10 Unknowns You Must Know Before Choosing AI Products

1. **Are there hidden costs with AI tools?**
   Yes, many AI platforms appear affordable at first, but costs can increase as your usage grows. Always compare pricing at different scales (e.g., 1,000 vs. 10,000 customers) to avoid surprises.

2. **Will the AI integrate with my existing systems?**
   Not all AI tools connect seamlessly with your POS, CRM, or booking platforms. Before committing, confirm whether the solution integrates with your current software ecosystem.

10 Unknowns You Must Know Before Choosing AI Products

3. Who owns the data collected by AI?
Some providers use your customer data to train their AI. Always ask about data ownership, storage location, and privacy policies to ensure your business remains in control.

4. How accurate is AI for my industry?
AI can sometimes misinterpret slang, accents, or industry-specific terms. Test accuracy with real-life examples from your business before full adoption.

10 Unknowns You Must Know Before Choosing AI Products

5. What happens if the AI fails?
AI should never operate in isolation. Look for tools that allow seamless human takeover when customers need a personal touch.

6. Do these tools come with training and support?
Low-cost platforms often lack proper onboarding and support. Ask whether your vendor provides staff training and ongoing assistance.

10 Unknowns You Must Know Before Choosing AI Products

7. How do I know the vendor will be around long-term?
Some startups disappear quickly. Review the provider's history, client base, and roadmap to ensure long-term stability.

8. Is the AI compliant with my industry regulations?
Restaurants may need PCI compliance, HIPAA for health-related data, or alcohol-sale rules. Always confirm compliance before implementing.

10 Unknowns You Must Know Before Choosing AI Products

9. Can the AI be customized to my business?
   Generic AI may not understand your menu, services, or promotions. Choose a solution that can be tailored to your unique needs**.**

10. Will AI improve my customer experience?
   AI should simplify communication, speed up responses, and reduce friction. If it frustrates customers, it's not the right solution. Always test from the customer's perspective.
