Hosting your US telephone number
(non-Twilio number) to a location

The screenshot shows the Twilio console interface. On the left is a sidebar with navigation links: Manage (Active numbers, Released numbers, Buy a number, Verified Caller IDs, Twilio zaps), Port & Host (Port in requests, Port a number, Port away requests), Host numbers (Authorization documents, Regulatory Compliance), Bundles, and Addresses. The main area is titled 'Number Hosting Requests' and contains a table with columns for 'Friendly Name', 'Select', and 'Actions'. Below the table, it says 'No rows to display'. A modal window titled 'Host a Number' is open in the center. It contains the following text: 'You are about to host your phone number(s) with Twilio. The process typically takes a week. To start, name this hosting request and add the numbers you'd like to host.' It has a text input for 'FRIENDLY NAME (FOR THIS HOSTING REQUEST)', a text area for 'PHONE NUMBER(S)' with a note 'Please enter one number per line in E.164 format: +13291234444', a checkbox for 'Notify me when hosting status for these numbers changes:', and a 'STATUS CALLBACK' section with a 'Method' dropdown and an 'Optional' checkbox. At the bottom of the modal are 'Cancel' and 'Continue' buttons.

What is Hosted SMS?

Hosted SMS allows you to send and receive messages on voice-enabled numbers you already own with another carrier. It does not affect your voice capabilities of the number. We only register the number for SMS to route in and out of the platform.

What numbers can I host on Twilio for SMS?

Hosted SMS supports US and Canada in Beta. Mobile numbers are not supported. VoIP numbers from some providers will be supported in the future. Numbers already owned by a Twilio account for voice services cannot be hosted on another Twilio account for SMS services.

How can I host my number for LC phone locations?

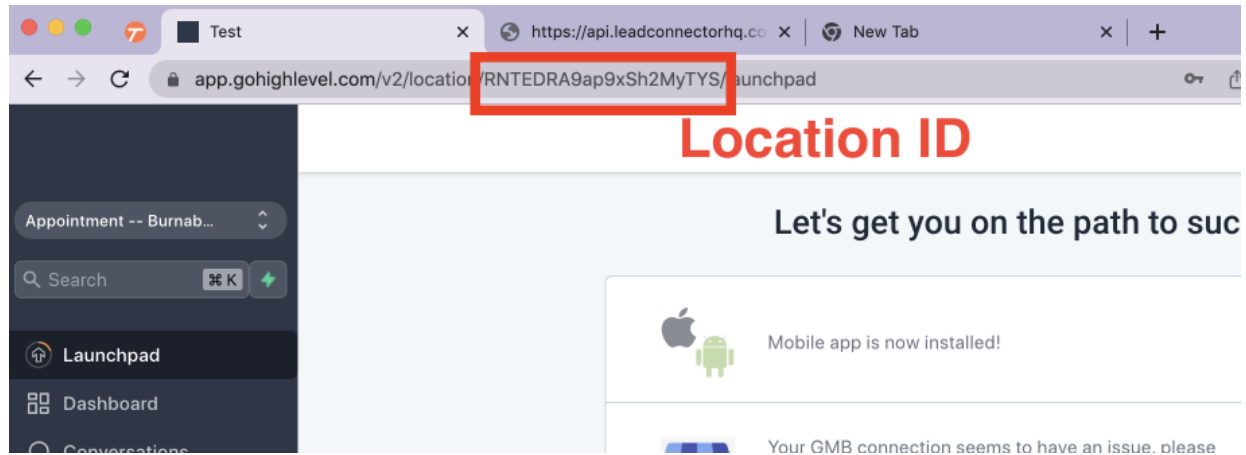

We will need the end-user to complete ownership verification and LoA (Letter of Authority) signature once the following information has been submitted.

Please copy and share the following information with us in via [24/7 Live Chat Support](#)

1. Location ID:
