Facebook Lead Ad Integration &
Troubleshooting Guide : CITKNOW

The Facebook Lead Ads integration allows you to collect leads directly from Facebook Ads and have them automatically synced with your CRM. With this integration, you can easily capture contact information from potential customers interested in your products or services on Facebook and quickly follow up with them through your CRM. By automating the lead capture process, you can save time and improve the efficiency of your sales and marketing efforts.

What is the Facebook Lead Ads Integration?

The Facebook Lead Ads integration with a CRM (Customer Relationship Management) system allows businesses to capture and automatically import leads generated through Facebook Ads into their CRM system. This integration enables businesses to streamline their lead capture process, avoid manual data entry errors, and follow up with leads more efficiently. By integrating Facebook Lead Ads with a CRM, businesses can track and manage their leads through a single platform, which can improve Lead quality, increase conversions, and ultimately help grow their business.

Who is this integration helpful for?

The Facebook Lead Ads integration with a CRM can be beneficial for any business or organization that is using Facebook Ads to generate leads and wants to streamline their lead capture process. It can benefit small businesses or startups that may not have a large sales or marketing team to collect and manage leads manually. By automating the lead capture process, businesses can save time and resources while improving their lead data's accuracy and quality. Additionally, the integration can benefit businesses already using a CRM by seamlessly integrating their Facebook lead data into their existing workflows and follow-up processes.

What are the benefits of this integration?

The benefits of integrating Facebook Lead Ads with the CRM include:

Automated lead capture: With this integration, businesses can automatically capture leads generated through Facebook Ads and import them into their CRM system, eliminating the need for manual data entry.

Improved Lead Quality: By tracking and managing leads through CRM, businesses can better understand their audience, personalize their marketing efforts, and improve the overall quality of their leads.

Enhanced lead management: The CRM system allows businesses to track and manage their leads in one place, providing a 360-degree view of their interactions with prospects and customers. This can help companies to streamline their sales and marketing efforts and improve customer retention.

Efficient follow-up: With lead data automatically captured and imported into the CRM system, businesses can quickly follow up with leads and prioritize their sales efforts based on lead quality and behavior.

Increased conversions: Businesses can increase their conversions and ROI from Facebook Ads by automating lead capture and improving lead management.

Pre-requisites for Facebook Lead Ads

- **Access:** You must have access to the Facebook page for which you're creating lead ads. Refer to this Facebook Help article on [how to give someone a role on your Page](#).
- **Ownership:** Ensure the same user owns the page and the ad account. For business-level integrations, the owner of the page and the ad account must be the same—more on this in the Facebook help section on [Ad account roles](#).
- **Permissions:** Verify that you have the page and ad account permissions. You should ideally have admin or manage permissions. To understand different levels of permissions, refer to [Facebook Pages roles](#) and [Ads permissions](#). The user trying to integrate the Facebook Page into the CRM will [need to be an admin of the Facebook Business page](#) and have [Lead Access Permission](#) to access Lead data (A requirement set by Facebook).
- **Ad Account Check:** Confirm your page is connected to the appropriate ad account. To do this, navigate to the Ad Account settings and verify the connected page—more on [how to navigate your ad account settings](#).
- **Visibility:** Note that only individuals with relevant permissions can see the owners of ad accounts. For details, check Facebook's guide on [user permissions for ad accounts](#).
- **Leads Access:** Check if you have lead access. If the lead connector isn't showing, you may need to manually search for it or enable it. For issues related to leads not syncing, refer to Facebook's [troubleshooting guide for lead ads](#).

- LeadConnector will need access to the Facebook Business Manager and Business Page from which you run the Facebook Lead Ad.
- If you have moved your page to the [New Pages Experience](#), You can allow trusted people to manage some of your Facebook business pages. You can give some people [access](#) to certain parts of your Facebook page without giving them full access.
- Open business manager > Left navigation > Users > People. If you have added the person, who will be integrating the FB page to the CRM, there already: they will appear at the center of the page.
Click on the name and see more details, like the role. The role needs to have **Admin or Employee** access.
If you have not added them, Please follow the steps to add people/users first.

[How to add users to your business?](#)

Remember that this business manager role differs from Page Role; the Page Role must still be the Admin.

Please Note:

