Our goal is to make the process of selecting the ideal window easy. The possibilities are endless, and that's why we're here to help you cut through the clutter with five easy steps.

1 Discover Simonton Quality & Durability:

Built to last and recognized for quality, Simonton Reflections windows and doors are designed, manufactured and tested to deliver long-lasting performance for your home.

2 Choose Your Operating Style:

A wide variety of window and door styles provide functional options that are both appealing and innovative. Combine different styles for personalized design and enhanced curb appeal.

3 Learn About Your Glass Options:

The Reflections series features standard energy-efficient glass and offers high-performance glass options that deliver maximum efficiency, sound reduction, privacy, safety and security.

4 Select Your Design Options:

Choose from a portfolio of popular exterior colors, interior colors, rich woodgrain laminates and custom hardware finishes, to create a custom window design that fits your décor.

5 Choose Your Grille Profile and Pattern:

Highlight the architectural design of your home with an assortment of grille profiles in standard and custom patterns.

DISCOVER SIMONTON QUALITY & DURABILITY

Our standards are just as high as yours. Each Reflections® 5500 window and door represents an unparalleled attention to detail and craftsmanship for optimal performance. They're manufactured to the toughest standards in the industry and backed by more than 70 years of engineering and innovation to ensure that the products you put in your home are durable and hassle-free.

Innovation that Performs

Reflections 5500 windows and doors are precision engineered to open and close effortlessly for the life of the window, protect your home from the elements and provide interior comfort during any season.

Premium Vinyl Construction

Simonton first-generation vinyl uses the best raw materials for a durable, thermal efficient product that withstands harsh weather conditions. The color of the vinyl is integrated throughout, so the frame and sash are virtually maintenance-free and will never require painting like wood windows.

Custom Made for your Home

Reflections 5500 windows and doors are custom built to the exact size and specifications for your home renovation project to ensure proper installation and high performance.

AAMA Gold Certification

The AAMA Gold Label on Simonton built windows and doors verifies Reflections 5500 products are manufactured to the industry-leading AAMA Gold Certification Program. This quality assurance testing delivers durable, weather-resistant and energy-efficient products for your home. Learn more at simonton.com/aama-gold.

A Warranty Built to Match the Windows & Doors it Protects

The Reflections 5500 series features a Double-Lifetime Limited Warranty that covers vinyl, hardware, screens and glass units. The warranty is also transferable to the next homeowner for extended value. Find out more at simonton.com/lifetime-warranty.

Customer Testimonial:

"I would buy this product again and I did!"

I purchased the Reflections 5500 series 20 years ago, moved and immediately ordered the same line for our new home. Warranty claims are above reproach."

Colorado Homeowner

CHOOSE YOUR OPERATING STYLE

You can choose from a variety of window shapes and operating styles to complement any room in your home.

Whether you want a classic Double Hung or something more modern, Reflections 5500 is the right choice for you.

Double Hung

For a timeless look, the Double Hung is a popular choice for most home renovation projects. Both sash on Double Hung windows slide up and down vertically, and tilt in for easy cleaning from inside the home.

Slider

Slider windows glide horizontally from side to side. Available in a 2- or 3-lite configuration, 3-lite Sliders have a fixed center window with operable end vents. They are perfect for replacing large Picture windows to gain ventilation.

Picture

Offering an expansive, unhindered view, a Picture window is one of the most weather resistant styles available and are fixed – with no movable sash. They are ideal for large or small areas where daylight is desired.

Casement

Features a hinged sash that easily opens outward with a turn of a handle. Casements are the most energy-efficient style available, offering maximum ventilation and when opened fully can be cleaned from the interior.

Awning

Hinged at the top, the Awning window opens outward with a simple turn of a crank handle and can provide fresh air even when it's raining.

Geometric

Available in a variety of circular, arched and linear shapes, Geometric windows can provide a unique, customized look to any home. The architectural shapes highlight both contemporary and traditional homes.

Garden

The unique dimension of a Garden Window can bring a little bit of the outdoors in year-round and is the perfect place to showcase collectibles and plants, while side windows open for ventilation.

Bow

A Bow window adds unique style to your home with windows mulled at 10-degree angles in 3-, 4- or 5-unit designs, which creates a rounded, more circular appearance than a bay.

Bay

Add interior and exterior dimension with the addition of a Bay window. Available in either 30- or 45-degree angles, the dramatic look of a Bay creates a special nook and adds dimension to any room.

Patio Door

Redefine your living space with an Inovo® sliding patio door. Large glass door panels open up a room with more natural light and allow easy access to the outside with a lifetime of smooth operation.

Garden Door

Create an elegant entryway with the classic styling of a Garden Door. One or both door panels are available in center-hinge and French-hinge styles that swing in or out to accommodate your home.

Consider a unique configuration

The possibilities are virtually unlimited when you combine Reflections® 5500 windows and doors. Mulled configurations can create a beautiful wall of windows or a unique arrangement that will set your home apart.

