

# Full Stack AI Driven Data Analytics program

**COURSE CURRICULUM**

# Learning Roadmap

- 
- 1** — Data Foundations & Ecosystem
  - 2** — Advanced Excel for Analytics
  - 3** — Database Management & SQL
  - 4** — Python Programming (Beginner → Intermediate)
  - 5** — Pandas, NumPy & ETL Pipelines
  - 6** — Data Visualization (Matplotlib, Seaborn, Plotly)
  - 7** — BI Dashboards (Tableau / Power BI)
  - 8** — Statistics, Math & Probability
  - 9** — Applied Machine Learning
  - 10** — Neural Networks & Deep Learning
  - 11** — Transformers & Modern DL Architectures
  - 12** — Generative AI & Prompt Engineering
  - 13** — LLM Fine-Tuning (LoRA, QLoRA, PEFT)
  - 14** — LangChain, RAG & Vector Databases
  - 15** — Big Data with PySpark
  - 16** — API Development & Full-Stack AI Apps
  - 17** — Docker, CI/CD & Deployment
  - 18** — Capstone Project + Demo Day + Career Prep

# The Big Picture

The **Full Stack AI-Driven Data Analytics Bootcamp** by **Transfotech Academy** is built to transform beginners into job-ready Data & AI professionals.

You will learn the complete data lifecycle, from raw data collection to ML modeling, GenAI workflows, deployment, and full-stack analytics engineering.

Through hands-on labs, real datasets, interactive BI dashboards, machine learning systems, and end-to-end AI app development, you will gain practical experience that employers demand.

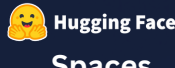

## Career Paths You Can Pursue

- Data Analyst
- Business Intelligence (BI) Analyst
- Machine Learning (ML) Analyst
- Entry-Level Data Scientist
- AI Data Engineer
- RAG Pipeline Developer
- Full-Stack Analytics Engineer

# Course Insights

- **Duration:** 5 Months
- **Live Classes:** 40 Sessions
- **Mode:** Instructor-Led + Hands-On Labs
- **Assignments:** Weekly, with real datasets
- **Capstone:** AI-Driven Data Project
- **Career Support:** Resume, GitHub, LinkedIn, Interview Prep
- **Tools Used:** Python, SQL, Tableau, Power BI, sklearn, TensorFlow, PyTorch, Hugging Face, LangChain, Docker, PySpark, FAISS, and more

# Skills & Tools Mastery

Category	Skills & Tools
Programming & Data	 EXCEL  SQL  python™  pandas  NumPy
Visualization & BI	 Matplotlib  seaborn  plotly  + a b l e a u  Power BI
Machine Learning & Deep Learning	 Scikit-Learn  TensorFlow  Keras  PyTorch
Generative AI & LLMs	 GPT-4  Claude  Gemini  Mistral  LLaMA  Prompt Engineering  LoRa  QLoRA  PEFT
Prompt Evaluation Tools	 LangChain  Promptfoo  ragas  EvalLM
App Development & Deployment	 Flask  gradio  Streamlit  docker  Render  Hugging Face Spaces
Big Data & Vector Databases	 PySpark  FAISS  Chroma  Weaviate  Pinecone
Multimodal AI	 Whisper  Stable Diffusion  bark  TTS APIs

# CHAPTER 1: Data Foundations & Analytics Ecosystem

(Sessions 1–8)

**Goal:** Build foundational skills in data ecosystems, pipelines, and analytical tools.

## Session 1: Data Foundations & Data Ecosystem

- What is a Data Ecosystem & Pipeline
- Data Types & Storytelling
- Advanced Excel (XLOOKUP, INDEX/MATCH, SUMIFS)
- Pivot Tables & Exploratory Charts
- Data Cleaning Fundamentals

**Lab:** Preprocess a real dataset using Excel

**Assignment:** Clean and wrangle a second dataset

## Session 2: Database Management & SQL

- RDBMS, PostgreSQL/MySQL
- ER Diagrams, Data Modeling
- SQL for Analytics (Joins, CTEs, Window Functions)

**Lab:** Create relational tables; analytical queries

**Assignment:** Build & query a sales database

## Session 3: Python Basics I

- What is AI?
- Setting up Python (Colab, VS Code)
- Syntax, Variables, Operators, Strings