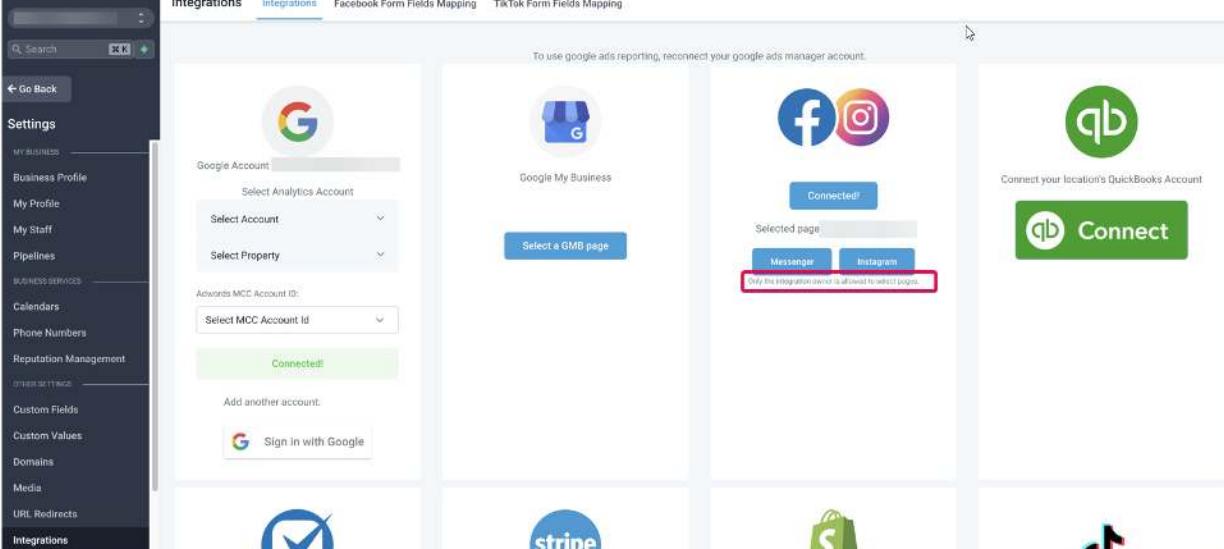

- When creating the custom fields for the Lead Ad in the CRM, please make sure to use the supported custom fields listed below:

Supported custom fields when using Facebook Lead Ads:

- TEXT
- LARGE_TEXT
- NUMERICAL
- PHONE
- MONETARY
- SINGLE_OPTIONS
- DATE
- DROPODOWN
- RADIO OPTIONS
- CHECKBOX

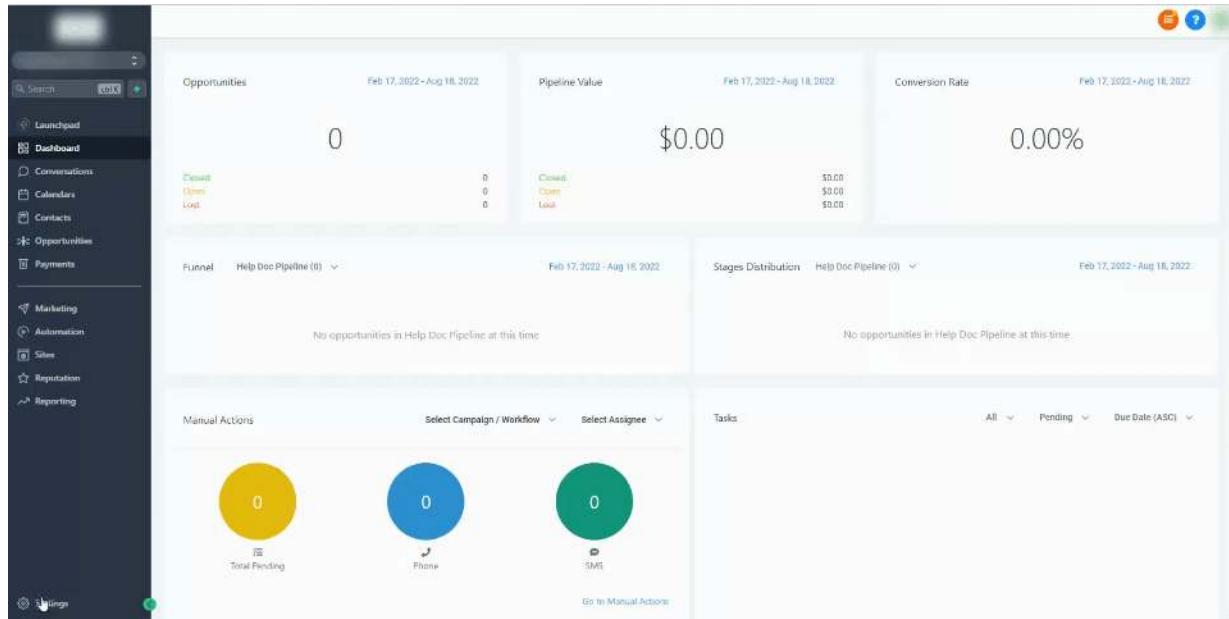

How to directly integrate Facebook Leads Ads with a Sub-Account

Please Note:

Only the User that integrated the FB page will be able to see that page in the dropdown of pages. They need to be the admin of that FB page

Facebook form mapping has moved under location **settings > integrations > Facebook Form Field Mapping**.

Troubleshooting

Why are my Lead Ads not making it into my Sub-Account?

1. Are you an admin of the Facebook page - [How to add an admin to my Business Manager](#)
2. Can you confirm that the correct **FB Lead Ad form** is selected in your Facebook ads manager and matches the one in your Sub-Account? -
<https://web.facebook.com/business/tools/ads-manager>
3. Now in your Sub-Account, check in settings> integrations > Facebook form fields mapping if there is a blue tick mark next to the form you have selected in ads manager.
4. If you are, in fact, the FB Admin, can you try this to confirm if Lead Connector is accessible and can allow access to your page?

Link mentioned in the video - https://www.facebook.com/settings?tab=business_tools&ref=settings

6. Once you have completed the steps in the video above, please use the [Facebook leads ads testing tool](#) to see if leads are now being added to your Sub-Account.

Lead Ad Testing Tool: <https://developers.facebook.com/tools/lead-ads-testing>

Facebook Page

Select: https://app.gohighlevel.com/location/YOUR_LOCATION_ID/facebook_page_select

Please Note:

When testing are you able to locate the [App ID 39018126477806](#)? (Mentioned in the video above @2:49 seconds)

If the app ID does not show up, then LeadConnector does

not have access. If that is the case please continue to **step 7 below**.

If

Facebook Lead Ads are not coming into the CRM Please try using unique contact info as explained in the video below:

7. If you see that LeadConnector access to your page has been revoked or the App ID is not coming up, you will manually need to assign Lead access permissions to LeadConnector on Facebook:

i. Go to Business Suite.

ii. If you don't have access to Business Suite, go to Business Settings and select your business, skip to step (v)

iii. Click the dropdown in the top-left corner and choose your business account.

iv. Click Settings in the bottom-left corner.

v. Click More Business Settings.

vi. Click Integrations in the left menu, then click Leads Access.

vii. Click Assign CRMs. You'll see a list of CRM systems integrated with your Facebook Page.

viii. Check the circle next to LeadConnector, then click Assign.

