

SAMPLE REPORT

# VoiceWise

## **COMPREHENSIVE**

## BIOMETRY REPORT

# Executive Summary

This report harnesses the power of advanced voice-analysis technology to detect dysfunction within the human body. **We run over 1,100 biometric data points** through our computational blueprint in order to conclude the percentage of health for the 5 pillars of health, each organ, and each system. Additionally, the report determines aspects to pay attention to, along with where the cause of imbalance is stemming from and whether it is more from physical or emotional factors.

## Disclaimer

*This report is not intended to diagnose. It is a snapshot of patterns occurring in your body's energetic field at the moment in time when the voice analysis is conducted. The goal of this report is to educate and empower practitioners and individuals on ways to understand health differently.*

# Report Key

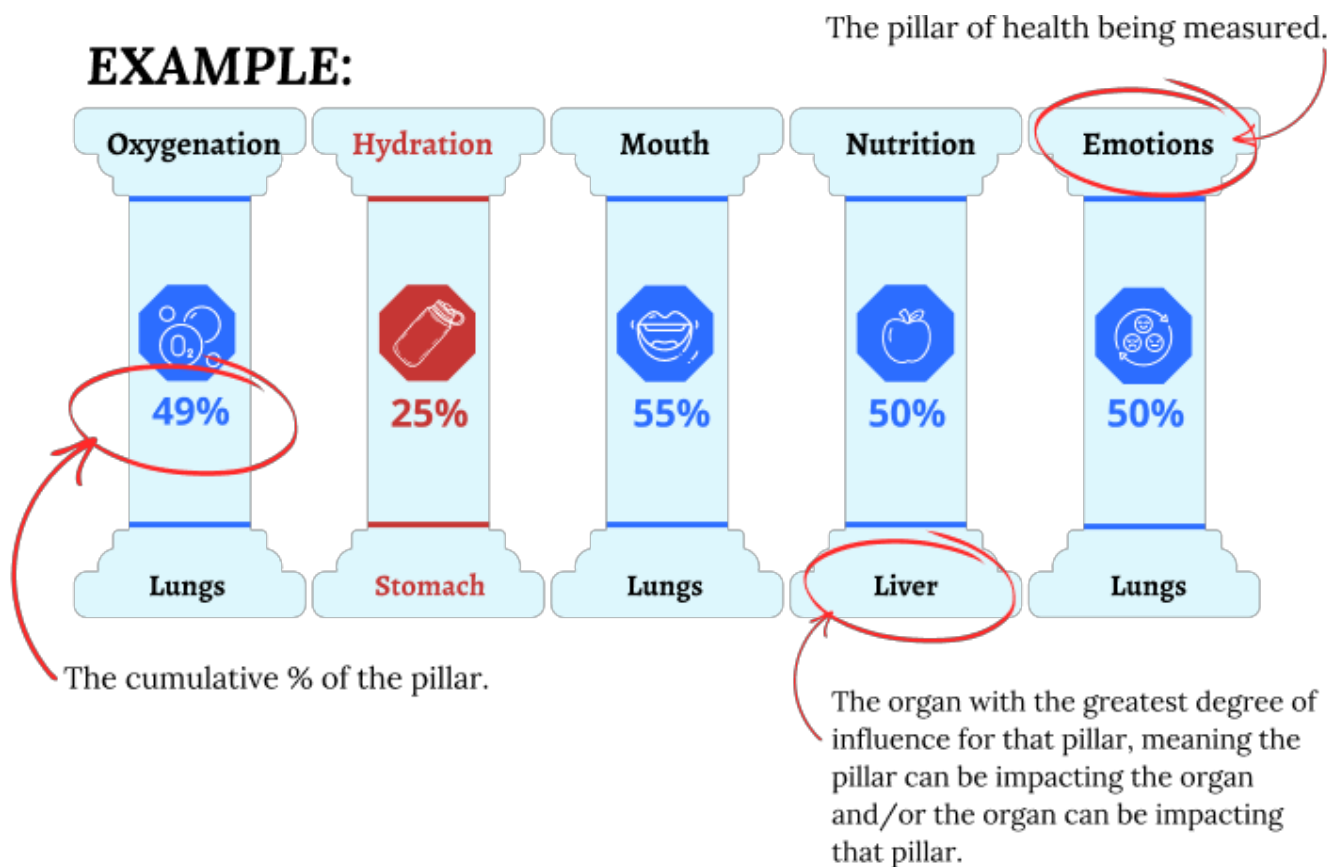

## HEALTH PERCENTAGES (%)

For purposes of this report, **50%+ is good**, so the **items below 50% are the ones to focus on supporting**.