Fixed casement over awning

Picture window flanked by double hung windows

2-lite slider topped with a picture window

Two casement windows with an eyebrow

LEARN ABOUT YOUR GLASS OPTIONS

For the ultimate in energy-saving efficiency, Simonton Reflections® 5500 windows and doors are designed to deliver thermal performance and a comfortable home through every season. By choosing Reflections 5500 you're not only helping to reduce your heating and cooling costs; you're also keeping outdoor elements in their place year round. Additional glass options enhance security, acoustics, privacy and fade protection.

A kitchen window with a wooden frame and a black faucet, looking out onto a snowy landscape. The window is part of a larger set of windows, and the view outside shows a snow-covered field with trees and a small building in the distance. The kitchen counter is white, and there are some green ceramic containers on it.

Customer Testimonial:

"Highly Recommend."

Our new Simonton Windows are amazing. The effect of the new windows was immediate. Not only is the temperature in my office and entire home considerably more comfortable and stable, we've already received compliments from our neighbors on the nice look."

Florida Homeowner

Energy Savings & Interior Comfort

The Reflections 5500 series has a standard 3/4" insulating glass unit, with ProSolar® Low-E glass and an Argon gas fill. Customize your glass package to optimize energy-efficiency, comfort and performance for your home and where you live.

IN WINTER,
LOW-E GLASS
HELPS RETAIN
WARMED AIR

IN SUMMER,
LOW-E GLASS
HELPS DEFLECT
HEAT

ProSolar Low-E Glass

- Standard glass helps keep warmth inside during winter months and deflect the sun's heat and retain cooled air in summer
- Screens out up to 73% of ultraviolet (UV) rays that can cause interior fading

ProSolar Shade Low-E Glass

- Ideal for warmer climates that require help with solar control and interior cooling
- Superior insulating performance

ProSolar Sun Low-E Glass

- Perfect for cooler climates that require more help with heating
- Uses the sun's warmth to increase comfort and reduce heating costs

Gas Fill

Standard Argon gas, which is six times denser than air, is sealed between the glass panes to increase insulation and reduce energy loss. Twelve times denser than air, optional Krypton gas can be chosen for maximum thermal efficiency.

Spacer Systems

The standard Intercept® spacer system has a U-channel design that keeps glass warmer and flexes and contracts for reduced seal failure. The Supercept™ spacer system utilizes a stainless-steel alloy that offers increased durability and thermal efficiency.

The non-metallic foam Super Spacer® is non-conductive and increases energy efficiency by helping provide an airtight seal.

Sound & Security

Laminated glass consists of a durable interlayer sealed between two layers of glass that resists forced entry, significantly diminishes unwanted sound and deflects up to 99% of damaging ultraviolet (UV) rays that can cause interior fading.

Triple Pane Glass

Optional 1" triple-pane insulating glass unit contains three panes of double-strength glass that create two separate air spaces in the I.G. unit for optimal energy performance and comfort.

Double-strength Glass

Thicker, double-strength glass is break-resistant and offers increased sound control.

Increased Privacy

Obscure glass has a textured pattern to maximize your privacy while still allowing natural light inside.

Tinted Glass

Help control solar heat gain, reduce glare and visibility into your home with bronze or gray tinted glass.

Safety Glass

Heat-strengthened tempered glass increases safety because it is harder to break through than regular glass and safely breaks into pebbles.

Select Reflections 5500 window styles with triple-pane glass have been recognized as Most Efficient by ENERGY STAR® in 2020. Visit simonton.com/most-efficient for info.

Customer Testimonial:

"A huge improvement in every way.

The new windows look beautiful, have already warmed up our house, and are so much easier to operate and keep clean."

Virginia Homeowner

Customer Testimonial:

"Excellent windows.

My 35 new Simonton windows did not disappoint! My house is quieter, warmer and these windows are so beautiful!"

Georgia Homeowner

Customer Testimonial:

"Amazing Quality."

We love our new windows! Our house is so quiet now and the quality of these windows is top notch."

North Carolina Homeowner

With Simonton, the Quality is in the Details

Each Reflections 5500 feature delivers superior performance and lasting durability.

A Perfect Match Beveled exterior design coordinates with any style of home.

B Durable Construction Fusion-welded construction bonds each corner together to create a rigid, one-piece frame that offers reliable strength and durability.

C Weatherability Our innovative Lap-Lok® meeting rail overlaps and interlocks the sash to create a tight seal that virtually eliminates air and water infiltration.

D Water Barrier Our exclusive triple-stepped, sloped Simonton Sill® forces water away from the window more quickly than flat, conventional sills to help protect your home from water infiltration, even in heavy rain.

E Trouble-free Cleaning Operable sash that tilt in and lift out allow you to clean both sides of the window from inside your home.

F Easy to Open A contoured lift rail is molded into the sash to provide lifetime durability.

G Dependable Performance A stainless steel constant force coil spring balance system, allows you to easily move the window sash to any desired position, even after years of use.