**Lab:** “Hello AI World” + Calculator

**Assignment:** Personal Budget Calculator

## Session 4: Python Basics II

- Loops, Conditionals, Functions
- Lists, Sets, Tuples, Dictionaries
- JSON handling

**Lab:** AI Decision Maker App

**Assignment:** Quiz Program + Movie Aggregator

## Session 5: Pandas, NumPy & ETL Pipelines

- NumPy Arrays & Matrix Ops
- DataFrames, Merging, Cleaning
- Connecting Python to SQL
- ETL/ELT Fundamentals

**Lab:** Explore Sales Dataset

**Assignment:** Customer Insights Dashboard

## Session 6: Data Visualization

- Matplotlib, Seaborn, Plotly
- Visual Storytelling Techniques

**Lab:** Product Sales Trend Visualization

**Assignment:** Data Story Notebook

## Session 7: Tableau / Power BI

- Connecting Data
- Interactive Dashboards
- **Parameters, Drill-Downs**

**Lab:** BI Dashboard Build

**Assignment:** E-commerce Performance Report

## Session 8: Statistics & Probability

- Linear Algebra for ML
- Variance, Standard Deviation
- Probability Distributions
- Covariance & Correlation

**Lab:** Regression visualization & correlation map

**Assignment:** Gradient Descent Demo + Dataset Analysis

# CHAPTER 2: Machine Learning & Deep Learning

(Sessions 9–16)

**Goal:** Build predictive models, understand neural networks, and learn advanced DL architecture.

## Session 9: Introduction to Machine Learning

- ML Types: Supervised, Unsupervised, RL
- ML Pipeline

**Lab:** Titanic Classifier

**Assignment:** ML Survival Prediction

## Session 10: Regression Models

- Linear, Multiple Regression
- MSE, RMSE,  $R^2$  Metrics

**Lab:** Housing Price Prediction

**Assignment:** Regression Project

## Session 11: Classification Models

- Logistic Regression, Trees, Random Forest
- Precision, Recall, F1
- Train-Test Split, Cross-Validation

**Lab:** Customer Churn Model

**Assignment:** Model Comparison

## Session 12: Clustering & Unsupervised Learning

- K-Means
- Hierarchical Clustering
- PCA

**Lab:** Customer Segmentation

**Assignment:** Market Segmentation Report

## Session 13: Neural Networks

- Neurons, Perceptrons
- Activation Functions
- Backpropagation

**Lab:** NN with NumPy

**Assignment:** Visualize 2-Layer Network

## Session 14: Deep Learning with TensorFlow & Keras

- Model Building
- CNN Image Classification

**Lab:** MNIST CNN

**Assignment:** CNN Analysis

## Session 15: PyTorch for Deep Learning

- Tensors, DataLoader
- Training Loop

**Lab:** Binary Classifier

**Assignment:** Convert Keras Model to PyTorch

## Session 16: Advanced Architectures (CNNs, RNNs, Transformers)

- CNNs for Vision
- RNNs for NLP/Time Series
- Intro to Transformers

**Lab:** LSTM vs Transformer

**Assignment:** Architecture Comparison

# CHAPTER 3: Generative AI & LLM Systems

(Sessions 17–26)

