Timezone in Forms and Surveys

Timezone in Forms and Surveys

The incorporation of the Timezone feature into your forms and surveys plays a pivotal role in ensuring precision in timestamping responses and gaining a comprehensive understanding of the geographical distribution of your audience. This detailed guide aims to elucidate the significance of integrating Timezone functionality, offering insights into its applications, and providing comprehensive instructions on how to seamlessly implement and manage Timezone data within your forms and surveys.

Enabling the timezone feature

The screenshot shows a web browser window with the URL 'app.gotriangle.com/v2/location/DKzAnbNKNDMyCQe0Tmz/form-builder-v2a5k9BJq8djo5KGIPLLz'. The browser's address bar and tabs are visible. The main content area displays a form titled 'Contact' with a blue header and a white body. The form includes a heading 'Let's Work Together!', a subheading 'Have a project? Fill out this quick brief, and we will be in touch soon.', and several input fields for 'Full Name', 'Email', 'Project Budget', and 'Project Deadline'. Below these fields is a section titled 'Project Requirements' with a list of checkboxes: 'Logo', 'Favicon/icon', 'Website', 'Business Cards', 'Package Branding', 'Blog Design', and 'Other'. To the right of the form is a settings panel with tabs for 'Styles', 'Themes', and 'Options'. The 'Options' tab is selected, showing various settings including 'Facebook Pixel ID', 'On Page View', 'On Survey Submission', 'Form Settings', 'Sticky Contact', 'Use GDPR Compliant Font', and 'Enable Timezone'. The 'Enable Timezone' toggle is currently turned on, indicated by a blue switch.

You can find this feature under options in timezone. By default, it is enabled and can be turned ON or OFF from here.

Utilizing from Submissions

The screenshot displays the 'Submissions' page in the Gohighlevel interface. On the left is a sidebar with navigation options like Agency, Dashboard, and various marketing tools. The main area shows a list of submissions for 'All Form'. A table lists several submissions, including one from 'Hamish Booker' with email 'jyano@test.com' and a submission time of 'Nov 26th 2023'. To the right of the list, a detailed view for 'Hamish Booker' is shown, including fields for Full Name, Email, Project Budget (\$70000), Project Deadline (March 2024), Project Requirements (Logo Website Package Branding Blog Design), Additional Information (Test), and Timezone (Asia/Calcutta (GMT+05:30)). Below this, a 'Page detail' section provides metadata such as URL, medium (form), source (Direct traffic), and various IDs.

Full Name	Hamish Booker
Email	jyano@test.com
Project Budget	\$70000
Project Deadline	March 2024
Project Requirements	Logo Website Package Branding Blog Design
Additional Information	Test
Timezone	Asia/Calcutta (GMT+05:30)