H Superior Security Dual, low-profile, color-matched cam locks secure the window tightly for peace of mind.

I Safety Latches Dual Air Loks™ allow for partial ventilation without opening the sash to its fullest extent.

Simonton offers regionally specific ENERGY STAR® glass packages designed to deliver optimal energy performance and comfort for all areas of the country. According to energystar.gov, ENERGY STAR certified windows can reduce energy bills by an average of 12 percent nationwide.*

*Ranges are based on the average savings among homes in modeled cities. Actual savings will vary based on local climate conditions, utility rates, and individual home characteristics.

Reflections

Bay & Bow

Featuring

Decorum®
BY SIMONTON

Get the peace of mind that comes with over **65 years of experience.**

Our Reflections® 5500 premium vinyl replacement windows and doors provide a wide variety of options to ensure that you can find the perfect custom styling solution for your home. With industry-leading energy efficiency, weather resistance and quality, they provide unsurpassed reliability over the long haul. And to top it off, each Reflections® 5500 window is custom built specifically for your home, delivered quickly and backed by our Double-Lifetime Limited Warranty.

Legendary Customer Satisfaction

Simonton was ranked "Highest in Customer Satisfaction with Windows and Doors, Two Years in a Row."

(Customer Satisfaction: 2010 and 2011)

Our goal is to make the process of selecting your ideal Bay or Bow window easy. The possibilities are endless, and that's why we're here to help you cut through the clutter and simplify the process with three easy steps.

1 Choose Your **Operating** Style:
Are you looking for a Bay or Bow window?

2 Choose Your **Style** Options:
Which exterior color, interior color or woodgrain, and custom hardware finish best complement your style?

3 Choose Your **Glass and Grid** Options:
What kind of look do you want to achieve?

Give your home the light it deserves.

Simonton Reflections® 5500 Bay and Bow windows allow you to add dimension and warm, natural light to any room. Each one is designed with structural integrity and energy efficiency in mind, so you can be confident that the window you install in your home will remain dependable for years to come.

Kelly's Style

After eight years in her home, Kelly has had enough of unpredictable utility bills and has decided to replace her old wood windows with vinyl. She has always wanted a Bow window to let more light into her living room, but she's worried that she won't be able to find a style that complements her home.

With Reflections 5500 and Decorum® design options, she can select a grid pattern that provides a level of detail that accentuates her home's unique architectural style. And each Reflections 5500 Bay window includes head and seat boards that are available in oak or birch veneer, or that can be painted or stained. The head and seat boards are also insulated to provide increased thermal efficiency, which can help to cut down her energy costs.

1 Choose your operating style.

So what's the difference between Bay and Bow windows? They're actually very similar in many ways, but the key difference is in the angles and in the way they open.

Bay windows are available with a 30-degree angle or a 45-degree angle, which creates a more dramatic appearance and adds dimension to any room. Bay windows feature either Double Hung or Casement windows on each side of a center Picture window.

Bow windows, available in a 3-, 4- or 5-lite design, always have a 10-degree angle, which creates a more rounded, circular look. Bow windows feature equal-sized Double Hung or Casement windows.

2 Choose your style options.

Decorum
BY SIMONTON

You can customize your Simonton Reflections 5500 Bay and Bow windows with Decorum®, a portfolio of popular exterior colors, interior colors, rich woodgrain laminates and custom hardware finishes.

Myth – Bay and Bow windows should only be installed in certain areas of a house.

Although Bay and Bow windows are most commonly used in kitchens or living rooms, they can also be used in master bedrooms or bathrooms, studies or almost any room where you would like to let in more light.

Interior and Exterior Colors – Standard

Interior Woodgrains – Custom

Exterior Colors – Custom

Hardware Finishes – Standard

Hardware Finishes – Premium

*Exterior colors are not available with a Driftwood interior

3 Choose your glass and grids.

From traditional to more contemporary, with Simonton Reflections 5500 you can choose from a variety of glass and grid options to create a look that will complement your home's style.

Optional energy-efficient glass packages are available with Advanced ProSolar® Shade Low E glass, Super Spacer®, an Argon or Krypton gas fill, triple-pane and 1-inch insulating glass units to help provide maximum comfort and energy savings.

When it comes to Simonton, the quality is in the details.

Reflections® 5500 Bay and Bow windows are engineered to provide superior protection against water and air infiltration, as well as unsurpassed energy efficiency and durability over time.

Efficiency You Can Count On

No matter where you live, our Reflections 5500 windows and doors can be ordered to meet

ENERGY STAR® guidelines for any region of the country. So, whether you live somewhere warm, somewhere cold or somewhere in the middle, our windows can help to make your home more energy efficient and comfortable.

The information contained is current at the time of printing. Changes to the product(s) may have been made since publication. Not all features available on all products in all areas of the country. Due to the limitations of the printing process, actual colors may vary from printed materials. Please see a sample of the product before making your final selection. Simonton Windows®, We make lasting impressions®, Reflections®, Decorum®, ProSolar® and the stylized "S" are registered trademarks of Simonton Building Products, Inc. Super Spacer® is a registered trademark of Edgetech I.G. Inc. Intercept® is a registered trademark of PPG Industries. ©2012 Simonton Building Products, Inc. Printed in U.S.A.

