How to set up LC Email Dedicated
Domain using GoDaddy

Step-by-step LC Email Dedicated Domain Setup - GoDaddy

1. Once you are in the sub-account > Click on Settings > Email Services > Dedicated Domain > + Add Domain

Check out [How to Migrate My Agency Over to LC - Email](#)

2. If your Domain is companyname.com, you can set up the main Domain or sub-domain with.

Check out [How to move a sending domain from Mailgun to LeadConnector?](#)

Main Domain:

If you are adding the main Domain, [it should not be used with Gsuite or any other email provider](#)

How to set up LC Email Dedicated Domain using GoDaddy

Sub-domain:

- To set up the subdomain, you can type **ANYTHING_HERE.companyname.com**
 - Examples:
 - replies.companyname.com
 - support.companyname.com

3. Click on **Add & Verify**

Add new domain
Sending from a dedicated domain improves the likelihood of landing in the inbox.

Enter Domain Name
mg.mydomain.com
Use only lowercases in domain name.

- Your domain [] will be moved to LeadConnector account.
- New DNS records will be provided.
- Update DNS records with your DNS provider (note that this is not done within LeadConnector account).
- Verify and apply your domain.
- Domain logs get lost from your MailGun account.

Use subdomain with Leadconnector
We recommend using a subdomain with Mailgun, like 'mg.mydomain.com'. Using a subdomain you will be able to send emails from root domain. e.g: 'you@mydomain.com'. If using a subdomain please make sure that you configure MX records for the subdomain for optimal delivery.

Email warming process
When you start sending through your dedicated domain, inbox providers begin calculating your domain's sending reputation. In the first 2-4 weeks of sending, limiting your email sending to only engaged recipients will help you generate a strong sending reputation.
If your sending goals do not permit this, please consider moving to a dedicated sending domain at another time.

Click the same button to **Verify Domain** again if some records are still not showing the green checkmark

Once you add all the DNS records and verify, you can make sure the [SSL Certificate for Dedicated Sending Domain \(LC - Email\)](#) is all set.

Then we could send a test email to see if everything works! Click [here](#) to learn [How to send a test email in the Conversation](#)

Build God's House with Excellence

Whatever you do, let these verses inspire you to carry out all your tasks with dedication, excellence, and a sincere heart aimed at honoring God.

Colossians 3:23-24 "Whatever you do, work at it with all your heart, as working for the Lord, not for human masters, since you know that you will receive an inheritance from the Lord as a reward. It is the Lord Christ you are serving."

Proverbs 16:3 "Commit to the Lord whatever you do, and he will establish your plans."

Ephesians 6:7-8 "Serve wholeheartedly, as if you were serving the Lord, not people, because you know that the Lord will reward each one for whatever good they do, whether they are slave or free."

Galatians 6:9 "Let us not become weary in doing good, for at the proper time we will reap a harvest if we do not give up."
