DETERGENT

\$\$ MONEY SAVING RECIPE \$\$

INGREDIENTS:

4 CUPS - HOT TAP WATER

1 FELS-NAPTHA SOAP BAR GRATED

1 CUP - ARM & HAMMER SUPER WASHING SODA

1/2 CUP BORAX

~ OPTIONAL OILS ~

LAVENDER ESSENTIAL OIL

EQUIPMENT:

SAUCEPAN

GRATER

5-GALLON BUCKET

MIXING SPOON

IMMERSION BLENDER

USED LAUNDRY SOAP DISPENSER

INSTRUCTIONS:

GRATE THE SOAP (WE USE A CHEESE GRATER) AND PLACE INTO A SAUCEPAN. ADD 4 CUPS HOT WATER. HEAT OVER MEDIUM-LOW HEAT, STIRRING CONSTANTLY, UNTIL THE SOAP DISSOLVES COMPLETELY.

INTO A CLEAN 5-GALLON BUCKET, MEASURE OUT YOUR BORAX AND WASHING SODA. POUR YOUR HOT SOAP MIXTURE INTO THE 5-GALLON BUCKET AND STIR WELL TO DISSOLVE THE BORAX AND WASHING SODA. FILL THE BUCKET TO THE TOP WITH MORE HOT WATER, STIRRING WHILE YOU FILL. STIR, COVER, AND LET THE MIXTURE SIT OVERNIGHT TO THICKEN.

IN THE MORNING, STIR THE MIXTURE AGAIN. WE PREFER TO USE A LARGE IMMERSION BLENDER (SEE LINKS AT BOTTOM OF PDF FOR TOOLS). FILL A USED LAUNDRY SOAP DISPENSER HALFWAY WITH THE LIQUID SOAP, THEN TOP IT OFF WITH WATER. SHAKE WELL BEFORE EACH USE AS THE MIXTURE WILL GEL.

~OPTIONAL~

ONCE THE SOAP HAS COOLED, YOU CAN ADD ESSENTIAL OILS FOR SCENT
(25 DROPS PER 2 GALLONS).

YIELD: THIS RECIPE MAKES ABOUT 10 GALLONS OF LIQUID LAUNDRY SOAP ONCE DILUTED.

USAGE:

TOP LOAD WASHER:

USE ABOUT 3/4 CUP PER LOAD.

FRONT LOAD WASHER:

USE ABOUT 1/2 CUP PER LOAD.

IMPORTANT NOTES:

DO NOT USE BAKING SODA AS A SUBSTITUTE FOR
WASHING SODA.

DO NOT USE ARM & HAMMER LAUNDRY DETERGENT
AS A SUBSTITUTE FOR WASHING SODA. YOU NEED
SODIUM CARBONATE (WASHING SODA).

THIS RECIPE MAKES A LARGE QUANTITY OF LAUNDRY
SOAP. FEEL FREE TO HALF THE RECIPE! ENJOY!