**Goal:** Master prompt engineering, LLM workflows, evaluation, and model adaptation.

## Session 17: Generative AI Landscape

- GPT, Claude, Mistral, LLaMA
- Industry Use Cases

**Lab:** Compare LLM Outputs

**Assignment:** AI Across Industries

## Session 18: Prompt Engineering Fundamentals

- Prompt Patterns: CoT, ReAct, Persona
- Role + Context + Instructions

**Lab:** Business & Coding Prompts

**Assignment:** Fix Poor Prompts

## Session 19: Prompt Optimization

- Zero/Few-Shot
- Chain-of-Thought
- Self-Refinement

**Lab:** CoT for Complex Reasoning

**Assignment:** Prompt Strategy Report

## Session 20: Prompt Evaluation

- Metrics: Accuracy, Bias, Hallucination
- Tools: Promptfoo, Ragas, EvalLM

**Lab:** A/B Evaluation

**Assignment:** Prompt Evaluation Dashboard

## Session 21: Fine-Tuning & PEFT

- Fine-Tuning vs Prompt-Tuning
- LoRA, QLoRA, PEFT Frameworks

**Lab:** Fine-Tune GPT-2 on Custom Text

**Assignment:** Build Support Chatbot

## Session 22: Hugging Face Workflows

- Pipelines: Text Gen, Summarization
- Model Deployment

**Lab:** Summarizer Tool

**Assignment:** Explore 3 Models

## Session 23: Multimodal AI

- Whisper, Bark, Stable Diffusion
- Audio + Text + Image Workflows

**Lab:** Voice-Controlled Chatbot

**Assignment:** Multimodal App Idea

## Session 24: Responsible AI

- Ethics, Bias, Transparency
- Copyright & Safety

**Lab:** Identify Harmful Outputs

**Assignment:** Ethical AI Guidelines

## Session 25–26: Applied GenAI Workshop

- Multi-Model Integration
- Prompt Chaining
- LLM APIs

**Lab:** Multi-Agent AI Assistant

**Assignment:** Portfolio Prompt Pack

# CHAPTER 4: Full-Stack AI App Development

(Sessions 27–40)

**Goal:** Build & deploy complete end-to-end AI applications with modern tools.

## Session 27–28: MLOps & Deployment

- Docker Basics
- CI/CD
- Hugging Face Spaces / Render Deployment

**Lab:** Containerize App

**Assignment:** Deployment + README

## Session 29: APIs & Gradio

- Flask APIs
- REST Endpoints
- Gradio UI Prototyping

**Lab:** REST API + Gradio Interface

**Assignment:** API Documentation

## Session 30: LangChain & RAG

- Chains, Tools, Memory
- RAG Architecture

**Lab:** RAG Study Assistant

**Assignment:** Custom RAG Pipeline

## Session 31–32: Big Data & Vector Databases

- PySpark Basics
- Data Lake vs Warehouse
- Parquet/ORC Formats
- FAISS, Chroma, Weaviate

**Lab:** Document Q&A Bot

**Assignment:** Retriever Demo

## Session 33–34: Full-Stack Integration

- Frontend + Backend + Model
- Session Memory
- Logging & Error Handling

**Lab:** Fully Integrated AI App

**Assignment:** MVP on GitHub

## Session 35–40: Capstone & Career Prep

- End-to-End Capstone Build
- Data → ML → Deployment Pipeline
- Demo Day Presentation
- Resume + GitHub + LinkedIn Prep
- Interview Guidance

**Final Deliverable:**

**A Portfolio-Ready Full-Stack AI Application**

# Who Are We?

**Transfotech Academy** is a leading IT training institute with over **12 years** of experience in preparing students for successful careers in the tech industry. As an **E-Verified** organization recognized by USCIS, we specialize in job-ready, industry-aligned training programs supported by lifetime career guidance. Founded by **Sheikh Galib Rahman**, Transfotech Academy operates as a core entity of **Shera International Group**, a U.S.-based education and technology organization.

Over the years, **we have trained more than 3,000 students, with over 60% successfully placed into competitive job roles across the United States and beyond.** Our programs are designed to meet both current market demands and future workforce needs, equipping students with hands-on experience, real-world projects, and mentorship from certified professionals. We are also affiliated with several accredited universities in the United States, expanding academic and career pathways for our learners.

With physical **offices located in New York and Los Angeles**, Transfotech Academy stands as a trusted bridge between education and employment—providing a robust foundation for students to thrive in today's rapidly evolving tech landscape.

**Sheikh Galib Rahman**

Founder & CEO

**Fayek Chowdhury**

Data Analyst | Technical Lead |  
SQL & Python | Data Quality &  
Automation | Analytics &  
Process Improvement

**Fuad Bin Saif**

Data Analyst, 6+ years  
experience in Data Analytics  
& Machine Learning

# Why Choose Transfotech?

Data is transforming every industry, shaping how businesses operate, innovate, and make smarter decisions. Our *Full Stack AI Driven Data Analytics program* is designed to give you the complete skill set needed to thrive in this data-driven world, even if you are starting with no technical background. You will learn industry-standard tools to collect, clean, analyze, and visualize real datasets. At *Transfotech Academy*, we prepare professionals to lead with data. Now it is your turn to build real analytical impact for businesses and your career.

This is not just a course. It is your entry point into a data-powered future.

Our *Full Stack AI Driven Data Analytics program* gives you practical experience with real datasets, dashboards, and analytical tools used by top companies.

From cleaning and analyzing data to presenting insights that drive decisions, you will gain the skills employers value most.

Start today and build the data-driven career you deserve.
