Matt has done a great job reducing our ant problem. This has been an ongoing problem that we had been combating with Raid and ant traps for years but it really got bad this spring. Matt came out and did the initial spraying outside and inside the kitchen and has come back to make a second application. He is a pleasure to work with and I highly recommend Liberty Pest Inc.

Don't know what we would do without the excellent service this company provides at our lake home! Before contacting them our siding, deck and windows were a mess from spiders and other bugs. It was difficult to sit on our deck and enjoy it. It is an amazing difference since these folks have been treating our place. Great people!!! Great service!!! Great product!!

The response time was very quick! Got a call about their services and offerings while we were still exploring the website and they came out to spray our home the next day. Friendly and knowledgeable staff.