Please Note:

The Page Admin who granted permissions to LeadConnector must continue to have access permission or else LeadConnector will fail to fetch data.

How do I integrate Facebook Leads using a 3rd party service like Pabbly Connect or Zapier?

You can use a 3rd parties integration tool like Zapier or Pabbly Connect. Here is [more info](#)

A Facebook Token Has Expired In a Sub-Account; why does this happen, and How to Fix This?

If you received an email with a subject that says "Important: Facebook connection has expired.", this means that the Facebook integration for one of your Sub-accounts has become disconnected.

Why Did This Connection Break?

Several reasons could cause the integration to break. The most common are:

A user changes their password

The Facebook token naturally expires after some time

A user de-authorizes your app

A user logs out of Facebook

A user changes page permission or adds/removes a user

A virtual assistant in another country logs in without using a VPN

To reconnect:

1. Select the account indicated in the email you received from the "Switch To An Account" dropdown
2. In the left-hand sidebar, click "Settings."
3. From the sidebar, click "Integrations."
4. Click the "Connected" button to disconnect the broken integration under the Facebook icon. Click on Connect again to reconnect
5. In the window that pops up, continue as yourself, select the Facebook page that you want to connect, then click the "Connect Page" button

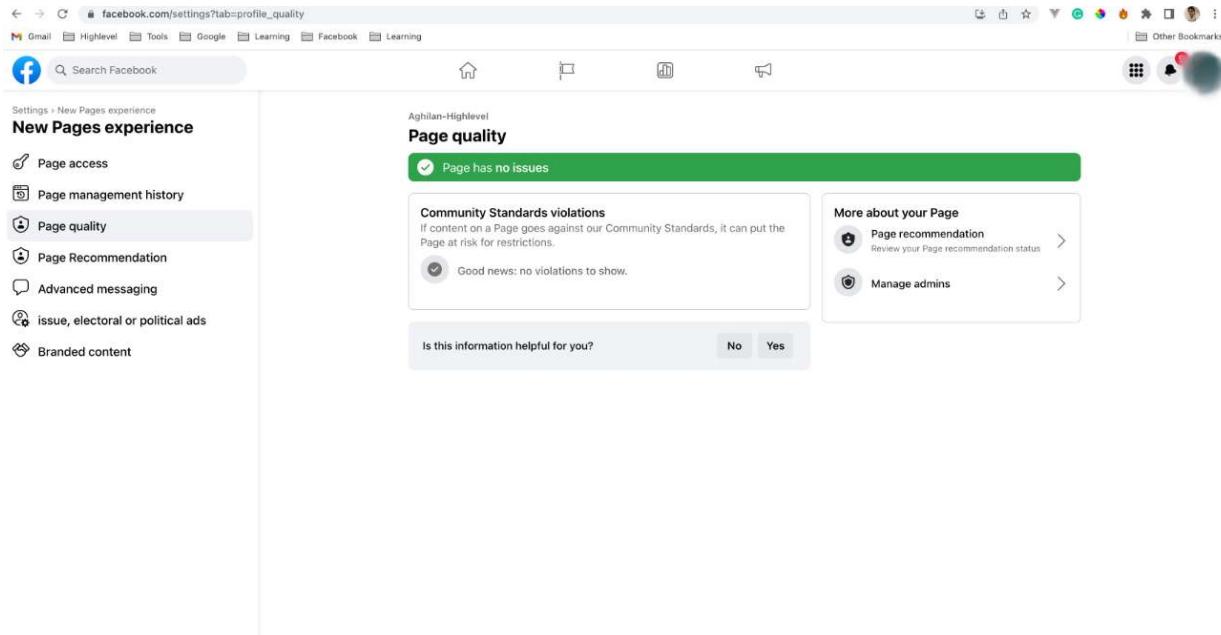

Common Errors

Page Quality Issue :

Suppose our user is facing this issue. Our customer needs to raise a support ticket with Facebook Support.

Steps to resolve:

Facebook Lead Ad Integration & Troubleshooting Guide : CITKNOW

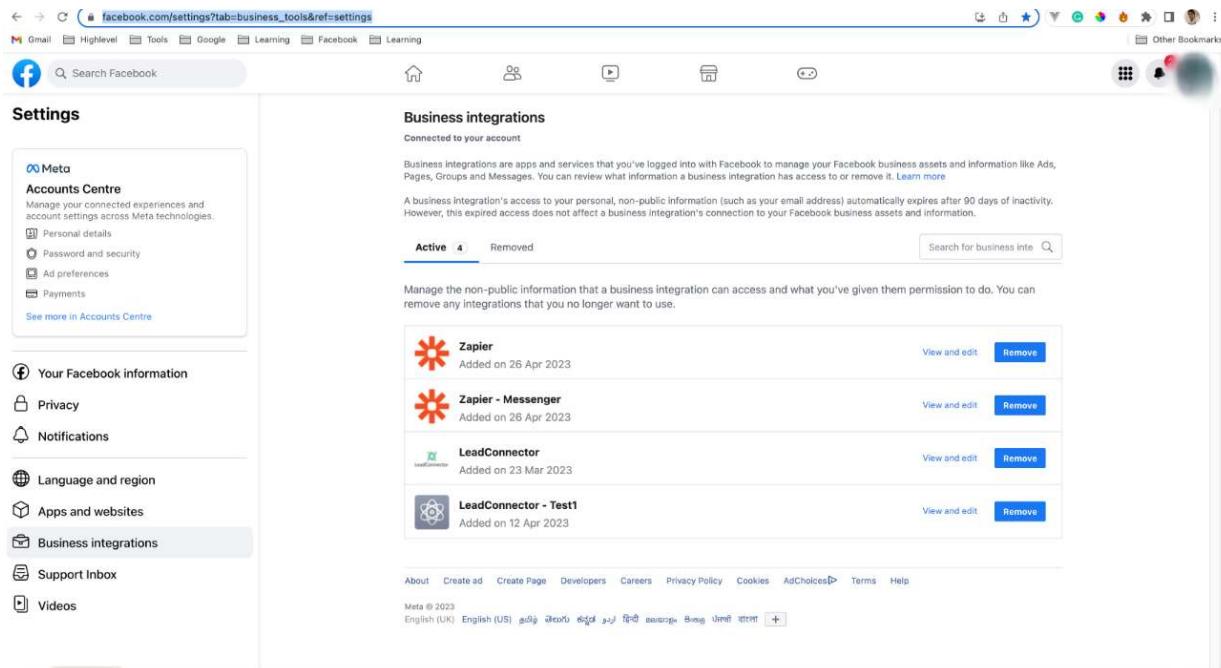

- Users need to switch to the Facebook page on Facebook, Go to [this link](#) and raise a support ticket with Facebook if there is an issue.
- [FB Support Doc](#):

Permission Issue:

The easiest way to find the issues is by trying to fetch the latest FB/Insta message and the latest lead.

This is how Zapier does it, and it helps us easily find the missed permission. FB API will present an error if permission is missing or for other reasons. Troubleshooting steps are as follows:

Facebook Lead Ad Integration & Troubleshooting Guide : CITKNOW

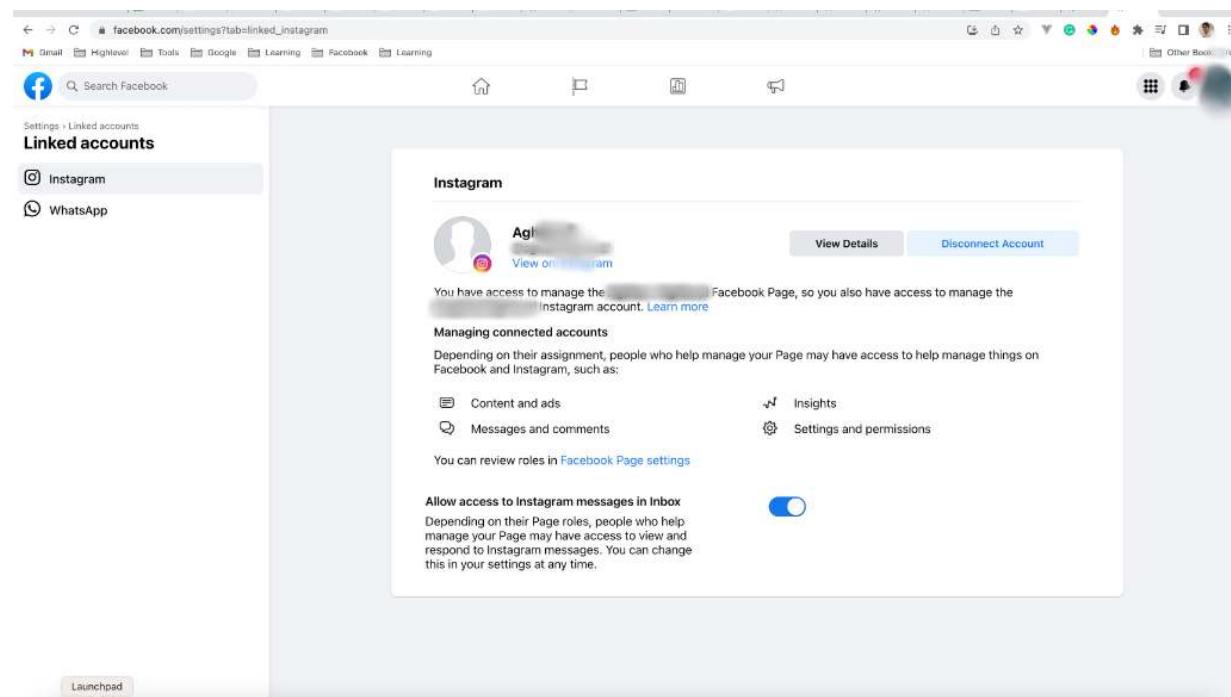

The screenshot shows the 'Business integrations' section of the Facebook Business Center. It lists four active integrations: Zapier (added on 26 Apr 2023), Zapier - Messenger (added on 26 Apr 2023), LeadConnector (added on 23 Mar 2023), and LeadConnector - Test! (added on 12 Apr 2023). Each entry has a 'View and edit' button and a 'Remove' button.

- Go to [this link](#).
- And then [this link](#)
- Check if all the permission are enabled for all pages.

Instagram Connection/messages Check:

Check Instagram page is connected to the FB page

The screenshot shows the 'Linked accounts' section of the Facebook Business Center. It lists an Instagram account connected to a Facebook page. The Instagram profile picture is shown, along with 'View on Instagram' and 'Disconnect Account' buttons. A note states: 'You have access to manage the [redacted] Facebook Page, so you also have access to manage the Instagram account. [Learn more](#)'.

- Switch your logged-in user to the desired Fb page and go to [this link](#).
- Check if messaging is enabled.
- If the page is connected, but your IG page is still not visible as an option in your CRM. Please do a [hard reset](#) and then attempt to connect.

