# AUGUST & WONDER
## "THE MARKET" OWNER'S GUIDE

## STEP 1 - UNBOXING

Peel the copper paper sleeve off the your Market's case by reaching around the back and pulling up from the bottom. Set aside or recycle.

Open the latch on the front of the case and lift the lid to reveal:

1. Your Market Sculpture
2. USB cable
3. USB charger plug

Take a moment to enjoy the view!

## STEP 2 - DOWNLOAD THE AUGUST & WONDER APP

You need to download the August & Wonder app for your iOS or Android device control setup up and control your Market.  Download and install from the Apple App Store or Google Play

**For Apple iOS devices:**

https://itunes.apple.com/us/app/august-wonder/id1395931735?mt=8

**For Android devices:**

https://play.google.com/store/apps/details?id=cc.blynk.appexport.augustnwonder
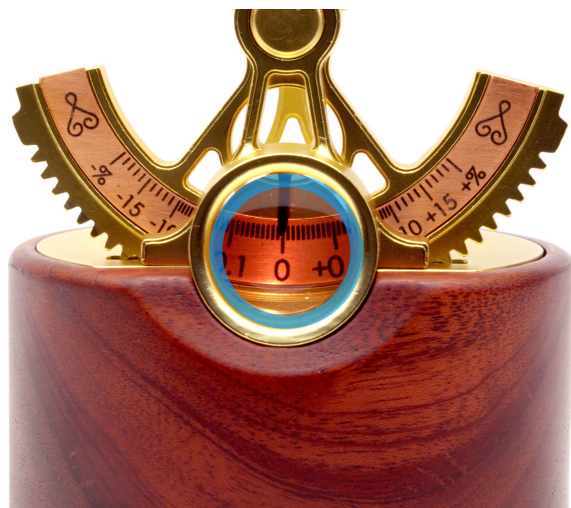

## STEP 3 - UNBOX AND SET UP YOUR MARKET

Lift the market sculpture out of the case. Note your Series letter and number etched on the back support end cap of your Market.

FOR CORDLESS VERSION ONLY:
Tilt upside down to look at the bottom plate.
Pull the plastic battery connection tab that extends out of one of the vents so it comes completely out. Discard.

Your Market will power on once the connection tab is removed. The scope light should breathe blue.

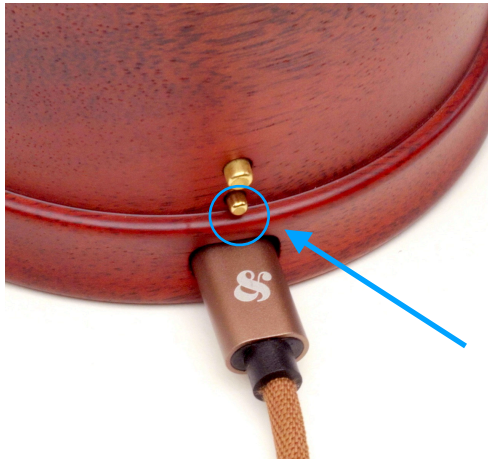

FOR BOTH VERSIONS
•   Take the USB charger and cable out of the case
•   Plug the USB cable into the charger
•   Plug the small end of the USB cable into the back of the Market
•   Plug the plug end of the of USB charge into a standard wall outlet

## STEP 4 - POWER ON AND CONNECT YOUR MARKET TO WIFI

If the scope light on the front of The Market is not on and breathing blue, power on your Market by

pushing the lower reset button on the back of your Market, The scope light on the front of the should breathe blue.

