## Troubleshooting Login issues

**KEMAR MCKENZIE**

### This Article Covers:

- [Error: Unable to log you in at this time](#)
- [Error: Not able to send the security code at this time](#)
- [Error: User does not exist in this Agency](#)
- [No Error but the page just doesn't redirect and got stuck](#)
- [Error: Web server is returning an Unknown Error](#)
  - [How to remove Site Data on Chrome](#)
  - [How to remove Site Data on Safari](#)

---

## Error: Unable to log you in at this time

1. Ask them which Internet service provider (ISP) they are using

If they have **Verizon Fios**, please disable protection here:

<https://www.verizon.com/support/residential/internet/essentials/home-network-protection>

If they have **CenturyLink**, please disable secure wifi here as this will be the only way to access the app.

<https://kb.plu.edu/page.php?id=109248>

If they have had **Survey Junkie** before, please uninstall to see if it will work as it will update all SSL certificates on your website.

If they have **McAfee** installed, please turn off web protection here

<https://www.help.k12.com/s/article/McAfee-Web-Protection-Enable-Disable>

If they have **xfinity**, please check

## Troubleshooting Login issues

<https://www.xfinity.com/support/articles/online-security-with-xfi-faqs>

We will be working on a long-term solution in the meantime. As long as the user is browsing secure websites on their device, turning off the protection feature should not bring any risks.