Simonton Windows received the highest numerical score among window and door manufacturers in the proprietary J.D. Power and Associates 2010-2011 Windows and Patio Doors Satisfaction Studies.™ 2011 study based on responses from 2,605 consumers measuring 11 brands and measures opinions of consumers who purchased new windows or patio doors in the previous 12 months. Proprietary study results are based on experiences and perceptions of consumers surveyed in March-April 2011. Your experiences may vary. Visit jdpower.com

Simonton windows and doors are tested to the advanced AAMA Gold Label Certification Program. The Gold Certification is AAMA's highest level of testing with windows and doors being tested for thermal performance as well as air, water and structural integrity. The standard AAMA silver label only requires thermal testing. Simonton's Product Development Center is an ATI-certified lab site that enables us to perform thorough, in-house structural and thermal testing. An AAMA gold label certifies that the units assembled on the production lines are using the same process and components as the unit that was tested. Only the AAMA Gold Label indicates that: The product underwent testing based on the stringent requirements of the ANSI/AAMA/NWWDA101/1.S.2 and AAMA/WDMA/CSA 101/1.S.2/A440-05 industry standards. Certification to AAMA506/conforms to requirements of ASTM E 1886 & 1996. These tests were performed at an independent AAMA-accredited testing laboratory. An Independent (third-party) Validator through two unannounced plant inspections each year has continuously monitored the product production for compliance.

Reflections

Vinyl Replacement **Garden Window**

Welcome the warmth of the afternoon sun.
Welcome a cool, comforting breeze.
Welcome the chance to relax, knowing your
cozy little nook is guaranteed for life.

Welcome the benefits of the Simonton Reflections® Garden Window into your home. This unique window features two easy-opening side casements and a standard glass shelf. Plus, it's engineered to resist moisture and air infiltration and keep your home more energy efficient. But beyond that, it's simply beautiful. The Simonton Reflections® Garden Window comes with a comprehensive lifetime limited warranty, ensuring that it will be a welcome sight in your home for years to come.

Welcome to a world of advanced engineering.

Designed for structural integrity

The Simonton Reflections® Garden Window is built to last. Through harsh winters. Rainy springs. And brutally hot summers. Features include:

- :: Fusion-welded frame and sash
- :: Snap-in sill cover to resist water penetration
- :: One-piece unit, assembled at the factory

Designed for thermal efficiency

The Simonton Reflections® Garden Window is designed to lower your energy bills.

- :: 1" double-strength insulating glass unit
- :: Multiple-chambered vinyl profiles
- :: Exterior-glazed insulating glass unit

Designed for beauty

Add a new dimension of style to your home.

- :: Available in custom sizes
- :: 1-1/4" Birch veneer seat board
- :: One 3/8" adjustable polished-edge tempered glass shelf

Designed for ease of use

Side casement windows can be opened and closed effort-

lessly, giving you the freedom to allow as much or as little air in as you want.

- :: Full-range sash movement
- :: Multi-point, single-lever locking system
- :: Integral screen track
- :: Rollformed screen frame with fiberglass screen mesh
- :: Dual weatherstripping
- :: Corrosion-resistant hardware*

Designed to suit you

The Simonton Reflections® Garden Window has a variety of options.

- :: Oak veneer or white pionite laminate seat board
- :: One additional glass shelf
- :: Colonial flat grids in white or tan (Centerlite only)
- :: Factory-installed seat board insulation
- :: ProSolar® soft coat Low E glass with an Argon gas fill works to reduce heat loss in winter while maintaining air-conditioned air in the summer

All this and a Simonton dealer nearby to help you, too.

SIMONTON®

WINDOWS & DOORS

Classic Beauty.
Advanced Performance.

Every detail makes a difference.

From the sophisticated profile to the innovative design, each feature of a Simonton Impressions® 9800 window is intended to enhance energy savings, hinder weather infiltration and keep your home comfortable during any season.

CLASSIC DESIGN

Frame and sash chambered design provides the look of traditional wood windows.

WELDED FRAME & SASH

Profiles are fused together to create a weathertight, one-piece unit.

SIMONTON SILL®

Exclusive triple-stepped, sloped design quickly moves water away from your home.

LAP-LOK® MEETING RAIL

Overlapping and interlocking meeting rail virtually eliminates air and water infiltration where the sash meet.

MULTIPLE-CHAMBERED PROFILES

Dead-air chambers inside vinyl profiles create small, airtight pockets for increased insulation.

DUAL FIN WEATHERSTRIPPING

Creates a weather-resistant seal around operable sash.

COIL SPRING BALANCE SYSTEM

Stainless Steel configuration ensures easy sash movement and supports the windows in any open position.

