How to Use the Payment Element in Forms for Collecting Don

Payment element in Forms makes collecting donations and user-defined amounts possible. Now, you can find it under the "Integrations" section in the Add Element in form builder, giving you the ability to seamlessly integrate payment functionality right into your forms and take the user experience up a notch.

TABLE OF CONTENTS

- **[Suggest an Amount Customization](#)**
- **[User-Defined Amount](#)**
- **[Tracking Payments](#)**

You can use autoresponders and email notification with the form in which payment is enabled. Email notifications reflect payment status and amount as well.

Important points to note

- NMI and Authorize.net require the first name as a mandatory field when using the Payment element.
- Refund amounts are not captured at this time.
- The old API-based Stripe connect method is not supported.
- In Calendars with custom form payment elements, the Payment element will not display.
- Multi payments with multi-native forms are not supported in funnels yet.
- Undo/Redo is not supported with the Payment element yet.
