

TEST REPORT IEC 60335-2-23

Part 1: Safety of household and similar electrical appliances

Part 2: Particular requirements for appliances for skin or hair care

 Date of issue
 2022-08-31

 Total number of pages
 94 pages

Name of Testing Laboratory Precise Testing & Certification (Guangdong) Co., Ltd.

preparing the Report....... Building 1, No. 6, Tongxin Road, Dongcheng Street, Dongguan,

Guangdong, China

Applicant's name...... Dongguan Shengming Industrial Co., Ltd.

Address Tiansheng Lake Industrial Park, Luoma Road, Luoma

Village, Qingxi Town, Dongguan City, Guangdong Province, China

Test specification:

Standard IEC 60335-2-23:2016, AMD1:2019 in conjunction with

IEC 60335-1:2010, COR1:2010, AMD1:2013, COR1:2014,

AMD2:2016, COR1:2016

Test procedure PTC

Non-standard test method.....: N/A

Test Report Form No.....: IEC60335_ 2 23L

Test Report Form(s) Originator: VDE Prüf- und Zertifizierungsinstitut GmbH

Master TRF...... Dated 2020-07-03

Hot air brush

Model: SM-5258

Input: $220-240V \sim 50/60Hz~900-1000W$ Dongguan Shengming Industrial Co., Ltd.

Remark:

- 1. As declared by the applicant, the importer (and manufacturer, if it is different)'s name, registered trade name or registered trademark and the postal address will be marked on the products before being place on the market. The contact details shall be in a language easily understood by end-users and market surveillance authorities.
- 2. Marking on the packaging or in a document accompanying the electrical equipment is only acceptable if it is not possible to place such markings on the product.
- 3. Height of "CE" symbol shall be at least 5mm. Height of "WEEE" Symbol shall be at least 7mm.
- 4. Labels of other models are identical with Label of model SM-5258 except for model name.

Test item particulars::	
Classification of installation and use:	Hand-held appliance for household indoor use
Supply Connection:	Non-detachable supply cord fitted with a plug
Possible test case verdicts:	
- test case does not apply to the test object::	N/A (0 (0 (0 (0 (0 (0 (0 (0 (0 (0 (0 (0 (0
- test object does meet the requirement:	P (Pass)
- test object does not meet the requirement::	F (Fail)

NOTE A Stuck-at fault model denotes a fault model representing an open circuit or a non-varying signal level. A DC fault model denotes a stuck-at fault model incorporating short circuit between signal lines.

e) Table R.1 is applied according to the requirements of R.1 to R.2.2.9 inclusive.

S	ANNEX S (NORMATIVE) BATTERY OPERATED APPLIANCES POWERED BY BATTERIES THAT ARE NON-RECHARGEABLE OR NOT RECHARGED IN THE APPLIANCE			
%° %°	The following modifications to this standard are applicable for battery-operated appliances where the batteries are either non-rechargeable (primary batteries), or		N/A	
%	rechargeable batteries (secondary batteries) that are not recharged in the appliance	10 10 10 10 10	N/A	
5.8.1	If the supply terminals for the connection of the battery have no indication of polarity, the more unfavourable polarity is applied	10 10 10 10 10 10	N/A	
5.S.101	Appliances intended for use with a battery box are tested with the battery box supplied with the appliance or with the battery box recommended in the instructions		N/A	
5.S.102	Appliances are tested as motor-operated appliances.	to to to to to	N/A	
7.1	Appliances marked with the battery voltage (V) and the polarity of the terminals, unless	to to to to to	N/A	
	the polarity is irrelevant	20 20 20 20 20 20	N/A	
6 6	Appliances also marked with:	5, 5, 5, 5, 5,	N/A	
Sic Sic	- name, trade mark or identification mark of the manufacturer or responsible vendor	to to to to to	N/A	
30 50	- model or type reference	40 40 40 40 40	N/A	
No No	- IP number according to degree of protection against ingress of water, other than IPX0	10 10 10 10 10	N/A	
.0 .0	- type reference of battery or batteries	.0000.	N/A	
40 40	If relevant, the positive terminal is indicated by the symbol IEC 60417-5005 and the negative terminal by the symbol IEC 60417-5006		N/A	

a) For fault/error assessment, some components are divided into their sub-functions. b) For each sub-function in the table, the Table R.2 measure will cover the software fault/error.

c) Where more than one measure is given for a sub-function, these are alternatives.

d) To be divided as necessary by the manufacturer into sub-functions.

6, 6,	IEC60335_2_23M ATTACHN	IENT () () ()	6, 6,
Clause	Requirement + Test	Result - Remark	Verdict
40 40 40 40	If the removal of the plug is foreseen, it is clearly indicated that the removal of the plug is such that an operator can check from any of the points to which he has access that the plug remains removed		N/A
	If this is not possible, due to the construction of the appliance or its installation, a disconnection with a locking system in the isolated position is provided	6 40 40 40 40	N/A
20.1	Appliances and their components and fittings have adequate mechanical stability during transportation, assembly, dismantling and any other action involving the appliance		N/A
20.2	Dangerous moving transmission parts safeguarded either by design or guards	6 40 40 40 40	N/A
Se Se	When guards are used, they are fixed guards, interlocking movable guards or protective devices	6 40 40 40 40	N/A
	Moving parts directly involved in the function of the made completely inaccessible fitted with:	appliance which cannot be	N/A
10 10	- fixed guards or interlocking movable guards preventing access to those sections of the parts that are not used in the work, and		N/A
Sic Sic	- adjustable guards restricting access to those sections of the moving parts where access is necessary		N/A
	Interlocking movable guards used where frequent access is required	6 40 40 40 40	N/A
21.1	Appliances and their components and fittings have adequate mechanical strength and is constructed to withstand such rough handling that may be expected in normal use, during transportation, assembly, dismantling, scrapping and any other action involving the appliance		N/A
22.ZE.1	For appliances provided with a seat, the seat gives adequate stability	6 40 40 40 40	N/A
30 30	The distance between the seat and the control devices capable of being adapted to the operator	6 80 80 80 80	N/A
22.ZE.2	For appliances provided with separate devices for the start and the stop functions, the stop function is unambiguously identifiable and does always override the start function		N/A
Sec Sic	For appliances provided with one device performing the start and the stop function, the stop function is unambiguously identifiable and does always override the start function	6 40 40 40 40	N/A

Page **11** of **14**