We'll use the August & Wonder app to connect and configure your Market.
Open the August & Wonder app on your iOS or Android device.
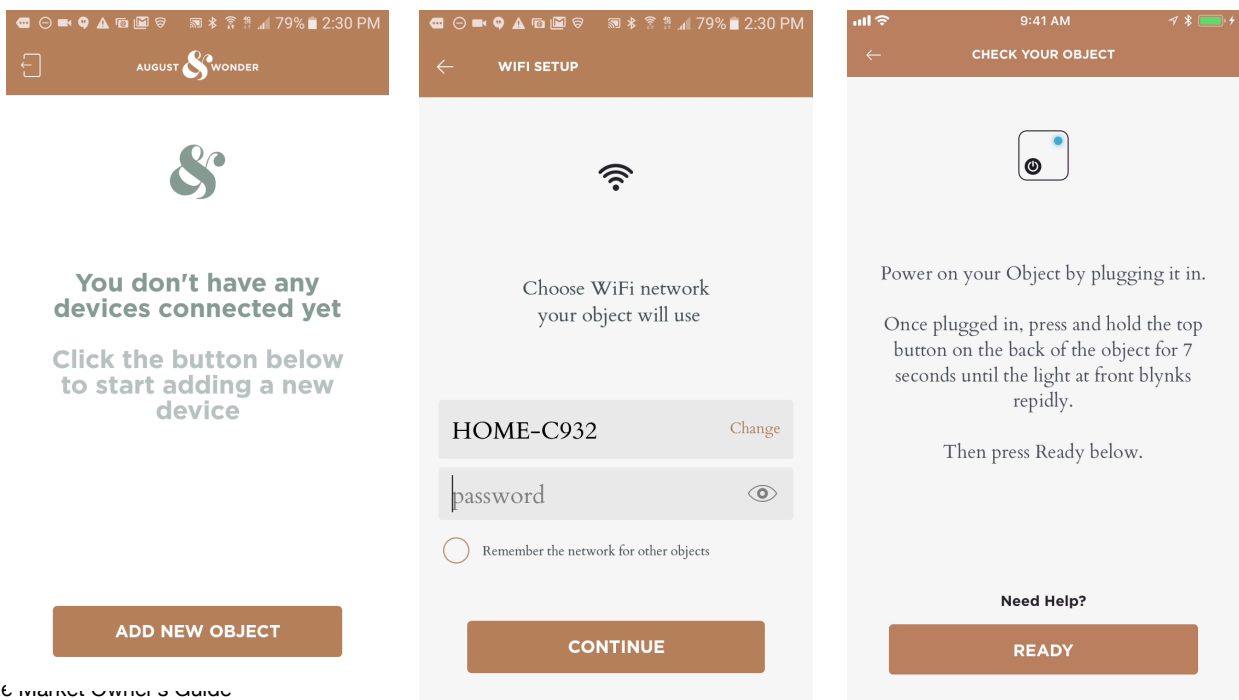