DUAL AIR LOKS™

Allows window to stay partially open for ventilation.

DENNY CLIP™ PIVOT SYSTEM

Unique pivot bar keeps operable sash in perfect alignment for smooth operation.

CURVED LIFT HANDLES

Hosting a gently curved design that enhances the wood window appearance.

DOUBLE-LIFETIME LIMITED WARRANTY

Simonton Impressions® windows and doors are backed by a **Double-Lifetime Limited Warranty** that covers vinyl, hardware, screens and glass units. In addition, Impressions products include a **Lifetime Glass Breakage Warranty**.

The right glass for your home.

DAMAGING
UV LIGHT

ProSolar Low-E Glass

- Standard glass helps keep warmth inside during winter months and deflect the sun's heat and retain cooled air in summer
- Screens out **up to 73%** of ultraviolet (UV) rays that can cause interior fading

ProSolar Shade Low-E Glass

- Ideal for **warmer climates** that require help with solar control and interior cooling
- Superior insulating performance

ProSolar Sun Low-E Glass

- Perfect for **cooler climates** that require more help with heating
- Uses the sun's warmth to increase comfort and reduce heating costs

Gas Fill

Standard **Argon** gas, which is six times denser than air, is sealed between the glass panes to increase insulation and reduce energy loss. Twelve times denser than air, optional **Krypton** gas can be chosen for maximum thermal efficiency.

Spacer Systems

The standard **Intercept®** spacer system has a U-channel design that keeps glass warmer and flexes and contracts for reduced seal failure. The **Supercept™** spacer system utilizes a stainless-steel alloy that offers increased durability and thermal efficiency.

The non-metallic foam **Super Spacer®** is non-conductive and increases energy efficiency by providing an airtight seal.

Maximum Comfort

Optional 1" triple-pane insulating glass unit contains 3 panes of double-strength glass that create two separate air spaces in the I.G. unit for optimal energy performance.

Sound Reducing Glass

Significantly diminish unwanted sound from entering your home with acoustic and laminated glass options.

Safety & Security

Laminated glass consists of 2 panes of glass adhered to a clear, puncture-resistant plastic interlayer that resists forced entry, reduces unwanted noise and deflects up to 99% of damaging ultraviolet (UV) rays.

ENERGY STAR® GLASS PACKAGES

Simonton Impressions® offers regionally specific glass packages for the Northern, North-Central, South-Central and Southern climate zones to meet ENERGY STAR® performance levels.

Options & Features

Brickmould Series

The best wood window just happens to be made of vinyl.

Brickmould Series 600 & 300

Tradition meets innovation.

When it comes to beauty, there's just nothing quite like wood. And when it comes to performance, there's nothing quite like vinyl. Until now. Simonton ProFinish® Brickmould vinyl windows and doors offer the best of both worlds. They combine the classic style and proportions of wood windows with the durability, thermal efficiency and ease of maintenance only vinyl is known for. ProFinish Brickmould provides the one thing you want in a window for your new home—everything.

The Brickmould 600 **Difference.**

◀ **Simulated Divided Lites** provide the appearance of separate panes of glass.

Available **light** or **dark woodgrain** interiors create a rich, warm appearance.

An optional **Flat Casing** surround simulates the look of a traditional wood window.

The Brickmould 600 series combines the beauty of wood with all the advantages of vinyl. From a richly detailed, multi-tiered profile, to a broad Flat Casing surround, their stance and stature suggest the classic appearance of a wood window. But unlike wood, Brickmould 600 vinyl windows will never require sanding or repainting to look beautiful for years to come. And the Brickmould 600 series is backed by a great warranty. This **Lifetime Limited Warranty** is transferrable to a subsequent homeowner, and covers the vinyl, hardware, screen and glass for your absolute peace of mind.

▲ Hardware cast in lustrous metal finishes allows you to complement your home's other fixtures.

▲ An entire line of window styles is available, including a classic **Double Hung**, **Geometrics** and **Patio Door**.

▲ A choice of **seven exterior colors** makes it easy to find the perfect accent for your home.

Classic styling meets progressive energy efficiency.

At Simonton, we take a very progressive approach to saving energy. It's about much more than saving money. Conserving natural resources, helping keep your energy costs affordable and making your home comfortable are all reasons why your windows and doors should be as energy-efficient as possible. That's why ProFinish Brickmould 600 windows and doors are designed for superior thermal performance.

What makes **Brickmould 600** windows and doors so energy-efficient?

Premium Vinyl Construction

The premium vinyl used to craft Brickmould 600 windows and doors is an excellent insulator. Its thermal properties are far superior to aluminum, steel and stainless steel. Multiple sealed air chambers in the profile provide increased insulation.

Advanced Spacer Systems

The **Intercept® Spacer System**, standard on Brickmould 600 windows and doors, features a unique U-channel design that minimizes condensation and keeps glass surfaces warmer for increased efficiency and comfort. The U-shape design flexes and contracts, helping to reduce seal failure in the insulating glass unit.