## PILLARS OF HEALTH:

The pillar highlighted in **RED** is the one **with the lowest cumulative % score based on your voice results**. This report measures 5 Pillars of Health.

### EXAMPLE:

# Report Key (cont.)

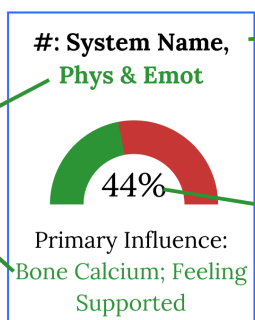

## SYSTEMS OF HEALTH:

This report highlights the 2 SYSTEMS with the lowest cumulative % for you, out of the 10 total Systems measured.

This indicates if the underlying imbalance of the System is primarily **Physical** or **Emotional** and what associated primary influence is contributing most to this imbalance.

### EXAMPLE

This indicates the system (out of 10) to support.

This is the cumulative score comprised of 4 Physical and 4 Emotional factors (listed below).

### 10 SYSTEMS MEASURED

1. Circulatory
2. Digestive
3. Hormone
4. Immune
5. Lymphatic

6. Musculo-Skeletal
7. Nervous
8. pH Environment
9. Respiratory
10. Skin, Hair, & Nails

#### Physical Factors Measured:

- **Molecular:** Refers to cellular imbalances.
- **Biomaterial:** Refers to bodily fluids, specifically blood and lymph.
- **Organ:** Refers to the function of the organ itself.
- **Systemic:** Refers to the organ's function within its designated system. For example, considering the Stomach within the context of the Digestive System.

#### Emotional Factors Measured:

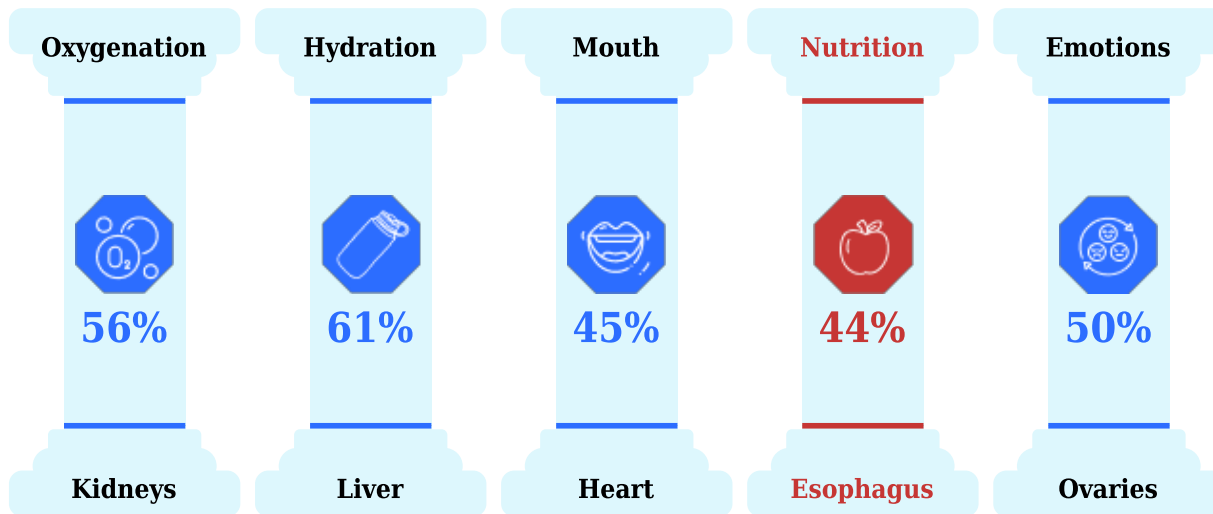

- **Intellectual:** Refers to repetitive thought patterns.
- **Emotional:** Refers to emotional reactions and triggers.
- **Behavioral:** Refers to repeated daily habits or behaviors.
- **Spiritual:** Refers to a person's sense of purpose and connection to something greater.