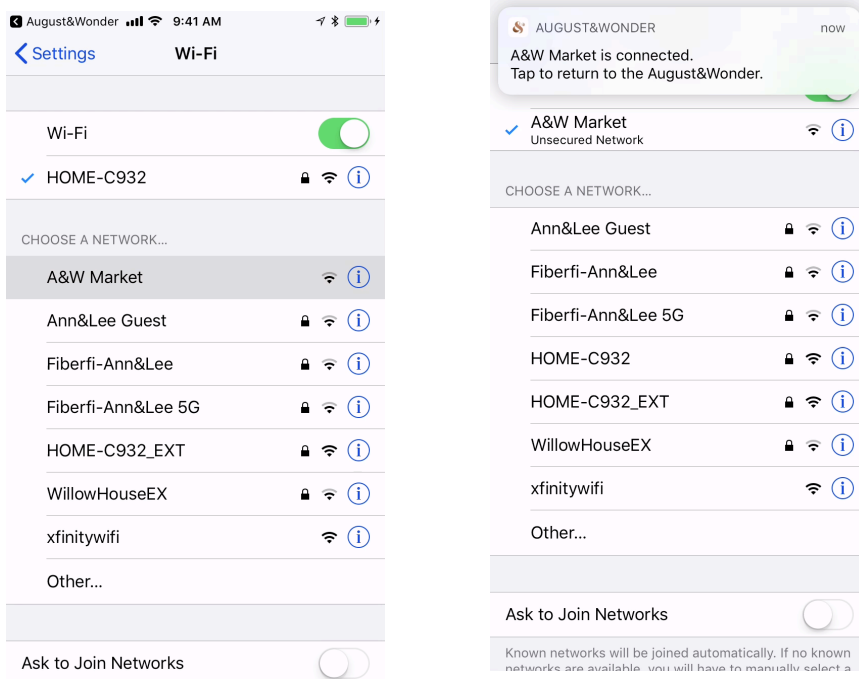

Create your account by entering

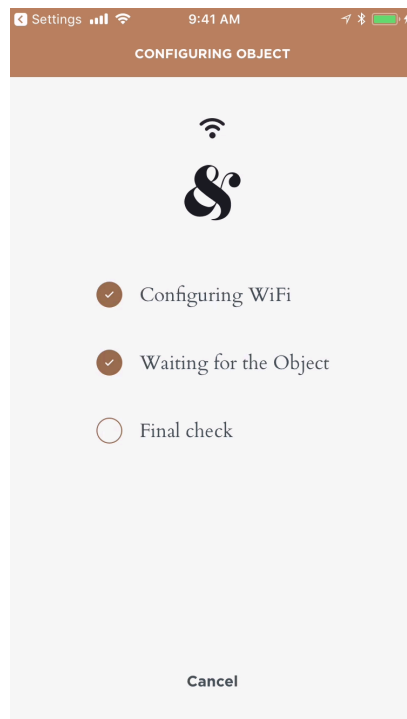

your email and creating a password:

Set up your Market, by following the steps in the App. Tap Add New Object, then enter the WIFI Network name and password your Market will use and tap Continue. Your scope light should already be pulsing blue. If it isn't, make sure your market is powered on and then hold the top

**iOS** – The app ask you to go to Settings > WIFI. Your Market will appear in the list based on how you named it. Select your Market and you will see a notification for you to go back to the August & Wonder app.  Tap the notification to go back to the app and setup will complete.

**Android** – the App will configure your Market.

Once setup is complete, your Market will perform a calibration by tilting all the way to the left, then all the way to the right, then to center. It will then tilt to indicate the currently selected index or cryptocurrency
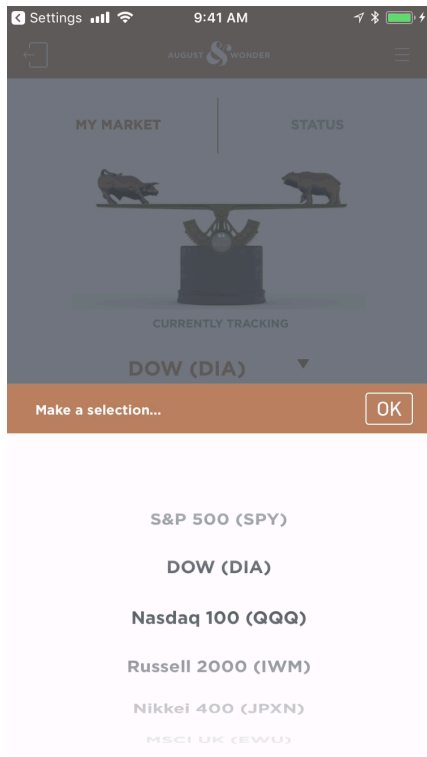

## STEP 5 - CONFIGURE YOUR MARKET

**My Market Tab**

The My Market Tab enables you to select which Index or Cryptocurrency you would like to track and how often to update.

The My Market tab will also show you the current percent change, the current value of the Index (based on the ETF that tracks it shown in parentheses) or Cryptocurrency and the last time of update, current status.

## Selecting Index or Cryptocurrency

To select the Index or Cryptocurrency to track, tap on the name of the index/cryptocurrency currently being tracked and a scrolling pick list will appear. Scroll to the index or cryptocurrency you want to select and tap done. The Market will then pulse amber, status will read updating and the Market will then tilt into position.
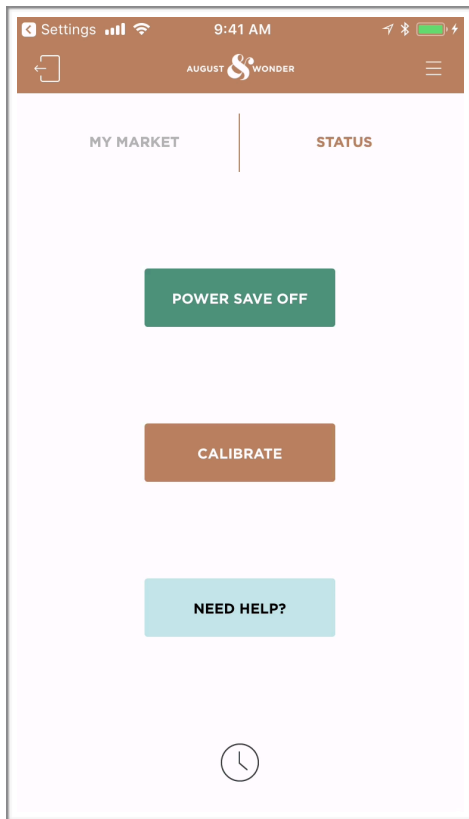

## Setting update interval:

Tap on the current update interval and a scrolling pick list will appear. Scroll to the interval you you want to select and tap done. Your Market will now update at that interval.

