

What some of our customers are saying...

"My husband and I took a 6 week trip to Europe over the summer. With what we learned in the Genwise Learning course we had AI plan out the entire trip from beginning to end, down to every detail. Plane tickets, hotels and inns, which places to visit along the way, hidden gems, practically every restaurant, walking tours of sights. It was amazing, like having the ultimate travel concierge with us the whole trip!"

- Jean L., Sarasota, FL
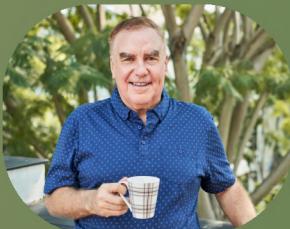

"Hey Chris, I can't tell you how much I'm loving this! If you told me a year ago I'd be using AI every day, I'd have said you're crazy. I could've never imagined something that would be so useful for daily news briefings, research, writing. And the thing that amazes me is just how easy it all is. Makes me feel like I'm a computer whiz!"

- David W., Fort Myers, FL