Messenger/ Instagram not syncing all messages:

Sometimes the reason for this issue is our LeadConnector app is not set as the primary receiver if they have multiple CRM integration.

Steps to resolve:

Leads, not syncing Issue:

We need to check the business side for the places below.

Facebook Lead Ad Integration & Troubleshooting Guide : CITKNOW

The image displays two screenshots of the Facebook Business settings interface, specifically focusing on access controls for users and pages.

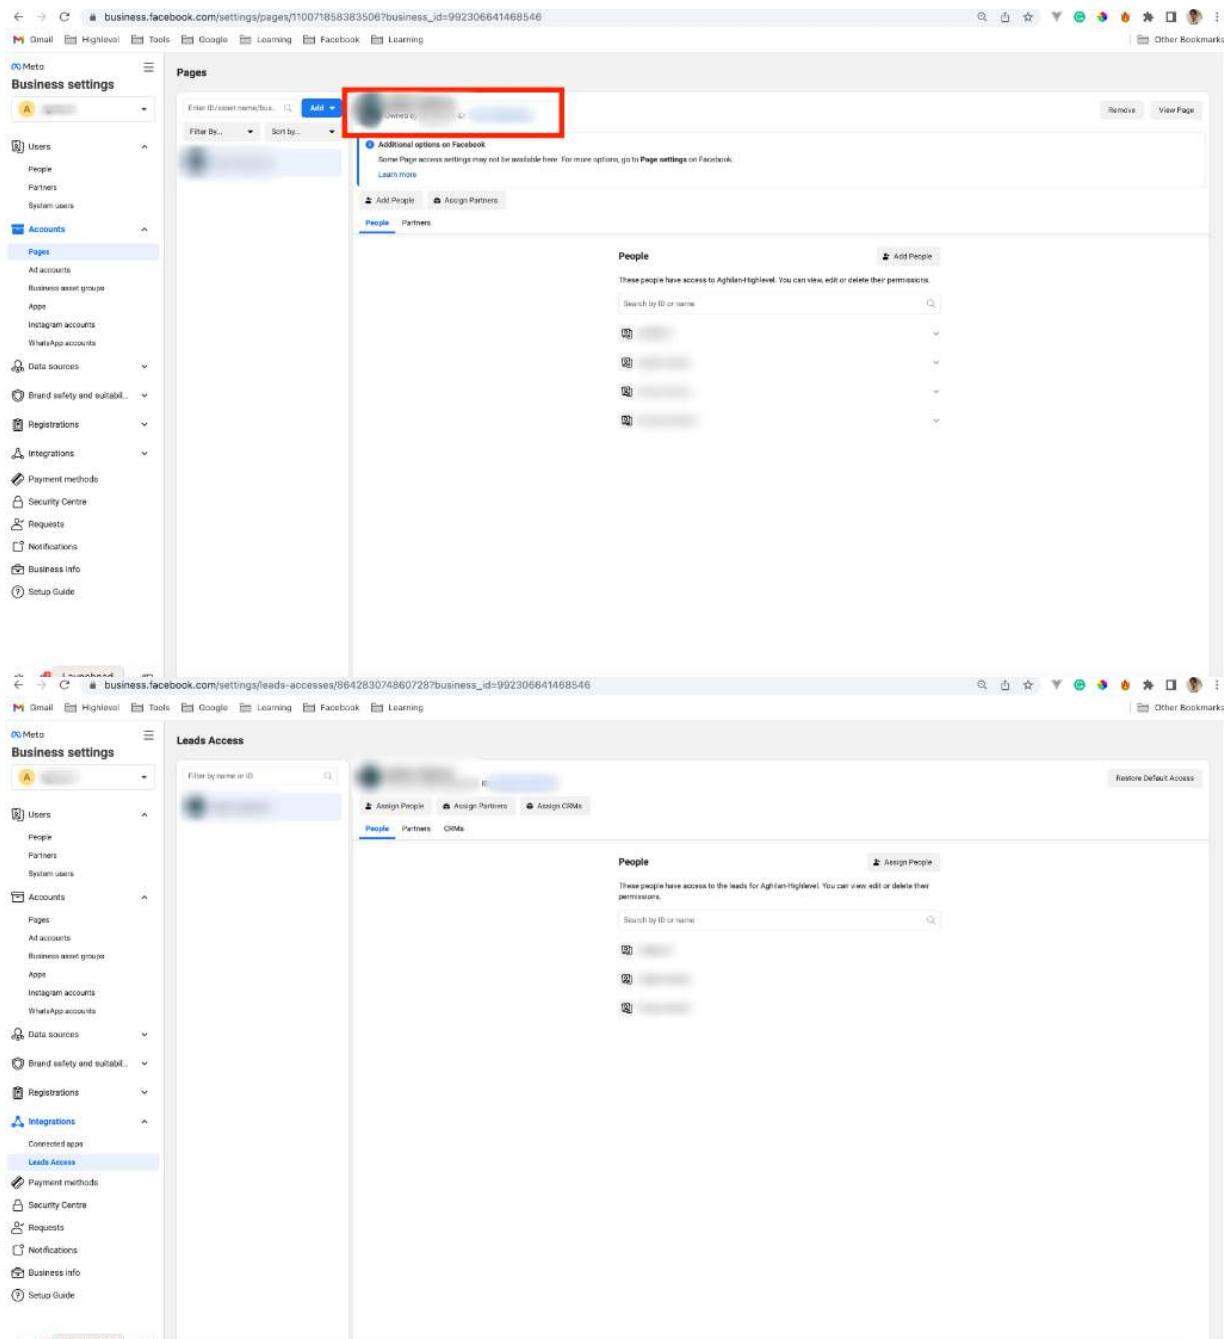

Top Screenshot: Business settings - People

This screenshot shows the 'People' section of the Business settings. It lists a user named 'Gaurav Kanted' with the role 'Portal viewer' and the status 'joined business 22 Mar 2020'. The 'Assigned assets' section shows various access levels for this user, including 'Partial access (business tools only)' and 'Full control (business tools and Facebook)'. The 'Facebook access' section indicates that the user can switch into the Page to manage things directly on Facebook and use tools like Meta Business Suite and Creator Studio.