For even greater thermal performance and dependability, the optional **Supercept™** spacer combines a U-channel design with the strength of a stainless steel alloy.

As an ENERGY STAR® partner, Simonton Windows® understands that smart choices can help reduce heating and cooling costs and conserve energy. By choosing a regionally specific Simonton ENERGY STAR® glass package, you'll know you're getting optimal thermal performance wherever you live.

Low E Glass

ProSolar® Low E glass, with Argon gas is standard on Brickmould 600 windows.

In summer,
Low E
deflects heat.

In winter,
Low E helps
retain warmed air.

INSULATING GLASS UNIT

ProSolar® Shade is an advanced, spectrally selective glass that features a unique formula for maximum insulation. This impressive glass offers the ultimate in solar heat control, fading protection, visibility and energy savings.

Create your **Brickmould 600** window.

1 Select your **operating style**.

Anything is possible.

Simonton ProFinish® Brickmould 600 windows are the perfect way to realize the vision you have for your home. With Brickmould 600, you can select the style that will best complement your home and living spaces.

◀ This Casement configuration consists of six windows mullered together to create a focal point in this kitchen.

Virtually Unlimited Configurations.

Different Brickmould 600 operating styles can be mullered together for virtually unlimited configurations. Start with a Double Hung, the ultimate expression of classic style. Consider a breathtaking wall of windows. Maybe an exciting geometric shape will make the perfect accent. Whatever your vision, with Brickmould 600, anything is possible.

Two Double Hung windows mullered together with a Half-round picture window above.

A Double Hung mullered with a Half-round picture window above.

A Picture window mullered with two Double Hung windows.

A wall of Double Hung windows.

Three Casement windows mullered together.

The **Colonial Casement** features a faux meeting rail, so it provides the appearance of a Double Hung window, but it functions like a Casement window.

The optional **Flat Casing** surround suggests the appearance of a traditional wood window.

2 Select your **styling options**.

Dream in color.

When choosing windows for your dream home, why not dream in color? Decorum® by Simonton, available on Brickmould 600 series, is a portfolio of styling options that allows you to create a look that is distinctly yours. Choose from vibrant exterior colors, hardware cast in lustrous metal finishes and unique glass and grid options to give your home truly custom appeal.

Decorum®
BY SIMONTON

Custom Exterior Colors

Choose a color that complements your home's trim. Or, select a color that provides a striking contrast.

Brick

Bronze

Chocolate

Cream

Driftwood

Pine

Tan

▲ Flat casing trim can be ordered with the same or a complementary exterior coating as the window.

Custom Hardware Finishes

With Decorum metal hardware finishes, you can complement other fixtures in your home.

Brushed Nickel

Oil-rubbed Bronze

Polished Brass

Interior Colors

Light or dark woodgrain interiors provide a rich, warm appearance. A white interior is standard, while Driftwood and woodgrain are options.

**Exterior colors are not available with a Driftwood interior.*

3 Choose your **glass and grid options.**

The Finishing Touch.

The right grid design can really accentuate the architectural style of your home. Choose from flat or sculptured grids, or Simulated Divided Lites that provide the appearance of separate panes of glass. A host of grid patterns makes it easy to create a custom look.

Between-the-glass Grids

5/8" Flat

3/4" Sculptured

1" Sculptured

Brass

Simulated Divided Lites

Crafted of durable PVC, **Simulated Divided Lites** are located on the interior and exterior of the home and provide the appearance and dimension of individual panes of glass.

Brickmould 600 **Patio Door**

The Patio Door that lives up to our windows.

Now that you've selected the perfect windows, may we suggest the perfect patio door? The Brickmould 600 Patio Door was created to beautifully complement 600 series windows. The unmistakable multi-tiered profile, the brickmould design and Decorum® by Simonton color, hardware and grid options make it the ultimate patio door for your home.

Simulated Divided Lites

Crafted of durable PVC, **Simulated Divided Lites** are located on the interior and exterior of the home and provide the appearance and dimension of individual panes of glass.

Flat Casing

An optional **Flat Casing** surround provides a stately, elegant look.

Sliding Door Configurations

Expand your viewing area even more by adding **Side Lites** to the Brickmould 600 Patio Door.

An optional **Transom** window, mulled above the Brickmould 600 Patio Door, is the perfect way to allow in even more sunlight.

**Exterior colors are not available with a Driftwood interior.*

The **Brickmould 300** Series

The perfect balance of beauty and value.

Simonton ProFinish® Brickmould 300 series combines classic beauty, advanced features and solid value. A multi-tiered profile, available Flat Casing surround and optional Simulated Divided Lites provide a classic appearance, while premium vinyl construction requires virtually no maintenance. And Brickmould 300 windows are backed by an impressive warranty.

Comforting Energy Efficiency

Saving energy is more important than ever. That's why Brickmould 300 windows are designed to deliver impressive thermal performance all year long.

Brickmould 300 windows are crafted of **premium vinyl**, which is an excellent insulator. Sealed air pockets within the profile provide an effective thermal barrier.

