Automated Logic

WE MAKE BUILDINGS BETTER.

BUILDING CONTROL SOLUTIONS MADE POWERFULLY SIMPLE.

Buildings are more than just places to work, learn and collaborate. With the right approach, they provide opportunities for improving health and safety, meeting sustainability objectives and driving efficiency and progress. As a Carrier company, Automated Logic has been helping owners and operators seize those opportunities with confidence for over 45 years.

With a range of intuitive products and a network of over 250 authorized partners, we're enhancing the way our customers control and monitor heating, air conditioning, lighting and other essential building functions. Together, we can create innovative building management solutions that optimize operations, ensure occupant comfort and make buildings better.

INTELLIGENT BUILDINGS FOR ANY INDUSTRY.

Better buildings require intelligent solutions – and Automated Logic makes them easy to implement. Working together with our customers, we bring all their building systems together into one cohesive ecosystem for complete control, management and reporting. Our expertise spans the spectrum of commercial buildings, **including data centers, K-12 and higher education institutions, healthcare facilities, commercial offices and more.**

WEBCTRL® BUILDING AUTOMATION SYSTEM.

Empowering customers to optimize building performance, comfort and sustainability takes a wide range of hardware, software and expert services. And it's all centered around our premier WebCTRL system. With an intuitive interface that's accessible from anywhere on any web-enabled device, it provides unsurpassed freedom, flexibility and control.

Here are the things that make our WebCTRL system stand out:

- **Simple, intuitive user interface**
- **Built on open standards for full interoperability with other systems**
- **Customizable graphics and dashboards**
- **Simple licensing model, with no limit on concurrent users**
- **High-speed, native BACnet controllers**
- **Powerful analytics tools and built-in energy, ESG and GHG reporting**
- **Library of ASHRAE Guideline 36 control sequences**
- **Fault Detection and Diagnostics (FDD) and live control logic for troubleshooting**
- **Can be deployed on-premise or in the cloud**