Please note for battery operation, the longer the interval, the longer the battery will last between recharging.

## STATUS TAB

The Status Tab enables you to control whether the market operates in power saving mode (for cordless operation), calibrate your Market, and get Help.

**POWER SAVE ON/OFF (for cordless version).**
Tapping the Power Save On/Off will toggle on or off the Market's power saving features. Power save greatly enhances the battery life of the Market. When Power Save mode is enabled, the Market will go into deep sleep between updates. It will also go to sleep mode when the trading day for the Index selected ends, and wake up when the trading day begins. Because cryptocurrencies trade 24/7, the Market will only sleep between update intervals.

While in deep sleep mode, the Market will not respond to the app. You can wake from deep sleep by pressing the lower reset button on the

Because cryptocurrencies trade 24/7, the Market will only sleep between update intervals.

**CALIBRATE**
If the Market is jostled or if it stops reading accurate, tap the calibrate button and the market will perform a full calibration, tilting all the way left, then all the way right, then centering before moving to reflect current percent change
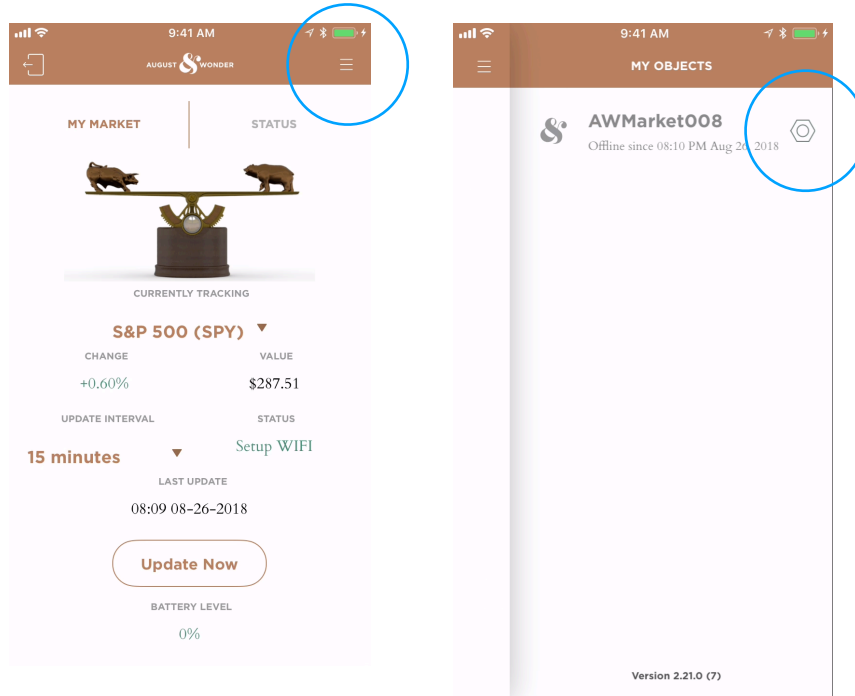

