

This form is to be filled out by the Doctor or Staff.

WHAT A MINI PHASE I IS

For example only

When patient has been identified with occlusal flags (at the new patient exam or recall exam) and/or needing to be evaluated for TMD. Doctor will gather the following information from the TMJ exam form:

- Muscle Palpation
- ROM Max opening, lateral excursions and protrusive measurements
- Habitual Shimbashi Measurement
- Wall/Parachute Test

A consult will be given to patient for mini type I exam and done that day if time allows or scheduled back for records. Once records have been gathered patient will be scheduled for TMD consult with patient's significant other.

Mini-Phase I exam is done:

U.S. Codes BC Codes Description
