

# Livestock Dosage Guidelines

Streamline your livestock management with our comprehensive dosage guidelines, ensuring optimal health and care for your cattle, sheep, goats, swine, and horses.

## **CATTLE:**

### **Initial Dose Via Drench:**

Administer 30cc (1 oz) per 100 lbs body weight. Continue this dose for 3 days for cattle experiencing problems.

### **Maintenance Dosage:**

Up to 500 lbs: Give 15cc (1/2 oz) per head, per day.

Over 500 lbs: Give 30cc (1 oz) per head, per day.

### **Initial Dose Top Dress:**

Apply 30cc (1 oz) per 100 lbs body weight per day for up to 3 days.

### **Maintenance Dosage:**

Up to 500 lbs: Apply 15cc (1/2 oz) per head, per day.

Over 500 lbs: Apply 30cc (1 oz) per head, per day.

### **Water Trough Treatment:**

Administer an **initial dose** of 60cc (2 oz) per head, per day for the first week, followed by a **maintenance dosage** of 30cc (1 oz) per head, weekly. Ensure the trough is placed in a shaded area for maximum efficiency.

## **SHEEP AND GOATS:**

### **Initial Dose Via Drench:**

Administer 20cc per 50 lbs body weight.

### **Maintenance Dosage:**

Give 10cc per head, per day via top dress or drench.

**Water Trough Treatment:** Use 30cc (1 oz) per 5 gallons of water.

## **SWINE:**

### **Initial Dose Oral:**

Administer 30cc (1 oz) per 50 lbs body weight.

### **Maintenance Dosage:**

Give 15cc (1/2 oz) per head, per day as a top dress with dry or slop feed.

### **Medicator Application:**

Apply at a rate of 1:128.

## **HORSES:**

### **Foals:**

#### **Initial Dose Via Drench:**

Administer 30cc (1 oz).

#### **Maintenance Dosage:**

Apply 30cc (1 oz) per day as a top dress.

#### **Mature Horses:**

##### **Initial Dose Via Drench:**

Administer 60cc (2 oz).

##### **Maintenance Dosage:**

Give 30cc (1 oz) per head, per day as a top dress.