Bottom Screenshot: Business settings - Pages

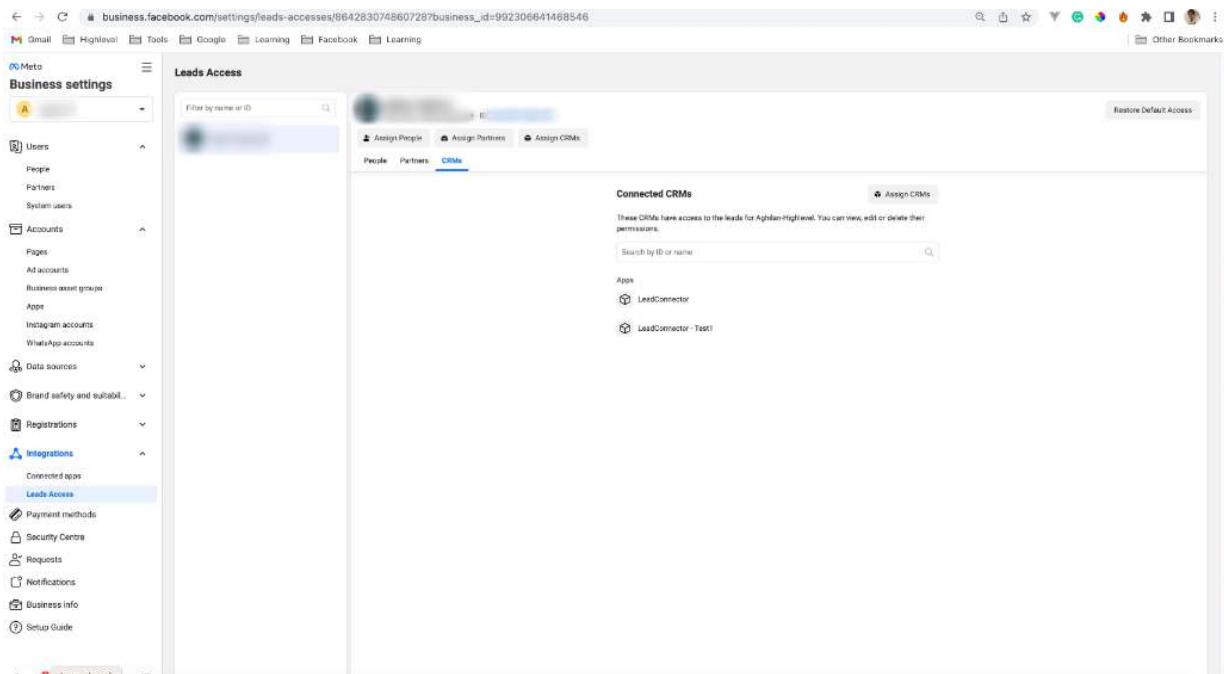

This screenshot shows the 'Pages' section of the Business settings. It lists a page with the name partially visible. The 'Assigned assets' section for this page shows the same access levels as the user above. The 'Facebook access' section indicates that the page can switch into the Page to manage things directly on Facebook and use tools like Meta Business Suite and Creator Studio.

Facebook Lead Ad Integration & Troubleshooting Guide : CITKNOW

The image consists of two screenshots of the Facebook Business Settings interface, arranged vertically. Both screenshots show the left sidebar with various business management options like Pages, Accounts, Integrations, and Leads Access. The top screenshot is titled 'Pages' and shows a list of pages with an 'Add' button highlighted by a red box. The bottom screenshot is titled 'Leads Access' and shows a list of users with an 'Assign People' button highlighted by a red box. Both screenshots show a list of users with their names and profile pictures, and a search bar at the top.

Facebook Lead Ad Integration & Troubleshooting Guide : CITKNOW

The screenshot shows the 'Leads Access' section of the Facebook Business settings. On the left, there's a sidebar with various business management options like 'Users', 'Accounts', 'Integrations', and 'Payment methods'. The 'Integrations' section is expanded, and 'Lead Access' is selected. The main area is titled 'Leads Access' and shows a table with columns for 'People', 'Partners', and 'CRMs'. Under 'Connected CRMs', it lists 'LeadConnector' and 'LeadConnector - Test'. There's also a 'Restore Default Access' button at the bottom of this section.

