*Outside dimensions: Add 2 1/2" to inside dimensions.

NOTE: Other sizes in price sheet.

California Stainless top of the line sinks represent the highest quality on the market. The most desirable premium sink sold results from our superior workmanship and use of heavier gauge material. Drain located in right rear corner, unless different location specified. Sink pans are heavy duty 16 gauge type 316 LC stainless steel with covered 1/2" radius interior and exterior corners. Heliarc welds are ground, polished, and passivated forming seamless construction. The 1 1/4" box type lip around outside edges provides an extremely rigid sink. Sink bottoms are insulated with sound deadening and anti-condensation material. Sink pans are removable from Sink Stand, providing access through narrow doorways. Sinks and stands are shipped assembled, eliminating time consuming assembly on jobsite.

ACCESSORIES

Backsplash is 8" high in Type 2 and 4 sinks. Increased to 12" high and 5" wide at no extra cost with Plumbing Assembly (page 6).

Stand: Heavy duty 16 gauge welded construction electro-galvanized steel stands with polyurethane sand color paint are included with Type 1 and 2 sinks. Heavier gauge material and supports make this stand the strongest on the market today. Optional stainless stands also available. Stand is 36" high with 4 leveling pads.

Shelf: Fabricated with 16 gauge stainless or electro-galvanized steel with polyurethane chemical resistant paint.

Counter Top Installation: To order, add "CTS" to prefix of sink model without stand, Type 3 or 4 sinks. Tie down brackets and anchors provided for installation. Sink bottom support should be added by customer. Bottoms not pitched to drain. Pitch accomplished by cabinet leveling devices or shimming.

Other options: Stainless Side Splashes, Stainless Partitions, Duckboards, Squeegee Boards, left or right drainboards, Undersink Cabinets, Faucets, Plumbing Assemblies, Heater-Cooler Recirculators, Heater Recirculators, PVC Sink Mats — See pages 4-8.
