

Notice of Liability to the Chelan-Douglas Board of Health

Submitted to the Chelan-Douglas Board of Health on July 15, 2024

On behalf of the people of Chelan and Douglas Counties, in the State of Washington, we hereby place the Chelan-Douglas Board of Health (Board of Health), supervising the Chelan-Douglas Health District, as a corporation and as individual directors, on notice that:

- I. Your actions and omissions, both during and following the Covid-19 public health ‘emergency’ declared in 2020 contributed to mass harm and human suffering, including psychological and emotional distress, financial loss and/or monetary damage, loss of learning, loss of freedom to gather to worship, physical harm, and even loss of life upon the people of Chelan and Douglas Counties.
- II. Said actions and omissions include administering tens of thousands of insufficiently tested SARS-CoV-2 gene therapies, falsely termed ‘vaccines,’ denying proper informed consent to those receiving the ‘vaccines,’ recommending against implementation of proven safe and effective interventions, recommending and enforcing unscientific masking protocols and inhumane and anti-scientific ‘social distancing’ measures, distributing and administering ineffective and fraudulent PCR tests that incited unwarranted fears and were subsequently used to grossly exaggerate impacts of the ‘pandemic’ and create false ‘casedemics’ in order to justify unlawful and unwarranted ‘lockdowns,’ business closures, school closures, and restrictions on religious gatherings and other social and personal interactions;
- III. Said actions and omissions were undertaken, and some continued for over 4 years despite this board being presented credible scientific and medical findings and other information documenting significant concerns regarding the safety and efficacy of the ‘vaccines’, efficacy of the testing and treatment protocols, and the adverse social, educational, and economic consequences of your pronouncements and enactments. This information was accompanied and supported by additional information and pleas from the public to investigate, reevaluate, and rescind your chosen course of action.

IV. By this Notice, we demand that, with immediate effect, you, the Chelan-Douglas Board of Health, cease and desist from taking further actions involving unscientific, medically unsupported, and any and all other deceptive, false/or fraudulent communication to the people of Chelan and Douglas Counties, thereby causing or resulting in the type of physical, social, and economic outcomes enumerated in this Notice. The conclusion of this Notice contains a full list of our demands.

Notice of Personal Liability

We also put you on notice that failure to cease and desist from continued or repeated involvement or implication in the above actions or omissions and resulting harms may render you liable both in your personal and corporate capacity. As individuals, you may be investigated for criminal conspiracy to inflict harm upon the public by commission of your actions or through your negligence, or other violations of criminal law as well as liability under civil law. As a corporation, you may be investigated for gross negligence, misconduct in public office, corporate fraud, and potential criminal or civil liability for the deaths, personal injuries, and monetary and other damages resulting from your misconduct.

Further to the above Notices, and to clarify our position, may we respectfully remind you of your legal responsibilities as members of this board.

Duties of a Local Board of Health (RCW 70.05.060):

“Each local board of health shall have supervision of all matters pertaining to the preservation of the life and health of the people within its jurisdiction.”

And from Chelan-Douglas Health District’s own website:

“The Board sets county-wide policies and regulations to protect and promote the health of residents of Chelan and Douglas Counties.”

When carrying out your duties as a local board of health, you are obligated to consult with a diversity of experts, including those who might disagree with your recommendations on health, to ensure that best practice is ethically and objectively demonstrated in your efforts to uphold the

life and health of the public. Relying solely on information and recommendations provided by Centers for Disease Control and Prevention (CDC) and the Washington Department of Health when making decisions affecting the people within your jurisdiction is not adequate and does not meet the standard for best practices for upholding life and health of the public.

As early as 2020, international experts were cautioning against the novel Covid strategies recommended by the Board of Health, especially, but not limited to the experimental modRNA medical technologies developed to function purportedly as vaccines. This information was provided to the Board of Health on numerous occasions.

