Pass IT On, Inc.

a 501 (c) 3 Non Profit Organization

Transforming Cybersecurity Training and Careers

Understanding the Challenge in Today's Cyber Job Market

At Pass IT On, a 501(c)(3) nonprofit, we believe that real-world experience is essential to complement industry-recognized certifications. That's why our comprehensive training not only includes certification paths but also provides opportunities to work on professional IT projects. Our programs ensure that under-served youth, adults, and transitioning military personnel acquire both the knowledge and practical skills needed to thrive in the cybersecurity field.

- **Cybersecurity Certification Tutoring & Bootcamps Offered:**
  Net+, Sec+, CySA+, and CISM through us and our training partner **Threatelligent LLC.**

- **Training Focus:**
  Cyber ranges, immersive simulations, real-client projects with subject matter experts guidance.

Certification Preparation

- Dive deep into courses for critical cybersecurity certifications.
- Features live and online bootcamps, or private tutoring.

Capture The Flags (CTFs)

- Hands-on virtual cyber ranges simulating real-world scenarios.
- Focuses on practical skills like gap analysis and incident response.

Client Project Experience

- Operationalizing certification knowledge with real project experience.
- Tailored for entry-level professionals, enhancing skills and marketability.

THREATELLIGENT

CYMANII

Network+ Certification   VS   Security+ Certification

Ideal for

Individuals wanting to build a career in network administration and those with foundational IT knowledge seeking to expand their networking skills within cybersecurity.

Ideal for

Those wanting foundational cybersecurity knowledge to expand their IT career and to land an entry-level position in cybersecurity.

Provides essential networking skills and knowledge that prepares individuals for network support and administration roles.

How do they differ?

Security+ validates foundational IT security skills that are necessary for core IT security functions and for the pursuit of higher-level security certifications.

CYMANII

PASS IT ON

CISM Certification **VS** CYSA+ Certification

Ideal for

Those focusing on management and strategy in information security and who have significant experience in information security management

Ideal for

Those seeking to enhance their skills in cybersecurity analysis and gain practical experience in detecting and mitigating cyber threats and vulnerabilities.

CISM focuses on managing and governing enterprise information security programs with an emphasis on risk management and business continuity.

How do they differ?

CySA+ focuses on the operational and analytical aspects of cybersecurity, emphasizing practical skills in threat detection and incident response.

Cyber Community Partnerships

Strategic Relationships for Cultivating Tomorrow's Cyber Workforce

Partner with **Pass IT On, Inc.** to cultivate a pipeline of entry-level cybersecurity talent tailored to meet your company's specific needs while dynamically addressing community and industry challenges.

Here's an overview of our Cyber Community Partnership Program in 3 steps:

How Our Program Works:

1 **Interview:** Pass IT On meets with community business stakeholders to discuss and identify qualities that make a strong entry-level cybersecurity job candidate in their particular organization and industry.

2 **Customize:** Leveraging those insights, we, along with our training partners, develop cyber ranges, Capture the Flag (CTF) exercises, and mini apprenticeship opportunities that incorporate some of the challenges an entry-level professional would face.

3 **Present:** Attend or sponsor CTF competitions, then review assessment reports of participants. Track apprenticeship activities that highlight potential job candidates. Gain direct access to a pipeline of skilled entry-level talent.

About Pass IT On, Inc

Mission Alignment
As a 501(c)(3) nonprofit, we are deeply committed to developing impactful IT education and training programs that address both current and future community needs.

Community Engagement
Our initiatives are designed to integrate closely with local businesses and organizations, ensuring that our training programs are both relevant and beneficial to the community and industry.

Practical Activities
Our training is continuously updated to reflect the latest industry standards and needs, preparing candidates who can make immediate contributions to your security efforts.
