

Established in 2022, provides support activities for forestry, environmental consulting, construction, and fire mitigation services. The company specializes in wildfire prevention, land management, building maintenance, and restoration. Using drone technology and ground surveys, it delivers defensible space planning and risk assessment. Robertson Mitigations & Services LLC is registered for all federal awards, accepts government purchase cards, and is listed in the disaster response registry. The company offers bonded construction services and complies with industry standards for forestry, environmental safety, and infrastructure projects.

Our Solutions

Support Activities for Forestry

Land management, brush cutting, tree thinning, wildfire prevention, and fuels management services.

Environmental Consulting Services

Risk assessment, conservation planning, and environmental compliance consulting.

General Construction & Renovation

New construction, remodeling, framing, roofing, plumbing, flooring, insulation, drywall, and tile work.

Fire Mitigation & Defensible Space Planning

Creation of fire-resistant zones using drone technology and ground-level surveys.

Why Choose Us?

- Uses drones and ground surveys for precise fire mitigation and defensible space planning.
- Registered for rapid deployment in land restoration, facility repairs, and emergency mitigation.
- Specializes in sustainable land management, fuels reduction, and environmental compliance.
- Provides multi-sector solutions in fire safety, forestry, construction, and facility maintenance.
