

Painful / Swollen Feet

When I met Amy in March (2023), she was in chronic pain.

Her feet and ankles were red and swollen. Her pain level was 8 out of 10 and the Dr.s didn't know what was causing it. Even the medication didn't help. Amy believes all this started shortly after she'd gotten vaccinated.

By using the AVACEN, Dry-heat medical device, Amy was able to reduce the inflammation by one whole size within just 7 days and completely eliminate the pain shortly there after.

She used the AVACEN 2-4x per day – 30 min/session. Pain was resolved in 3 days, swelling took longer.

Now that Amy has her life back, she's enjoying a 3 week cruise around the world with friends.