**NEED HELP?**
This button will take you to the August & Wonder support page.
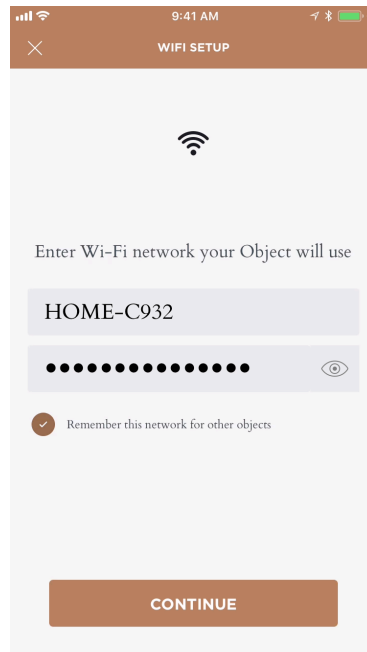

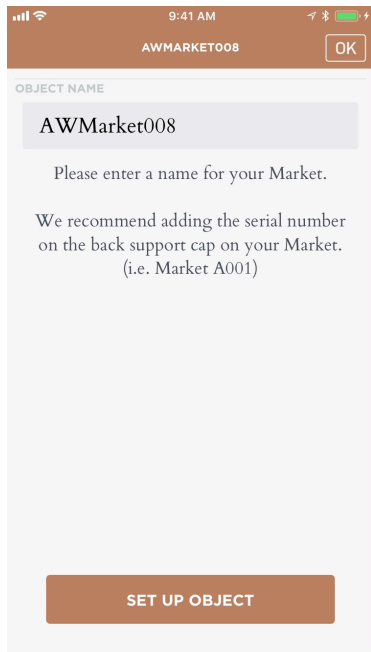

## CHANGING WIFI NETWORKS

If you need to connect your Market to a different WIFI network, follow the steps below.

Open the August & Wonder App on your phone or tablet. Tap the Menu symbol at top right to open the Menu. Then Tap the settings symbol at the to enter Setup.

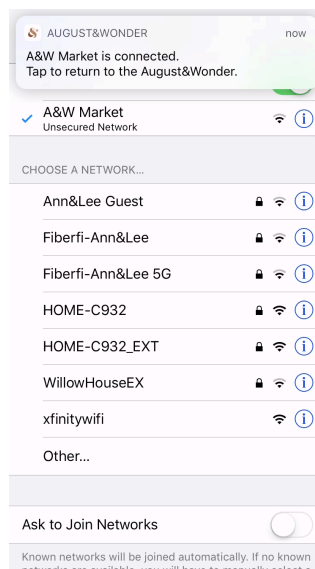

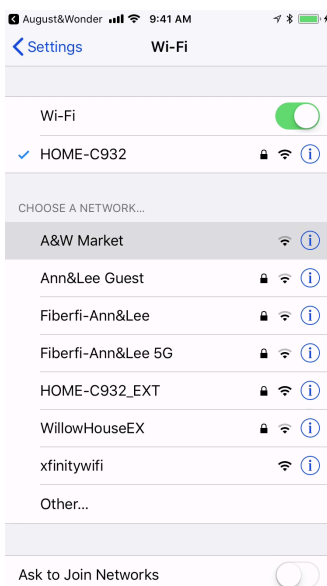

Enter WIFI network name your Market will use and enter the password for that network. Tap continue and then choose your Market from the list. If you'd like to change the name of your Market, you can do so, otherwise tap Set Up Object.
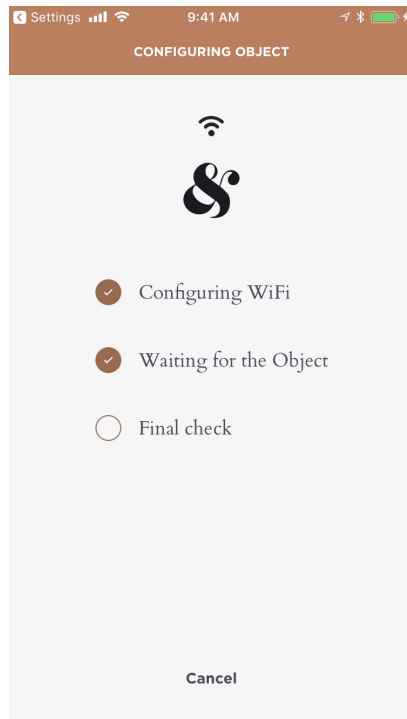

On the back of your Market, hold the top button for 10 seconds until it the scope light blinks white, then release.The scope light will start to breathe blue. Tap the Ready button on the App. Then choose A&W Market from the list.

iOS – The app ask you to go to Settings > WIFI. Your Market will appear in the list based on how you named it. Select your Market and you will see a notification for you to go back to the August & Wonder app.  Tap the notification to go back to the app and setup will complete.

**Android** – the App will configure your Market.

Once setup is complete, your Market will perform a calibration by tilting all the way to the left, then all the way to the right, then to center. It will then tilt to indicate the currently selected index or cryptocurrency

## SCOPE LIGHT MEANINGS:

Breathing amber – updating
Breathing blue – in access mode
Flashing green – trying to connect to WIFI network
Flashing blue – looking for the finance server
