Deep tissue massages are effective for many chronic pain conditions including fibromyalgia. This is especially effective on stiff necks, upper back pain, shoulder pain, low back pain, and tight muscles in your legs.

With our Deep Tissue Massage therapy, patients claim to feel relaxed and renewed after each session. Deep tissue massage is aimed at the deeper tissue structures of the muscle and fascia, also called connective tissue. Deep tissue massage uses many of the same movements and techniques as Swedish massage, but the pressure will generally be more intense.
