# 2-Year Installation Guarantee

This document warrants that should a defect in workmanship, related to the work completed by FenceUSA occur within 2 years of the project, FenceUSA will complete repairs within the original project's scope of work at no charge to the customer. This warranty does not cover intentional or accidental damage by any person, gate adjustments after two months past installation, or acts of God that may or may not merit an insurance claim. This warranty only applies to portions of the project in which FenceUSA fully replaced any existing products, and does not cover repairs or service done to another contractor's work. Defects in the building materials used to complete work do not fall under the scope of this workmanship warranty; any building products installed will instead be covered by the product's original manufacturer warranty.

"If within 2 years of your installation, a post begins to lean, or a rail needs an adjustment, we'll come out and fix your issue, free of charge.

I could only give this type of guarantee, if I knew that our install crews were the best in the business. We stand behind our work. I give this guarantee with confidence because I know our installation service is second to none."

## Positives:

1. If you're looking for privacy... Pressure Treated and Spruce Stockade are a cost-effective alternative to vinyl.
2. Nothing compares to the natural look and beauty of a wood fence.
3. All FenceUSA gate hardware is powder-coated.
4. All FenceUSA posts are Pressure Treated Pine.
5. Split rail wood fence contains Pressure Treated rails and posts.
5. All FenceUSA wood gates contain a cross brace for extra support.

## Drawbacks:

1. Wood fence material does not include a warranty, and because wood gates are heavy and a natural product, they may develop issues over time.
2. Wood will not last as long as vinyl. It'll need to be replaced due to natural rotting and decay.
3. Due to the nature of wood, the posts will warp, twist, and split over time.
4. The color fades to grey within a year. Stain and maintenance may be required to preserve the wood and keep its color.
