

# 3 GENERATIONS OF LIFEWAVE TECHNOLOGY

All LifeWave Products are FREE from drugs, chemicals and stimulants.

## LONGEVITY

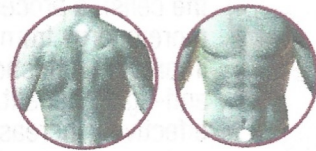

### LifeWave X39™

X39™ is a STEM CELL ACTIVATION patch elevating GHK-Cu peptides known to enhance stem cell activity and reset 3,000-4,000 genes to a younger and healthier state within 24 hours. Supports cellular repair, relief of minor aches and pains, wound healing, healthy inflammatory response, energy and better sleep.

### LifeWave X49™

X49™ elevates AHK-Cu peptides that promote performance, strength and stamina. Supports healthy cardiovascular system, focus, cognitive functions and faster recovery. Increase bone density and promotes lean muscle mass and fat loss. Acts as a Faraday cage to reduce cell phone radiation.

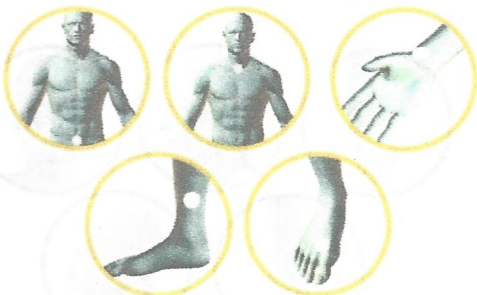

## ANTI-AGING

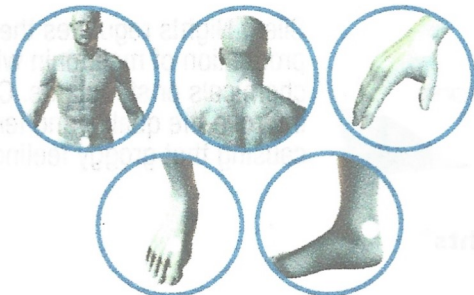

### Y-Age Glutathione

Glutathione is the body's master antioxidant and primary antioxidant for detoxification. It provides crucial immune system support. Glutathione patches are clinically proven to elevate glutathione level by 300% on average within 24 hrs.

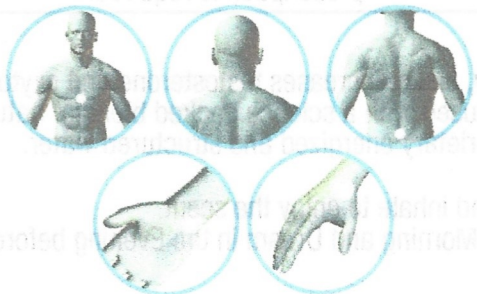

### Y-Age Aeon

Aeon reduces inflammation, cortisol, C-reactive proteins and stress. It elevates superoxide dismutase and balances autonomic nervous system and hormonal production. It is also known as the 'longevity' patch as Aeon activates the peptide in your body that is also found in Royal Jelly.

### Y-Age Carnosine

Carnosine protects neurological system, improves bioelectrical properties of organs and promotes overall health and wellness of the brain, heart and muscles. Improves cognitive functions, prevents mental decline and visual degeneration. Enhances athletic performance by enhancing strength, flexibility and stamina. This peptide protects your telomeres.

### ALAVIDA Regenerating Trio

Improves the health of your skin from the inside out. 98.6% naturally derived, plant-sourced ingredients. Alavida elevates Epithalamin peptide. This peptide is responsible for vibrant skin, reduces the appearance of fine lines and wrinkles, builds collagen, tightens skin, and evens out skin tone and discoloration. The peptide in Alavida lengthens telomeres which is an indication of longevity.
