

STANDARD SINKS – SERIES 800

No cost modification available for wheelchair access.

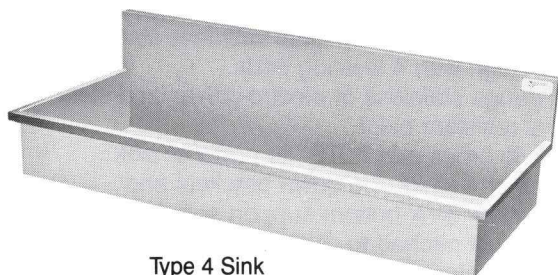

Type 1 Sink
With Stand
Without Backsplash

Type 2 Sink
With Stand
With Backsplash
Optional Storage Shelf pictured

Type 3 Sink
Without Stand
Without Backsplash

Type 4 Sink
Without Stand
With Backsplash

Counter Top rim and anchor bolts available at no extra cost when specified for Type 3 & 4 sinks.

The Standard darkroom developing sink is the most popular unit sold today. Sinks manufactured and designed to function with minimum maintenance for a lifetime. Available in four Types pictured.

Sinks are square cornered, one piece construction, heli-arc welded, ground, polished and passivated, using type 316LC 18 gauge stainless steel, stainless 1½" drain located in right rear corner unless specified otherwise. Sink bottom is insulated with sound deadening and anti-condensation material.

Backsplash is 8" high, included with Type 2 and 4 sinks for mounting fixtures and wall protection. Backsplash height may be increased—price upon request. No charge for increased height with "Plumbing Assembly"—page 6.

Stands are by far the best on the market today, due primarily to heavier gauge material, and welded unibody construction for strength. No time consuming jobsite assembly required. Stands are 36" high and come with Type 1 and 2 sinks. Electro coated 16 gauge steel is coated with chemical resistant polyurethane. Adjustable leveling pads correct floor irregularities.

Heavy Duty Shelf is 16 gauge polyurethane steel or stainless steel.

Accessories and Options—Counter Top Sinks, Wide Backsplash Return, Sidesplash, Duckboards in PVC or Stainless, Squeegee Boards or Work Tops, Sink Partitions, Overflow Standpipes, Plumbing Assemblies, Fixtures, and cabinet stands—see pages 4-8.
