Dear Ariel,

Working with you has surpassed expectation of what I thought could be possible. Your thought provoking questions have led me to explore patterns within myself that no longer serve me, opening a new world of opportunities to explore. The safe space you provide during our sessions allows me to examine my mindset, emotional resilience, and responses to life events. Your perspective has acted like a lighthouse for me...ever steady, reassuring, and immensely helpful in measuring the progress towards my goals.

When we first started working together, my business, while successful, felt stagnant to me, and personally, I was not experiencing fulfillment in life. As you have patiently guided me to higher levels of thinking, I have been able to take responsibility for my own happiness and examine why I permit certain people or things to take up space in my life. After a major "house cleaning" in the beginning, our ongoing sessions continue to inspire me to choose what is best. As a result, my business has expanded by over 150%, and I feel a peace and joy that engulfs the fear and anxiety I tolerated for so many years.

You have helped me grieve the loss of a parent, find happiness despite sadness, and reminded me that there is no judgement in feeling. To try and put all that you have done for me in words seems cliché.

I am deeply grateful for your guidance. Thank you for making my life a better place to be.

With sincere appreciation,

Zipporah Evania