By your recommendation and implementation of harmful Covid practices, the community, represented by the Board of Health, does not believe that you have acted in good faith and in accordance with your duties under RCW 70.05.060. **If your actions are found to be in contravention of your duties or violated the rights of the people you are assigned to protect, you will not be covered by established liability immunities. In other words, you may be personally liable for any deaths and suffering caused on account of your role in the unlawful and harmful implementation of recommendations or omission of information when you knew or should have known they would result in harm.**

Consequences of the Board of Health Covid Policies, Mandates, Recommendations, Advice, and Omissions

A. Immeasurable suffering and death

In the past four years, many people who trusted and complied with Chelan-Douglas Health District's public health advice have experienced ongoing physical and mental suffering, illness, disability, loss of income, poverty, loss of opportunity, loss of learning, child abuse and other violence, adverse reactions, and even death as a result.

B. Human rights violations

Local governments, businesses, schools, health care facilities, and senior care facilities implemented severe emergency measures based on the Chelan-Douglas Health District's recommendations resulting in flagrant violations of fundamental human rights. Businesses were shuttered and their employees laid off. Employees were fired or were coerced to leave the workplace for non-compliance. People died alone in the sterility of a hospital. Elders were

denied access to their families. Many children were forced to endure abusive situations at home without the respite of going to school. All were denied their freedom to gather for worship. Boys, girls, and babies were masked and injected with experimental drugs. During all of this, the Board of Health did nothing to address or even investigate reports of the harm its policies caused despite numerous warnings from the public and subject matter experts.

C. Failure to recommend inexpensive, safe, and effective treatments and remedies for Covid-19

It is well established through numerous peer reviewed studies that Covid-19 can be effectively treated with safe and established multi-purpose generic medicines, including ivermectin and hydroxychloroquine, in combination with zinc, vitamin D, vitamin C, and other immune-boosting, health-promoting and anti-coagulant treatments. Failure to disclose and raise public awareness of these studies and the efficacy of off-label use of these drugs resulted in unnecessary suffering and in many instances the deaths of people who could have otherwise gone on to live long and productive lives.

The Chelan-Douglas Health District's recommendations against the use of ivermectin to treat Covid-19 and omissions of expert medical advice on how to attain the highest level of health during the Covid-19 scare using minimally intrusive interventions contributed to area medical practitioners withholding ivermectin and other effective treatments. Furthermore, many patients with valid prescriptions were denied at local pharmacies in favor of expensive experimental drugs with little regard for safety of their use. Amazingly and inexplicably, as of the date of this notice, Chelan-Douglas Health District is recommending *against* use of ivermectin to treat Covid-19. **Thus, the people of Chelan and Douglas Counties may hold you responsible for the consequences of serious omissions related to minimally intrusive safe and effective treatments for Covid-19.**

D. Dangerous experimental gene therapies deployed under the guise of vaccines.

You may also be personally liable for death, personal injury, pain, suffering, and consequential financial damage in relation to the SARS-CoV-2 'vaccines' as you have authorized the administration of the 'vaccines' and have not advised people of the following:

1. The long-term material risks of these ‘vaccines’ are unknown. In fact, these are not vaccines, but something else altogether. The LNP-modRNA platform fulfills US legal definition for a genetically modified organism (GMO), and a gene therapy, where material risks are identified as potentially prenatal and up to 15 years post-natal. People were not advised as required by law that the so-called ‘vaccines’ are, in fact, GMOs.
2. Pfizer used one process to manufacture the products that they submitted for approval but a different process to manufacture the product supplied for injection into the world’s population. The latter product was manufactured using *E.coli* bacteria and plasmid DNA, which has resulted in excessive synthetic DNA contamination confirmed as able to integrate with the human genome. Moderna’s use of plasmid DNA in manufacture has also led to excessive synthetic DNA contamination.
3. Pfizer products include an SV40 virus-derived enhancer gene sequence. This gene sequence is known to facilitate the transport of the synthetic DNA into cell nuclei, posing a real risk of chromosomal integration. This threatens permanent genetic modification of inoculated people without their knowledge or consent and can only be harmful.
4. The contents of these genetic injections do not stay in the arm muscle.
5. Spike proteins are produced for a prolonged and unknown period of time, possibly indefinitely.
6. These spike proteins have been proven to trigger extensive microvascular blood clotting as well as large vessel blood clots.
7. Spike proteins are deposited in many tissues and organs including the heart, brain, testis, ovaries, liver and spleen, causing tissue degeneration and disease.
8. The large quantity of spike proteins may overwhelm the immune system, causing immune system dysfunction and worsening risk of all infections and cancers.
9. The spike protein is toxic in itself, but this foreign antigen also marks the victims’ own tissues as non-self, triggering autoimmune disease within these tissues.
10. The antibodies generated are non-neutralizing and worsen Covid disease; this is “antibody dependent enhancement” of infection.
11. Undeclared plasmid DNA in these products carries further dangers, especially in the case of Pfizer and the concealed SV40 enhancer and promotor sequences. This

