How to import a Funnel From
ClickFunnels

The ClickFunnels to GoHighLevel importer is useful for individuals or businesses looking to switch from ClickFunnels to GoHighLevel and want to migrate their existing funnels and pages without rebuilding them from scratch. It could save significant time and effort, particularly for those with many funnels or pages to transfer.

Please Note:

- This imported will work for both ClickFunnels 1.0 & ClickFunnels 2.0 Funnels.

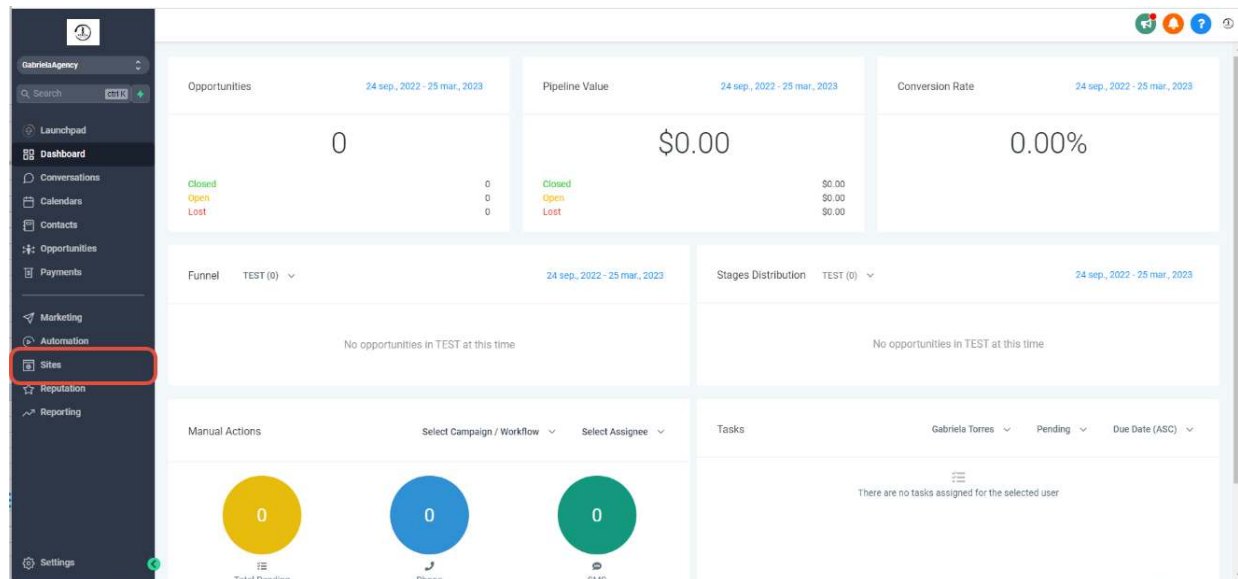

- **Please ensure that you utilize the publishable (live) link, and not the shareable click funnel link.**

How to import a click funnel page into the high-level funnel builder?

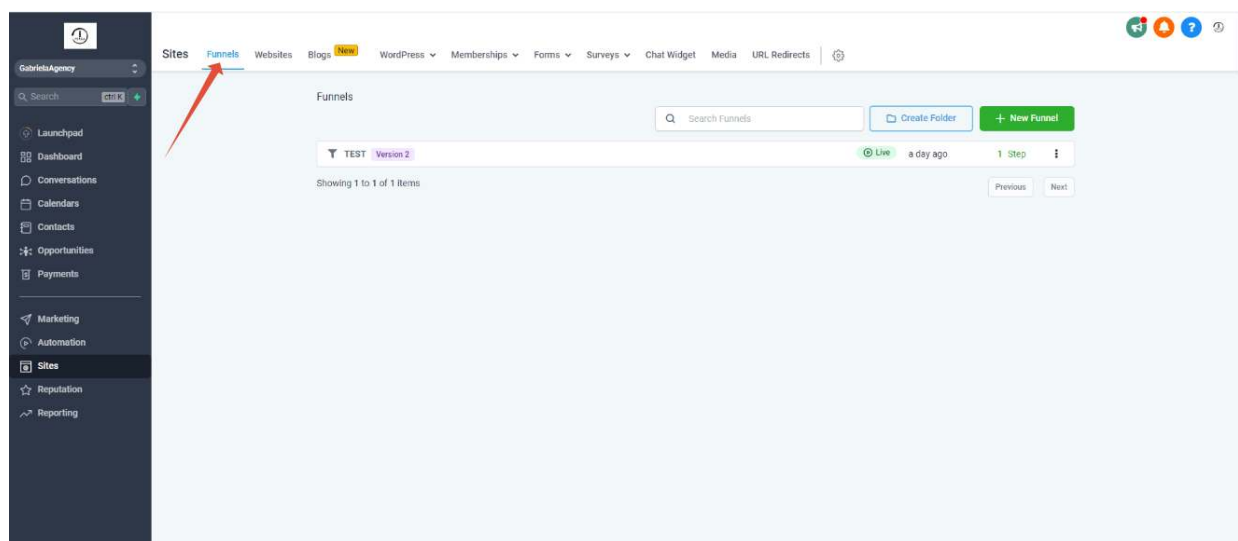

- **Step 1:** Click on Sites
- **Step 2:** Click on Funnels
- **Step 3:** Click on "New Funnel"
- **Step 4:** Click on "Add a new step"