- User Added to business(EMPLOYEE OR ADMIN)
- FB Page Admin:
- Ad Account Check:

Page Owner should Match with Ad Account Owner

- Integration Lead Access Check:
If you are still not receiving the leads. Click on

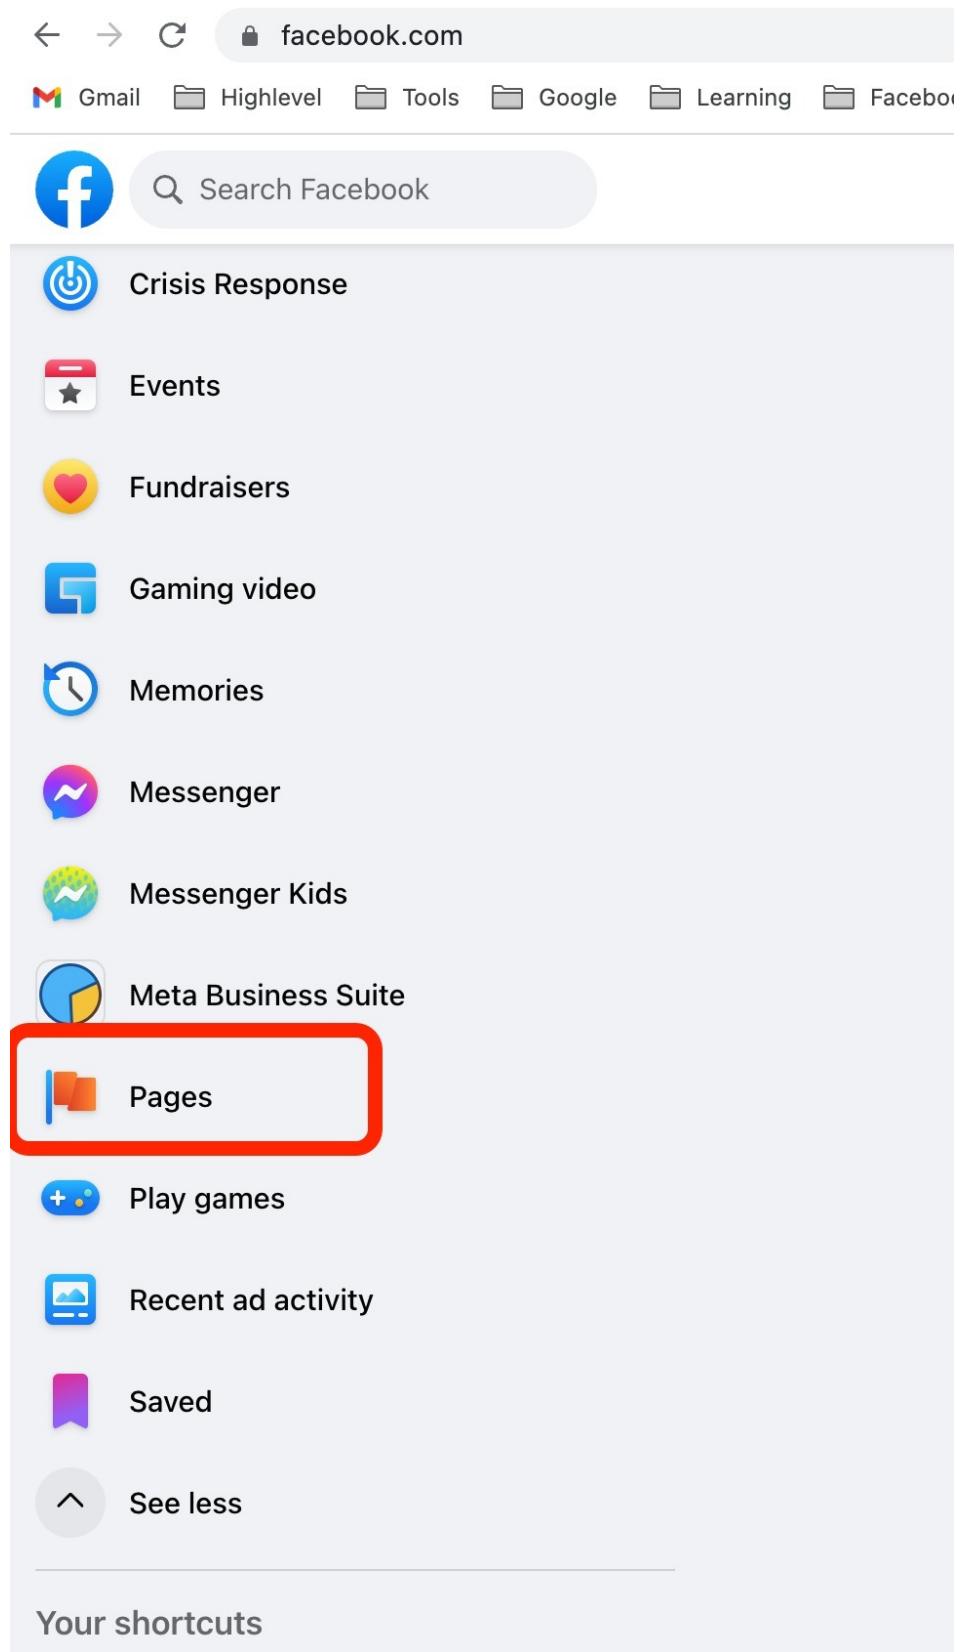

Restore Default Access

it and check it again.

How to connect Instagram Account to the FB page or verify it is connected:

An Instagram account can be connected to a single FB page.

Steps to connect the Instagram page or verify it is connected to the correct FB page

Your shortcuts

Log in to Facebook and click **Pages** in the left menu.

