

Personal Asset Protection Anonymous LLC Package

Anonymity is so important in an Asset Protection Plan because personal anonymity is the easiest way to maintain legal distance from the liabilities associated with your business and personal assets. The Limited Liability Company (LLC) has more than fairly earned its reputation as an excellent foundation for Asset Protection. But even the trusty LLC isn't the Be-All and End-All of your Asset Protection strategy. **LLC Anonymity** is another piece of the puzzle. Asset Protection is driven by the creation of an Anonymous LLC registered in Wyoming. Assets are Re-Titled in the name of the Anonymous LLC to avoid detection thru Asset Searches. This reduces potential exposure and avoiding litigation through frivolous lawsuits. Asset searches do not show any personal information, only the public publication of the Anonymous LLC in Wyoming listing the Registered Agent. Wyoming privacy laws prevents personal ownership from being disclosed.