Step 1: Access the template list view

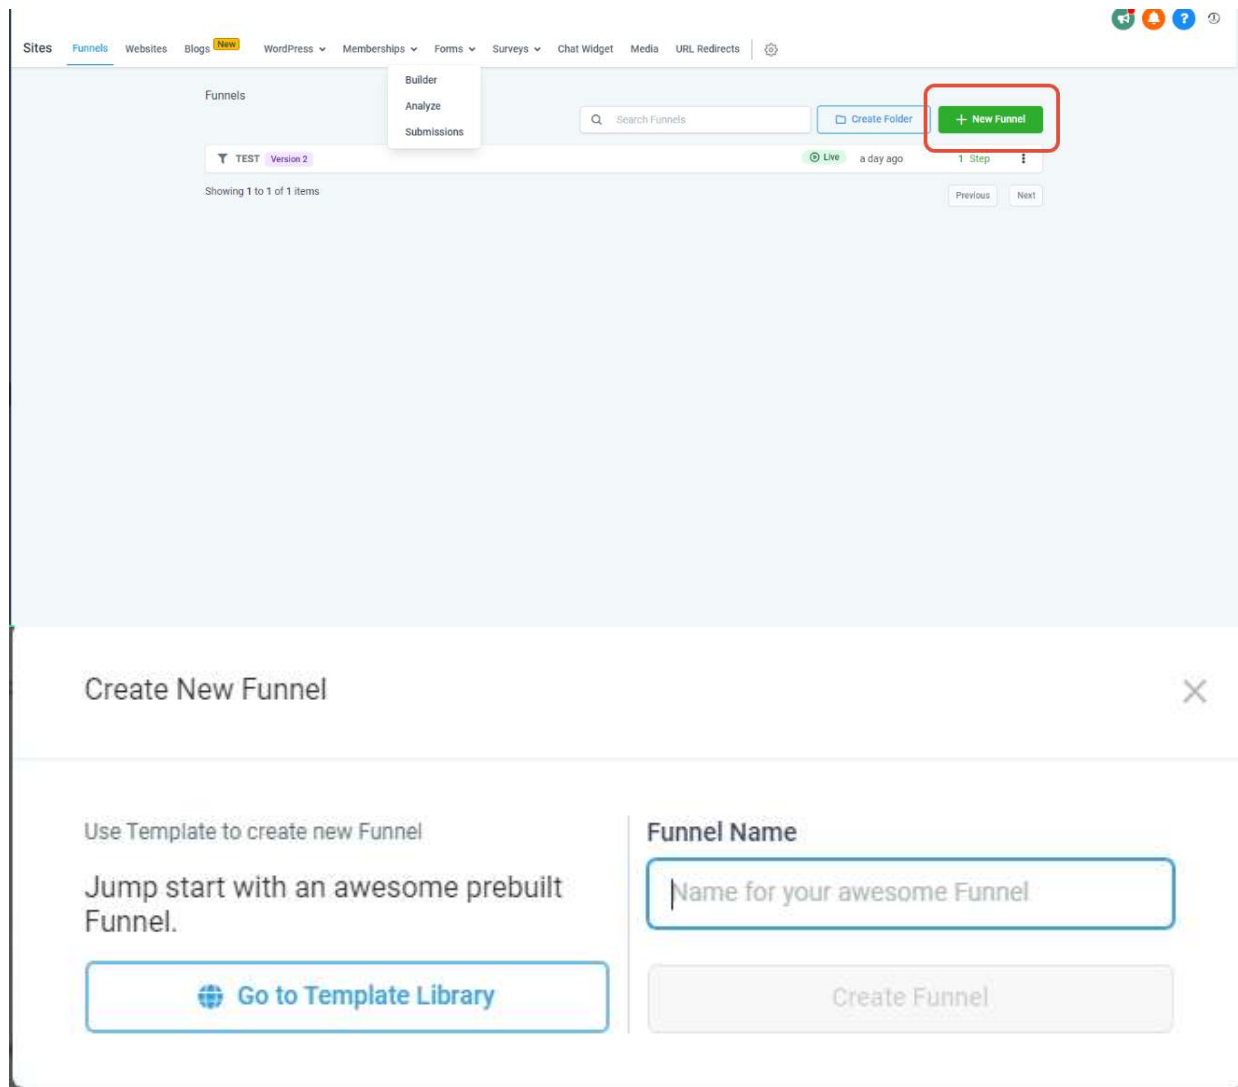

Explain the relevant actions to be performed.

