Math Supplies for the School year

We want students to only have to purchase one calculator for their high school career, so we advise you to consider all of the courses you may take in high school. Students expecting to take Honors Trig/Precalculus, AP Calculus, and/or Honors Physics should purchase a TI-Nspire CX CAS now because it will be required for those courses later on. Students planning to take math through Algebra II, College Algebra, or AP Statistics should find that the TI-Nspire will meet their needs. The CAS calculator may be used on the SAT exam and on all AP exams (For the ACT, the CAS will work with a “Test” mode).

All Students at CSCS are REQUIRED to have either a Texas Instruments **TI-Nspire CX II** or **TI-Nspire CX II CAS** handheld device, depending on the math courses they plan to take during high school.
