More than **6 out of 10 people** with cancer will survive! The bad news is cancer can be expensive totaling more than **\$226 billion** in the United States. Most people are surprised that their largest expenses during illnesses are often not their medical expenses — it's the **indirect costs** their health insurance **doesn't cover**.

Two Types of Costs:

Direct Costs

- Doctor Bills
- Hospital Charges
- Medical Expenses

Indirect Costs

- Lost Income and Savings
- Living Expenses
- Insurance Limitations
- Travel for Best Treatment
- In-Home Care
- Child Care

While your expenses go up, your income and savings often go down, forcing you to rely on:

- Savings and Investments
- Selling Assets
- Retirement Funds
- College Funds