The click funnel import will only work within funnels.

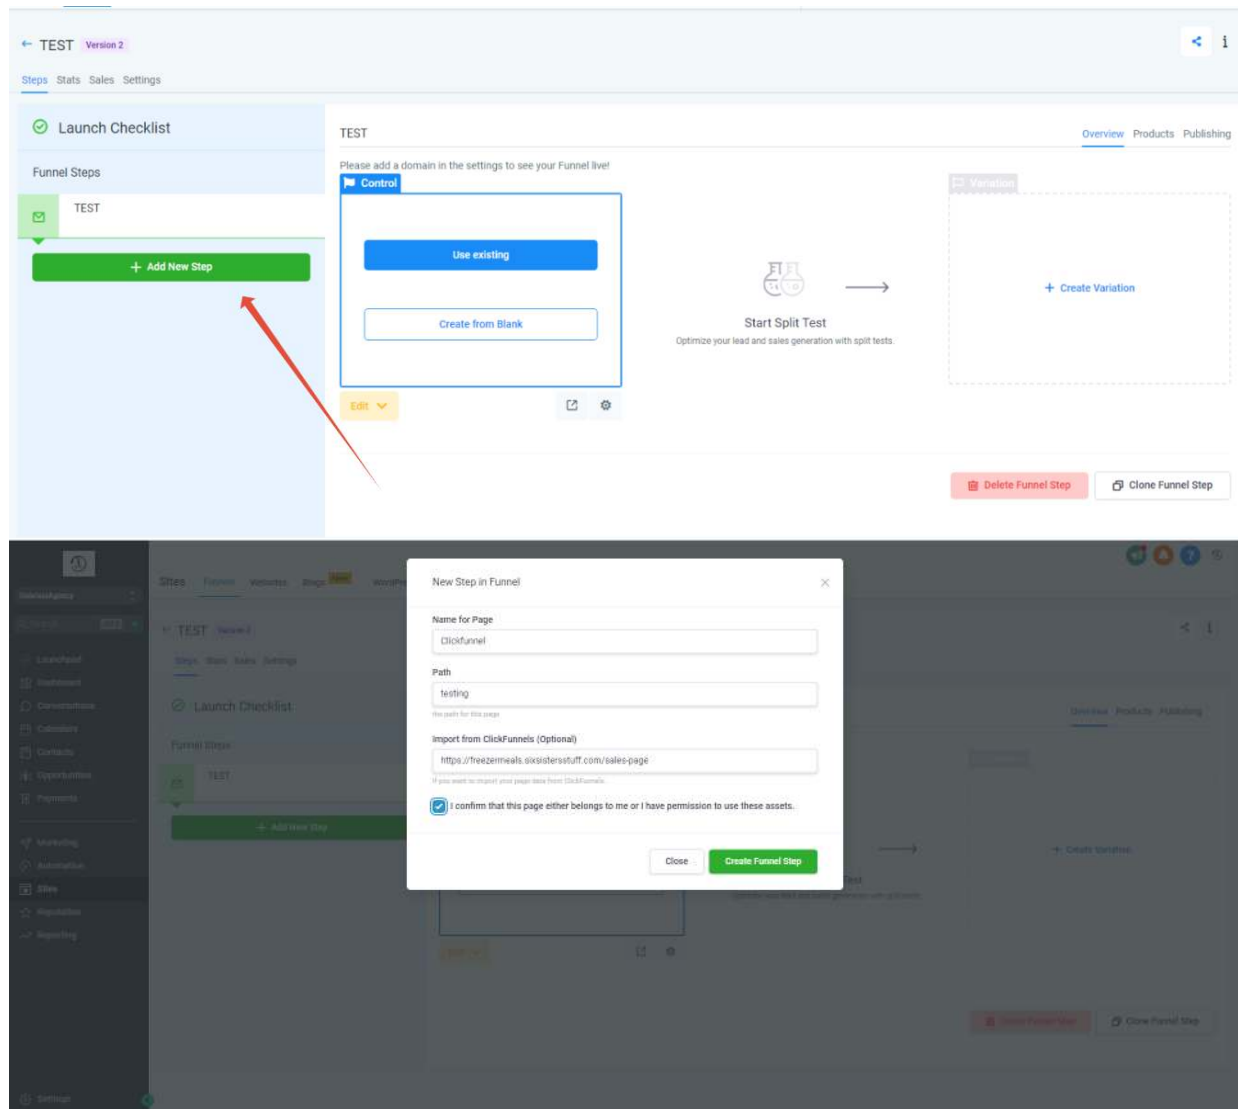

Step 3: Create a new funnel

- Explain the actions under this step.
- Add the name and click "Create funnel."

Step 4: New step

- Click on "Add new step."
- Add the name for the page, path, and Clickfunnels link, mark the confirm checkbox, and click "create funnel step."