ProFinish Brickmould 300 windows can be ordered to meet ENERGY STAR® guidelines. Select a regionally specific Simonton ENERGY STAR® glass package, designed to provide maximum efficiency and comfort in all regions of the country.

Warm Edge Technology

Standard on Brickmould 300 windows is the **Intercept® Spacer System**, featuring a U-channel design that minimizes condensation and keeps glass surfaces warmer for improved thermal efficiency.

For maximum energy efficiency and dependability, Brickmould 300 windows are available with the **Supercept™** spacer, which combines a U-channel design with the strength of a stainless steel alloy.

Low E Glass

ProSolar® Low E glass with Argon gas is optional on Brickmould 300 windows.

INSULATING GLASS UNIT

ProSolar® Shade is an advanced, spectrally selective glass that features a unique formula for maximum insulation. This impressive glass offers the ultimate in solar heat control, fading protection, visibility and energy savings.

Create your **Brickmould 300** window.

1 Select your **operating style**.

Which style are you?

Brickmould 300 windows allow you to choose the styles that will complement your home and lifestyle perfectly. Whether it's the elegant simplicity of a Single Hung, the functionality of a 3-lite Slider or the flair of a Geometric window, you'll appreciate the freedom of choice Simonton provides.

Narrow Frame Patio Door

 Ply Gem®

SIMONTON®

WINDOWS & DOORS

Illuminate a new
way of living.

Beauty that lasts.

Durable, energy-efficient and dependable, the attractive slim frame design of the Simonton Narrow Frame Patio Door opens a room and transforms your home with natural light.

AWARD WINNING LEGACY

For over 70 years, Simonton's lasting commitment to quality and product excellence has built an award-winning legacy and customer satisfaction. Learn more at simonton.com/awards.

LIFETIME LIMITED WARRANTY

Lifetime Limited Warranty on vinyl with additional coverage on glass, screens and hardware that is transferable to the next homeowner*. Learn more at simonton.com/lifetime-warranty.

AAMA GOLD CERTIFICATION

Every Simonton built Narrow Frame Patio Door is AAMA Gold certified, passing the industry's toughest standards. This quality assurance testing delivers durable, weather-resistant and energy-efficient products for your home. Learn more at simonton.com/aama-gold.

*Coverage varies on options selected.

Enjoy the view. Love the performance.

Designed to shield your home from the elements, the Narrow Frame Patio Door is made of virtually maintenance-free vinyl and provides a lifetime of easy-glide operation, energy efficiency and interior comfort.

Weather Resistant

Integral interlock and perimeter fin seal weatherstripping creates a tight barrier against air infiltration.

Energy-Efficient Glass

Standard ¾" insulating glass unit, ProSolar® Low-E glass, Intercept® spacer system and an Argon gas fill work together for energy savings and comfort during every season.

Strong & Quiet

Durable double-strength, tempered glass increases safety and reduces sound transmission.

Quality Construction

Fusion-welded frame and panels increase strength and add protection against air and water infiltration.

Durable Design

Low rise pocket sill offers superior structural performance

Safe & Secure

A single point lock handle and external keyed lock secure the door panel.

Custom Look

Transoms and sidelites are available for a dramatic appearance.

Smooth Operation

Adjustable, corrosion-resistant rollers allow door panels to easily open and close for the life of the door.

Increased Safety

Upgrade to a multi-point locking system or select a footbolt that allows partial ventilation while the door is secure.

Fresh Air

A durable extruded screen frame features a crease-resistant fiberglass screen mesh that helps keep bugs out.

Flexible Installation

Multiple frame options deliver precise installation for either replacement or new home applications.

HELPS DEFLECT
HEAT

ProSolar Low-E Glass

- Standard glass helps keep warmth inside during winter months and deflect the sun's heat and retain cooled air in summer
- Screens out up to 73% of ultraviolet (UV) rays that can cause interior fading

ProSolar Shade Low-E Glass

- Ideal for **warmer climates** that require help with solar control and interior cooling
- Superior insulating performance

ProSolar Sun Low-E Glass

- Perfect for **cooler climates** that require more help with heating
- Uses the sun's warmth to increase comfort and reduce heating costs

Gas Fill

Standard Argon gas, which is six times denser than air, is sealed between the glass panes to increase insulation and reduce energy loss. Twelve times denser than air, optional Krypton gas can be chosen for maximum thermal efficiency.

Spacer Systems

The standard **Intercept®** spacer system has a U-channel design that keeps glass warmer and flexes and contracts for to reduce seal failure.

The **Supercept™** spacer system utilizes a stainless-steel alloy that offers increased durability and thermal efficiency.

Sound & Security

Laminated glass consists of a durable interlayer sealed between two layers of glass that resists forced entry, reduces unwanted noise and deflects up to 99% of damaging ultraviolet (UV) rays that can cause interior fading.

Storm Protection

SafePoint® glass helps withstand extremely high winds and flying debris in areas requiring Level C impact-resistance providing 24/7 protection.