# Results

## PILLARS OF HEALTH:

The Pillar of Health you need to support most right now is **Nutrition**, which is impacting the **Esophagus**. This can potentially demonstrate the esophagus' role in transporting food from the mouth to the stomach, facilitating the beginning of the digestive process. Proper nutrition supports esophageal health by preventing acid reflux and irritation, which can occur when acidic or poorly digested food is regurgitated. If you also see patterns involving stomach function or acid regulation, it may suggest a broader issue with how nutritional intake influences esophageal health and overall digestive efficiency.

### Additional Education Based On Associated Organs For Each Pillar

How Oxygenation impacts the Kidneys - [Click Here](#)

How Hydration impacts the Liver - [Click Here](#)

How Mouth impacts the Heart - [Click Here](#)

How Emotions impacts the Ovaries - [Click Here](#)

# SYSTEMS OF HEALTH:

## Top Priorities

### 1: Skin, Hair, & Nails System,

**Emot**

Primary Influence:

Skin Health; Feeling Confidence

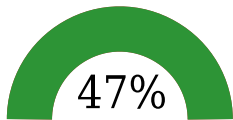

### Other Associations:

The **Sweat Glands & Skin Immune Defense and Barrier Function** also appear to be contributing to a **Skin, Hair, & Nails System Imbalance** that is being primarily influenced by **Emotional** factors.

[Click Here](#) to Review Primary Influence Information

### 2: Musculo-Skeletal System,

**Phys & Emot**

Primary Influence:

Muscle Strength; Empower Action

### Other Associations:

The **Tendons & Muscle Fiber Strength** also appear to be contributing to a **Musculo-Skeletal System Imbalance** that is being primarily influenced by **Physical and Emotional** factors.

[Click Here](#) to Review Primary Influence Information

To learn more about associations with the Most Impactful Factor of **Circulation** [Click Here](#)

### Most Impactful Factor:

**CIRCULATION**

### Systems Impacted:

- Circulatory
- Lymphatic
- Respiratory

By analyzing the top three organs for each system, this report highlights the most frequently involved organ—the “**Most Impactful Factor**” (in bold above)—as a key focus for optimizing treatment and improving overall patient outcomes.

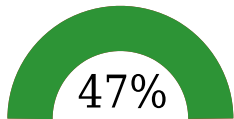

# SYSTEMS OF HEALTH:

## Secondary Priorities

The remaining systems are listed on this page in priority order, from left to right and top to bottom.

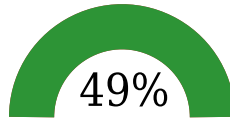

### 3: pH Regulation, Phys & Emot

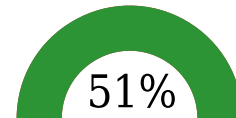

Primary Influence:  
pH Control in Body Fluids;  
Maintain Clarity

### 4: Circulatory, Phys

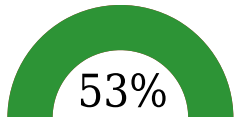

Primary Influence:  
Blood Cells - cell quantity;  
Feeling Balanced

### 5: Respiratory System, Phys & Emot

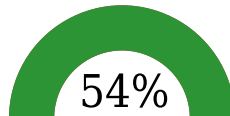

Primary Influence:  
Circulation; Feeling Stuck

### 6: Hormone System, Phys & Emot

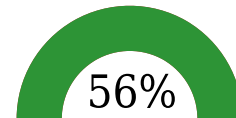

Primary Influence:  
Endocrine Cells; Inner Release

### 7: Digestive, Phys & Emot

Primary Influence:  
Digestive Neuron GABA; Calm  
Tension

### 8: Nervous, Phys & Emot

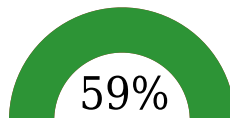

Primary Influence:  
Parasympathetic Nervous  
System; Feel Peace

### 9: Lymphatic System, Phys & Emot

Primary Influence:  
Circulation; Allow Flow

### 10: Immune, Phys & Emot

Primary Influence:  
Endothelial Cells (lining blood  
vessels); Feel Satisfied

To learn more about  
how each Influence  
connects to the  
associated System,

the full Glossary of  
Terms.