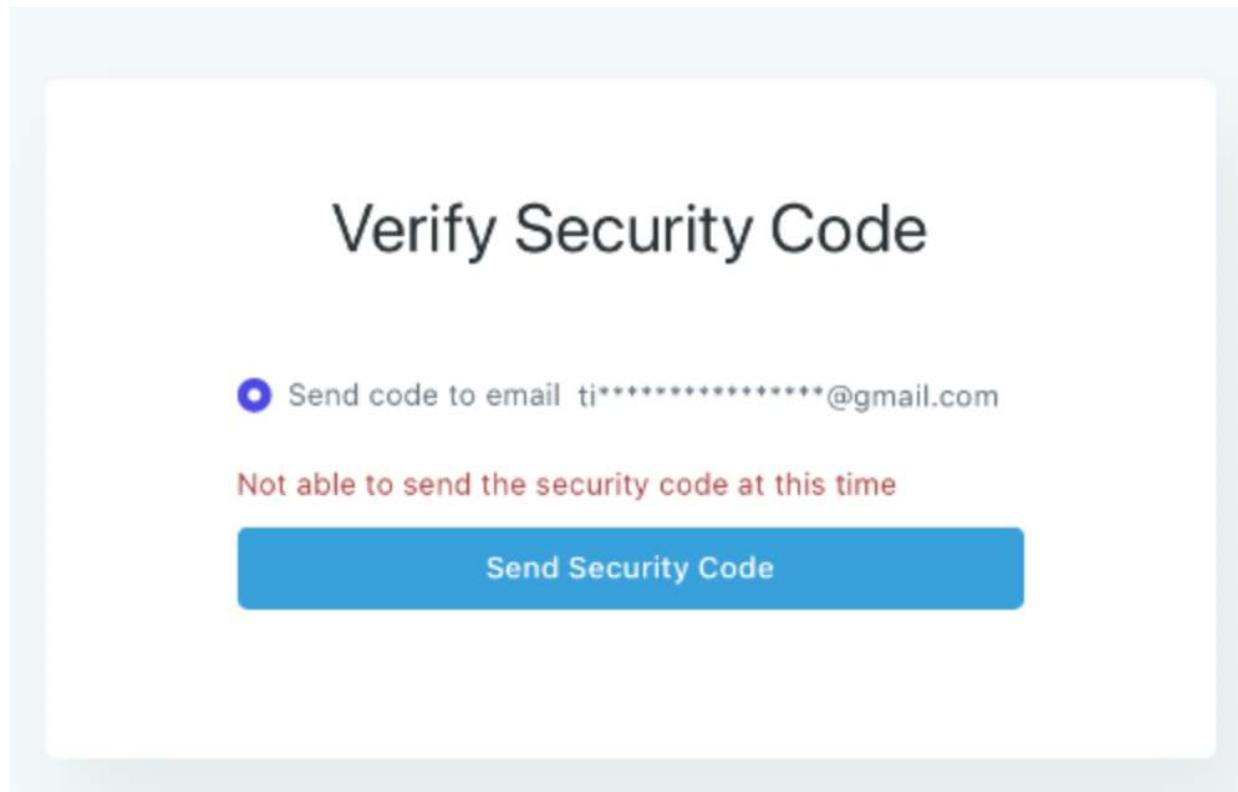

2. If they are not using the ISP mentioned above:

When they are trying to log in, Inspect the page, Open the network tab and create a loom with the request being sent. Show the response for the API.

You can give us a call at [\(888\) 732-4197](tel:8887324197) to open a ticket and send us a Loom video like the one below for us to take a look further.

---

## Error: Not able to send the security code at this time

## Troubleshooting Login issues

Please reach out to the agency admin to add a **user phone number** for the user who tries to log in so they can send the 2FA code to the user's phone number. If you are the only agency admin, please reach out to us at [\(888\) 732-4197](tel:(888)732-4197) so we can update the user phone number for you.

To get email verification to work, please watch this video to check further:

1. What is the user login email?
2. Did the user check their spam folder for an email titled "Login Security Code"?
3. What is the company relationship number? (found in agency settings->company tab)
4. Are you using your own SMTP or Mailgun? (check agency settings)

---

## Error: User does not exist in this Agency

If this error is showing up when the user is trying to log in through a whitelabel domain, that means the user is not associated with that agency within the whitelabel domain.