includes the disruption of tumor suppressor genes and adds to the list of mechanisms by which these products increase cancer risk.

12. The artificial modRNA in these products is hyper-persistent due to the substitution of N1-methylpseudouridine in place of uracil. This prolongs the production of the toxic spike proteins, but also causes ribosome frame shifting, such that a variety of unpredictable proteins and polypeptides are also generated. These pose serious risk for triggering a large spectrum of autoimmune diseases.
13. Additionally, the pegylated lipid nanoparticles, which deliver the genetic payload into the victims' cells, are toxic in and of themselves.

E. Violation of informed consent

Based on your authority as the Board of Health, the majority of people in Chelan and Douglas Counties trusted your words when you stated that Covid-19 GMOs and gene therapies were “*safe and effective.*” This claim cannot be substantiated and is further disproved by numerous peer-reviewed studies and the manufacturers' own documents. As such, the right to free and informed consent was violated for every human being who was injected with the experimental Covid-19 GMO gene therapy that you promote as ‘vaccines.’

We can find no evidence you informed people of the risks associated with these experimental GMO injections, nor have you shared the mounting vaccine injury reports with the public. The Vaccine Adverse Events Reporting System, VAERS -- the national vaccine safety clearing house database -- holds the records of over 2.6 million people suspected of having been harmed by the Covid-19 genetic ‘vaccines’ including reports of over 37,000 deaths. Yet you have failed to even investigate reported safety signals and warnings of these data presented to the Board of Health. On more than one occasion, the Board of Health refused to investigate the adequacy of its own informed consent documents despite warnings that they may not be adequate.

This is in direct contravention of the Nuremberg Code, which was internationally agreed to in 1948, including in the United States of America, to prevent non-consensual medical experimentation on human beings, following gross human rights violations during the Second World War. Your failure to offer, advise on, recommend, promote and ensure free and informed consent for these Covid-19 GMO gene therapies can be prosecuted for both breach of your duty of care as well as for battery.

Our Invitation

Clearly, the health of the people of Chelan and Douglas Counties is much poorer for the actions taken by the Chelan-Douglas Board of Health both during and following the declared public health ‘emergency.’ **As such, we are morally obligated to invite you to defend your actions or apologize publicly with a corrective plan.**

We Demand

In light of the now clearly established negligence on the part of the Chelan-Douglas Board of Health, and its responsibility to the community as codified in law, and in the interest of public health and safety, we demand that you:

- 1. Cease and desist from recommending and administering the Covid-19 GMO gene therapy products with immediate effect.**
- 2. Prepare and deliver to every member of the community who received the ‘vaccines,’ whether administered under the Chelan-Douglas Health District or other party within your jurisdiction, a full disclosure statement regarding the potential benefits and risks to their well-being of having received the Covid ‘vaccines’ in compliance with the Nuremberg Code, Hippocratic medical ethics, and the law.**
- 3. Cease and desist from making recommendations against the off-label use of ivermectin as a safe and effective treatment for Covid-19, as this decision should be between the patient and their doctor.**
- 4. In the conduct of your duties as the Board of Health, refrain from further actions involving unscientific, medically unsupported, and any and all other deceptive, false/or fraudulent communication to the people of Chelan and Douglas Counties.**

**By the Men and Women of Truth and Accountability Project Washington (TAPWA)
Steering Committee**

Truth and Accountability Project Washington promotes medical freedom and informed consent. We seek to bring truth, awareness, and resources to those harmed by the Covid-19 'vaccines' and the public health pandemic response in our community and beyond.