# HEALTH PERCENTAGES:

## Physical & Emotional % By Organ

Each Physical and Emotional % highlights one of the 8 factors measured - **Molecular, Biomaterial, Organ, Systemic, Intellectual, Emotional, Behavioral, Spiritual** (refer to page 2 for definitions). This shows the lowest-scoring factor in that category, pointing out the area that needs the most support.

### Adrenals

55% Physical: **Molecular**  
40% Emotional: **Behavioral**

### Appendix

85% Physical: **Molecular**  
8% Emotional: **Intellectual**

### Bone Health

54% Physical: **Organ**  
58% Emotional: **Behavioral**

### Brain

58% Physical: **Biomaterial**  
74% Emotional: **Behavioral**

### Breast

73% Physical: **Biomaterial**  
52% Emotional: **Spiritual**

### Circulation

16% Physical: **Molecular**  
33% Emotional: **Intellectual**

### Cranium

25% Physical: **Systemic**  
28% Emotional: **Intellectual**

### Diaphragm

73% Physical: **Systemic**  
87% Emotional: **Spiritual**

### Esophagus

9% Physical: **Molecular**  
63% Emotional: **Behavioral**

### Eyes

52% Physical: **Organ**  
39% Emotional: **Emotional**

### Gallbladder

44% Physical: **Biomaterial**  
11% Emotional: **Intellectual**

### Heart

11% Physical: **Biomaterial**  
77% Emotional: **Behavioral**

### Kidneys

42% Physical: **Molecular**  
83% Emotional: **Behavioral**

### Knees

51% Physical: **Systemic**  
34% Emotional: **Intellectual**

### Large Intestines

37% Physical: **Systemic**  
37% Emotional: **Intellectual**

### Liver

33% Physical: **Organ**  
56% Emotional: **Intellectual**

### Lungs

25% Physical: **Organ**  
61% Emotional: **Spiritual**

### Lymph

53% Physical: **Molecular**  
51% Emotional: **Behavioral**

### Mouth

5% Physical: **Systemic**  
86% Emotional: **Behavioral**

### Muscle Health

62% Physical: **Systemic**  
52% Emotional: **Emotional**

### Ovaries

51% Physical: **Organ**  
7% Emotional: **Behavioral**

# HEALTH PERCENTAGES:

## Physical & Emotional % By Organ

### Pancreas

60% Physical: **Biomaterial**  
92% Emotional: **Emotional**

### Pineal

46% Physical: **Systemic**  
68% Emotional: **Behavioral**

### Sinuses

70% Physical: **Organ**  
36% Emotional: **Emotional**

### Skeleton

42% Physical: **Biomaterial**  
39% Emotional: **Behavioral**

### Skin Health

14% Physical: **Systemic**  
29% Emotional: **Spiritual**

### Small Intestines

65% Physical: **Systemic**  
68% Emotional: **Behavioral**

### Spine

58% Physical: **Systemic**  
67% Emotional: **Intellectual**

### Spleen

24% Physical: **Biomaterial**  
65% Emotional: **Emotional**

### Stomach

47% Physical: **Systemic**  
74% Emotional: **Intellectual**

### Thymus

93% Physical: **Organ**  
74% Emotional: **Spiritual**

### Thyroid

43% Physical: **Biomaterial**  
80% Emotional: **Intellectual**

### Tonsils

40% Physical: **Molecular**  
74% Emotional: **Emotional**

### Uterus

53% Physical: **Biomaterial**  
29% Emotional: **Intellectual**