Increase Privacy

The textured pattern of obscure glass helps maximize privacy while allowing desirable sunlight inside.

Tinted Glass

Help control solar heat gain, reduce glare and visibility into your home with bronze or gray tinted glass.

Simonton offers **regionally specific ENERGY STAR®** glass packages designed to deliver optimal energy performance and comfort for all areas of the country.

SIMONTON[®]

WINDOWS & DOORS

Impressive in Every Detail.

Innovative craftsmanship.

The advanced features of the Simonton® Inovo® sliding patio door delivers a high-performance gateway that beautifully connects your home and outdoor living spaces.

AWARD-WINNING LEGACY

For over 70 years, Simonton's lasting commitment to quality and product excellence has built an award-winning legacy and customer satisfaction. Learn more at simonton.com/awards.

LIFETIME LIMITED WARRANTY

Simonton Inovo patio doors are backed by a Double-Lifetime Limited Warranty that covers vinyl, hardware, screens and glass units. Learn more at simonton.com/lifetime-warranty.

AAMA GOLD CERTIFICATION

Every Simonton-built Inovo patio door is AAMA® Gold certified, passing the industry's toughest standards. This quality assurance testing delivers durable, weather-resistant and energy-efficient products for your home. Learn more at simonton.com/aama-gold.

Industry-leading Design.

Experience the superior functionality and enhanced performance of the Inovo sliding patio door. Durable, weather resistant and energy efficient, you'll enjoy the beauty of its benefits day after day.

Top-Hung Screen

Unique top-hung screen system has a sturdy, 3-inch thick frame that glides smoothly across an unobstructed track.

Durable Construction

Fusion-welded frame and door panels increase strength, durability and weather resistance.

Strong & Quiet

Durable double or triple-strength, tempered glass increases safety and reduces unwanted sound.

Smooth Operation

An elevated monorail track system provides a smooth, rattle-free glide that will endure a lifetime of everyday use and helps eliminate air and water infiltration.

Safe & Secure

A multi-point locking system and external keyed lock tightly secure the door panel.

Thermal Efficiency

Multi-chambered profiles in the frame and panel increase insulation while the vinyl is virtually maintenance free.

Weatherability

Integral interlock runs the full length of the door panel and ensures a tight seal against air infiltration.

Water Barrier

Welded sloped sill quickly moves water away from your home and features a durable fiberglass sill overlay in a blended neutral color that helps mask dirt.

Choices that make a Difference.

The Simonton Inovo Patio Door offers a variety of beneficial options that will enhance your home and increase peace of mind.

Blinds Between Glass

Blinds sealed between the glass panels of the door offer a maintenance-free option to control the amount of light you let in with less worry about damaging the blinds over time. Blinds can be tilted, raised and lowered for maximum control.

Triple-point Locking System

The triple-point locking system secures the sliding panel at three locations for optimized strength and security. The standard multi-point lock system utilizes two points of lock engagement.

Shootbolt

Shootbolt lever engages a bolt into the door head for added security. Includes venting feature to allow fresh air in while latched.

Footbolt

Footbolt attaches to the bottom of the sliding panel and frame for greater security. Includes venting feature to allow fresh air in while latched.

Screen Options

High-durability Screen

Tough screen mesh increases the strength of your screen for greater durability, perfect for homes with children and pets.

High-visibility Screen

Narrow screen mesh creates a lower-profile look for an enhanced view.

Energy Savings. Interior Comfort.

The Simonton Inovo Patio Door has a standard 1" dual-pane insulating glass unit with ProSolar® Low-E glass, Argon gas and a Supercept™ spacer. Customize your glass options for maximum energy efficiency, sound control, security and privacy.

Gas Fill

Standard Argon gas, which is six times denser than air, is sealed between the glass panes to increase insulation and reduce energy loss. Twelve times denser than air, optional Krypton gas can be chosen for maximum thermal efficiency.

Spacer Systems

The standard Supercept™ spacer has a U-channel design that keeps glass warmer and flexes and contracts to reduce seal failure. Made of a stainless-steel alloy that offers increased durability and thermal efficiency.

The non-metallic foam Super Spacer® is non-conductive and increases energy efficiency by helping provide an airtight seal.

Sound & Security

Laminated glass consists of a durable interlayer sealed between two layers of glass that resists forced entry, reduces unwanted noise and deflects up to 99% of damaging ultraviolet (UV) rays that can cause interior fading.

Triple Pane Glass

Optional triple-pane insulating glass unit has three double-strength glass panes to create two separate air spaces for maximum thermal performance and comfort.

Increased Privacy

Obscure glass has a textured pattern to maximize your privacy while still allowing natural light inside.

Tinted Glass

Help control solar heat gain, reduce glare and visibility into your home with bronze or gray tinted glass.

Simonton offers regionally specific ENERGY STAR® glass packages designed to deliver optimal energy performance and comfort for all areas of the country.

Create a Custom Look.