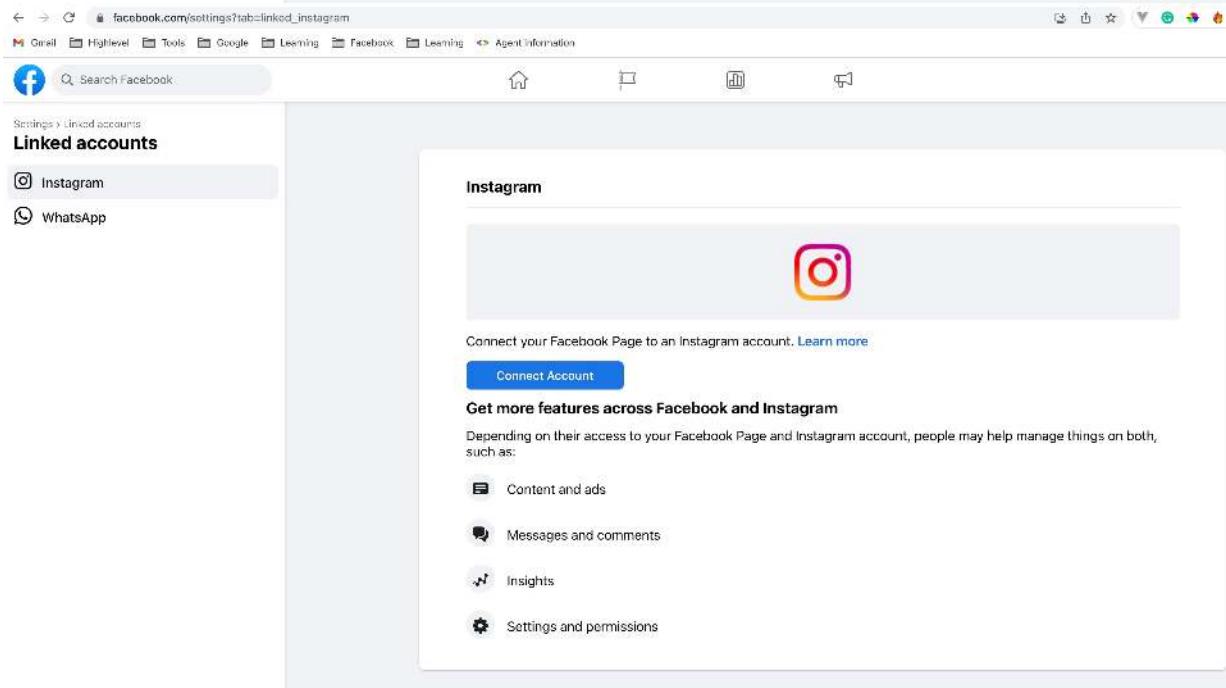

The screenshot shows the Facebook settings interface for a page. The left sidebar lists various settings options: Profile (highlighted in grey), Privacy, New Pages experience, Notifications, Linked accounts, Videos, and Branded content. The main content area is titled 'General Page settings' and shows fields for 'Name' (set to a blurred value) and 'Username' (set to 'You have not set a username'). The bottom of the page includes a footer with links to About, Create ad, Developers, Careers, Privacy Policy, Cookies, AdChoices, and Te. It also includes a Meta © 2023 footer with links to Finnish (FI), English (US), and other language versions.

Facebook Lead Ad Integration & Troubleshooting Guide : CITKNOW

The screenshot shows the 'Linked accounts' section of the Facebook settings. On the left, there's a sidebar with 'Instagram' and 'WhatsApp' listed. The main content area is titled 'Instagram' and shows a profile picture with a blurred face. It includes a 'View on Instagram' button, a 'View Details' button, and a 'Disconnect Account' button. A message states: 'You have access to manage the [REDACTED] Facebook Page, so you also have access to manage the Instagram account. [Learn more](#)'. Below this, under 'Managing connected accounts', it says: 'Depending on their assignment, people who help manage your Page may have access to help manage things on Facebook and Instagram, such as:'. It lists: 'Content and ads', 'Messages and comments', 'Insights', and 'Settings and permissions'. A note says: 'You can review roles in [Facebook Page settings](#)'. A toggle switch is shown as 'on'. At the bottom, it says: 'Allow access to Instagram messages in Inbox' with a note: 'Depending on their Page roles, people who help manage your Page may have access to view and respond to Instagram messages. You can change this in your settings at any time.'

The screenshot shows the 'Linked accounts' section of the Facebook settings. On the left, there's a sidebar with 'Instagram' and 'WhatsApp' listed. The main content area is titled 'Instagram' and shows the Instagram logo. It includes a 'Connect Account' button. Below it, it says: 'Get more features across Facebook and Instagram'. A note states: 'Depending on their access to your Facebook Page and Instagram account, people may help manage things on both, such as:'. It lists: 'Content and ads', 'Messages and comments', 'Insights', and 'Settings and permissions'.

- 1. Select your Facebook page(Switch to the FB page), then click Settings**
- Select Linked Accounts in the left column.**
- Select Instagram, then connect your account.**
- If it is already connected, we can verify this.**

If it is not connected. It will show like below

Pages Missing

If an admin of a page also has their business account associated with the same page, they won't be able to see the page while integrating with HighLevel. The best workaround is to add a second admin to that Facebook page, and have them integrate. Steps to add an admin to the page:

- Log in to Facebook and click on your profile photo in the top right corner.
- Select “See all profiles” and choose the Page you want to grant access to.
- Click the profile picture of your Page in the top right to navigate to your Page.
- Click “Manage,” then select “Page access” on the left under “Your tools.”
- Next to “People with Facebook access,” click “Add New.”
- Click “Next,” and then enter the name or email address of the person you want to grant Facebook access to. Finally, click on their name.
- You can now choose to grant either partial or full control over the Page:
 - For partial control, scroll down and click “Give Access.”
 - For full control, scroll down, click to grant full control, and then click “Give Access.”
- Type in your Facebook password to confirm the action, then click “Confirm.”
- The person you've granted access to will receive an email invitation to accept your invitation to access the Page.

By following these steps, we'll successfully grant admin access to the user who will be connecting the Facebook account from GHL. This will allow them to manage the Page in the new Pages experience. After granting the admin access to the user, they would be able to successfully add the Facebook page to GHL.

This is temporary, we are working with Meta to get this fixed, reported here <https://developers.facebook.com/community/threads/712197940934624/>