---

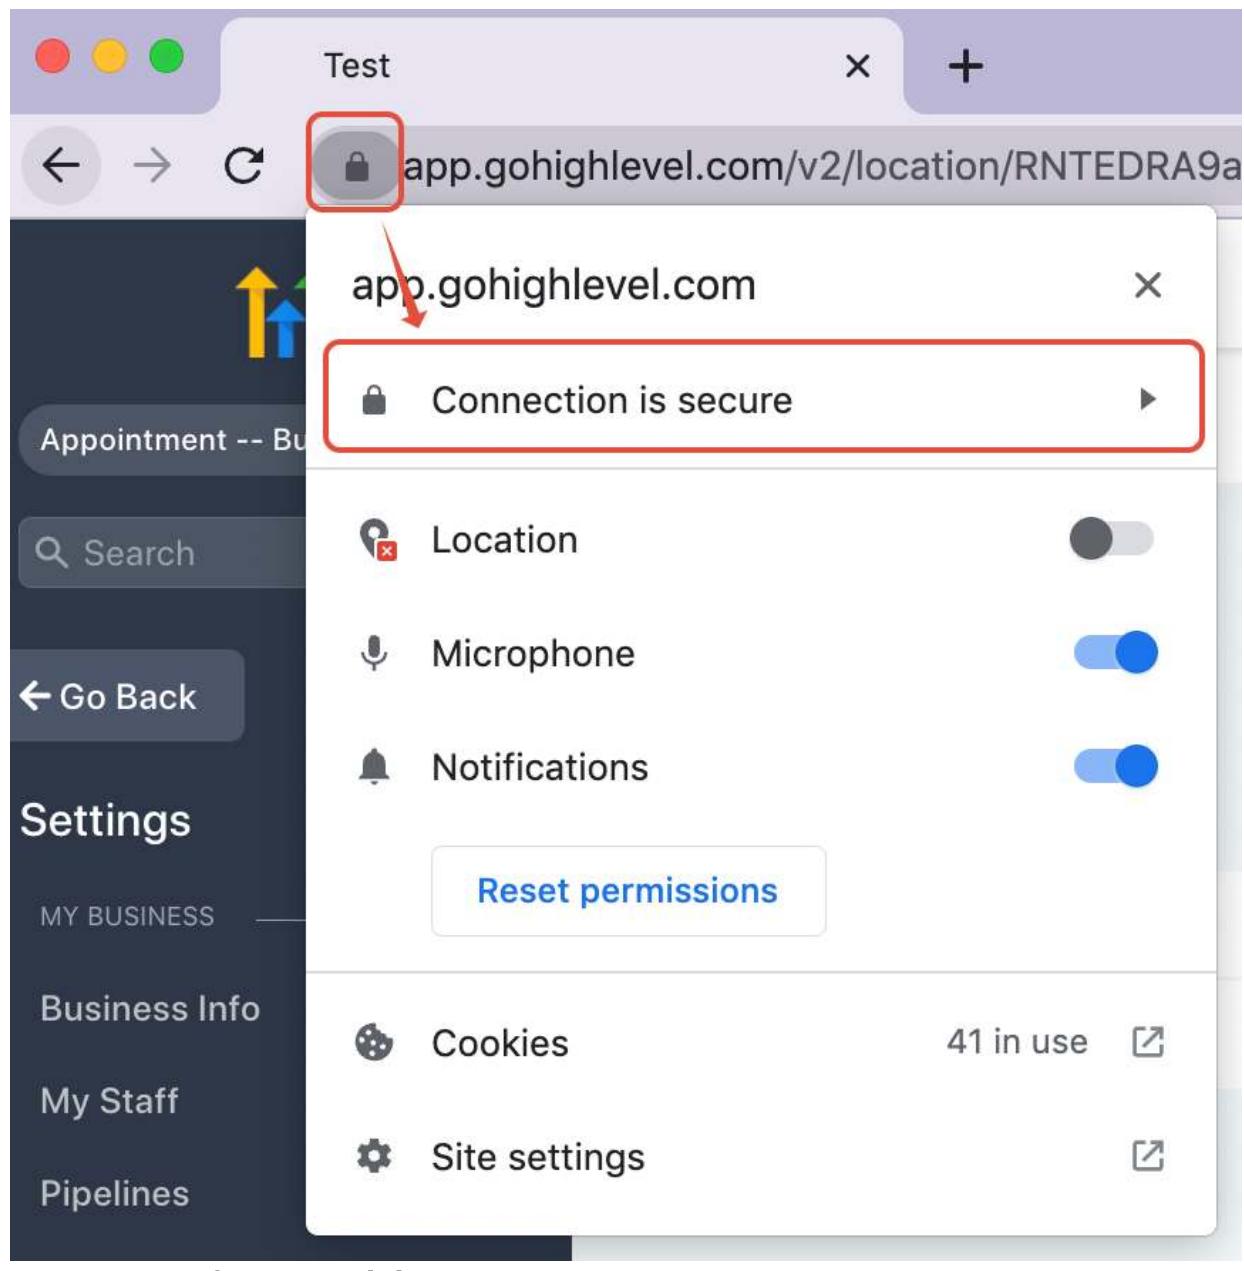

## No Error but the page just doesn't redirect and got stuck

1. Make sure cookies are allowed for [app.churchintheknow.org](https://app.churchintheknow.org)
2. If it's still stuck,

## Troubleshooting Login issues

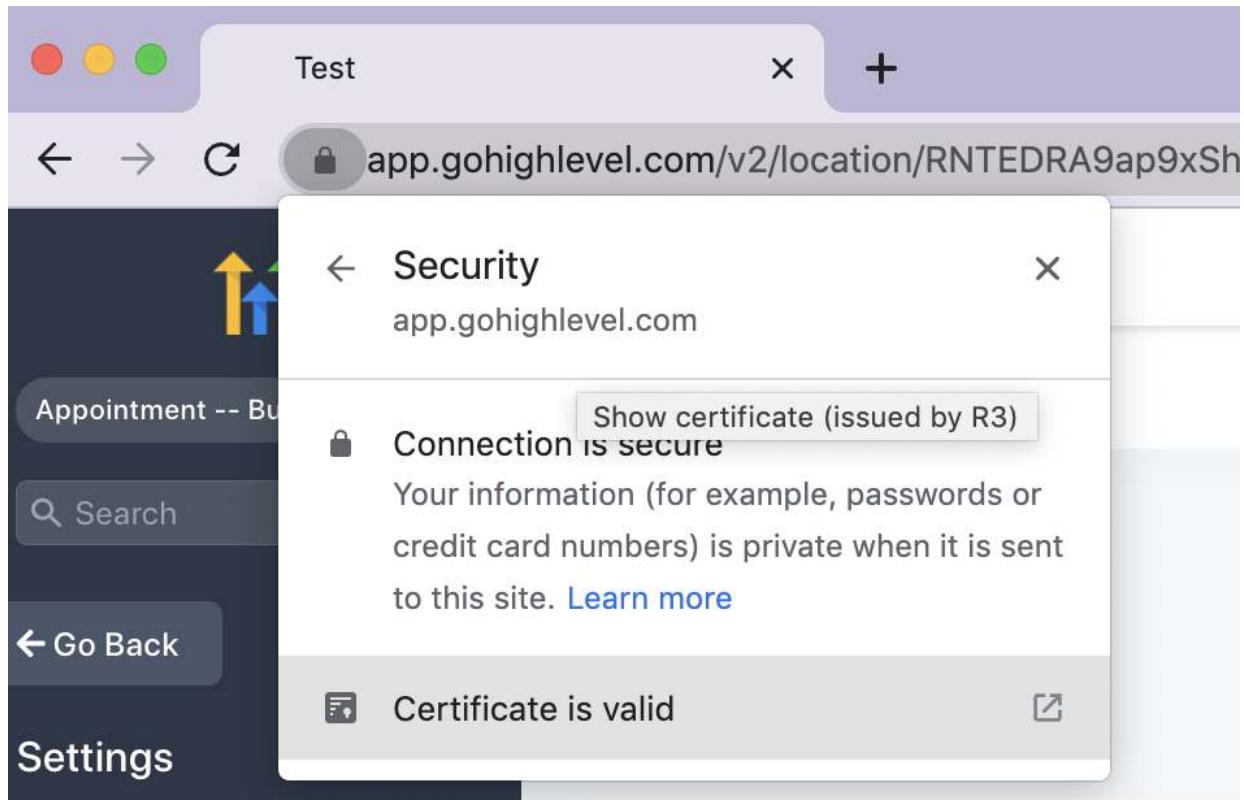

check If they have software (e.g. **NordVPN**) that might control browsing activity/web protection before, please **turn off / uninstall** to see if it will work as it will update all SSL certificates on your website.

Click on the lock icon on the top left > Click on **Connection is secure** to expand more information

Click on **Certificate is valid**

# Error: Web server is returning an Unknown Error

To remove this error you will have to clear the site data.

## How to remove Site Data on Chrome:

### 1. For chrome, Right-Click on the browser and inspect the page's elements.

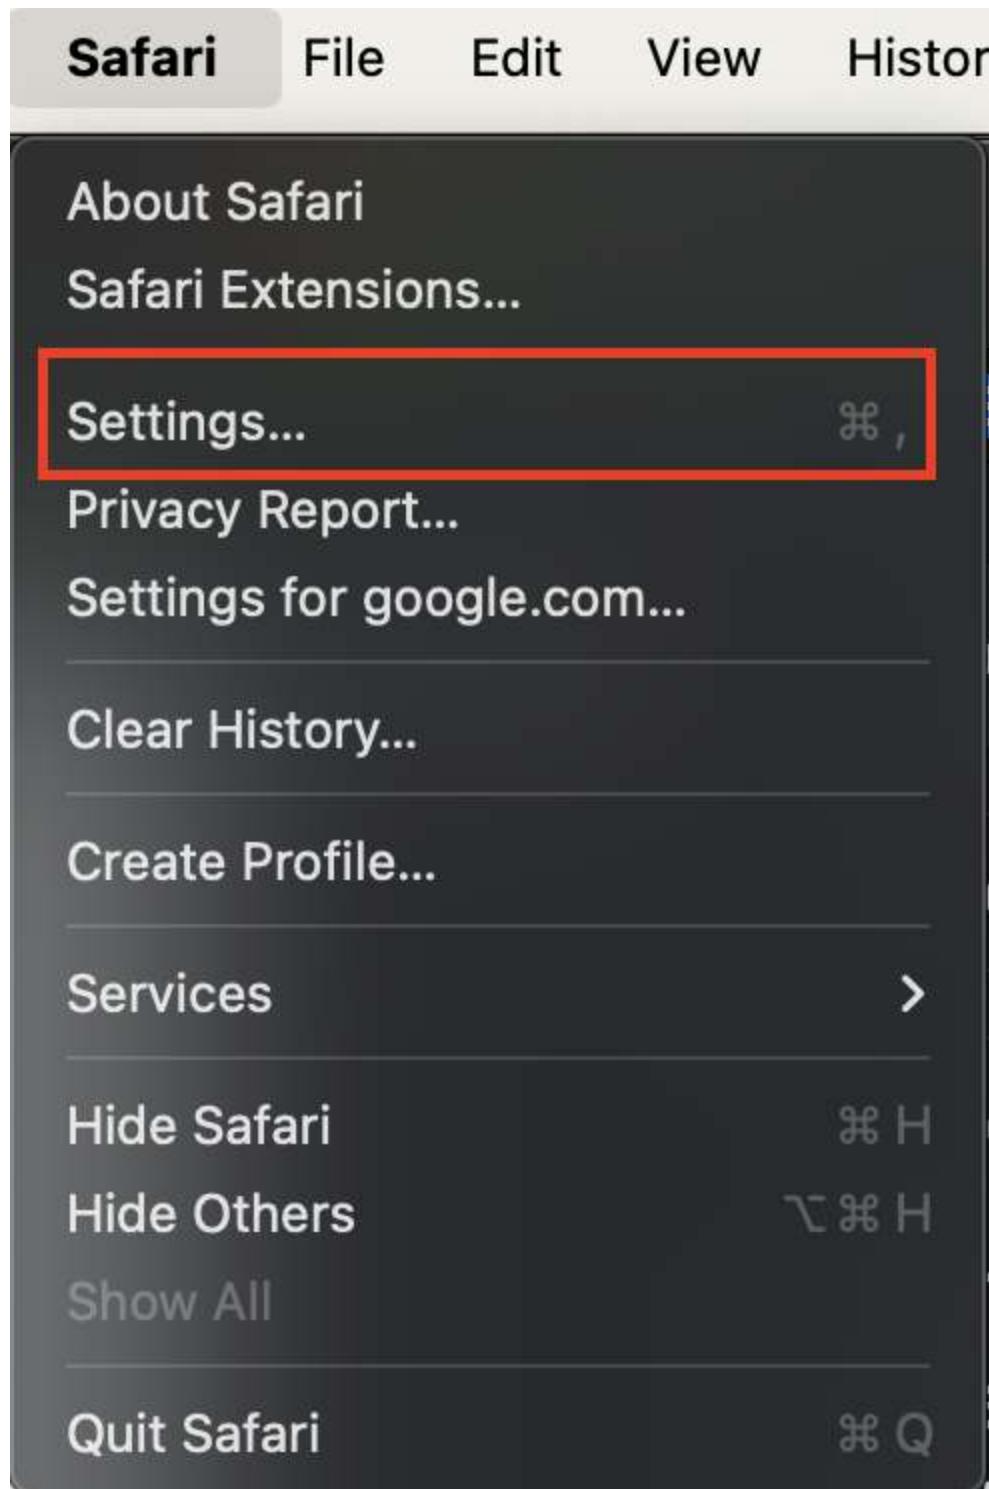

2. Then click on Applications from the top - menu and access the Storage option on the left-hand navigation menu
3. You should then be able to see the "Clear Site Data" option on the middle of the screen:

### How to remove Site Data on Safari:

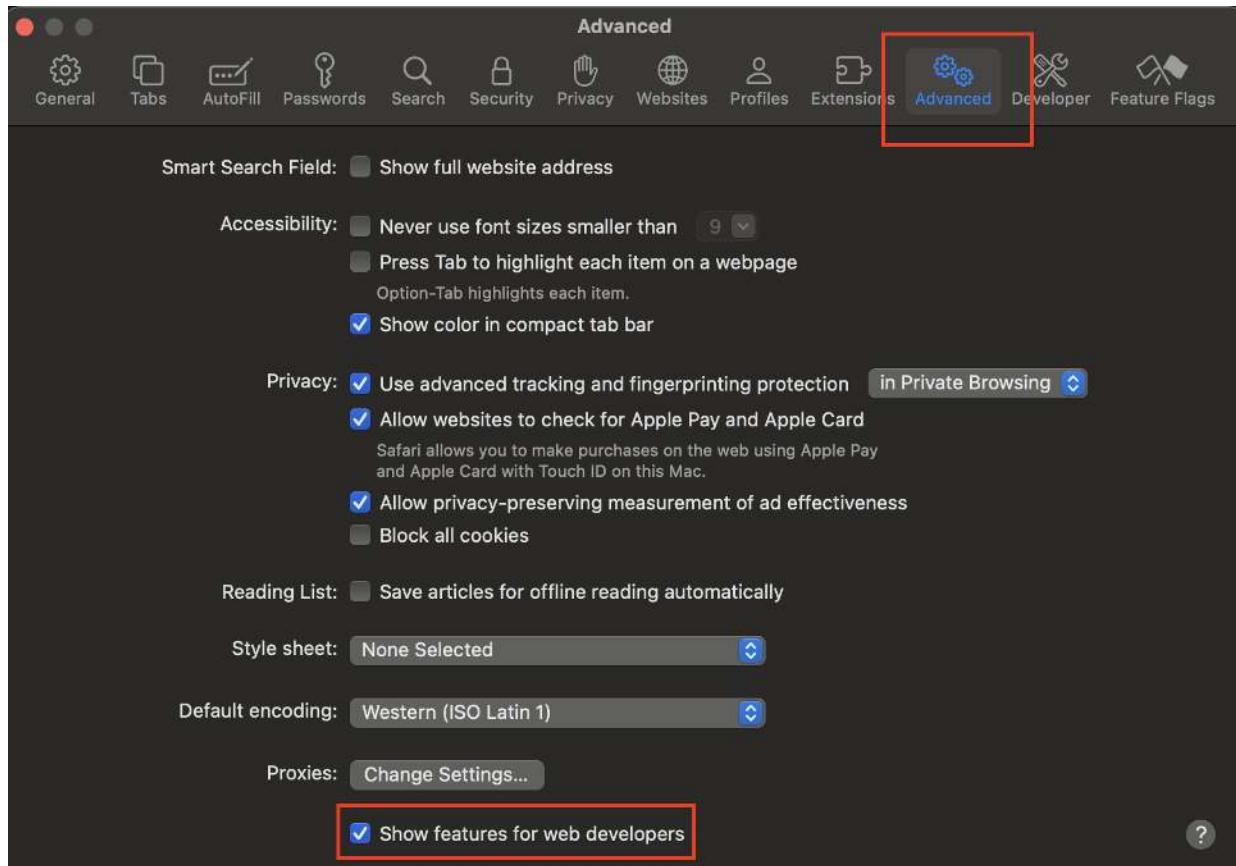

## Troubleshooting Login issues

1. For Safari, you must first enable Developer tools by accessing the browsers settings, by clicking Safari and then settings

2. Then you have to click on Advanced from the top menu and turn on the box for "show features for web developers"
