MEDIUM DECORATIVE BARK

Medium Bark is derived from fir bark and contains very little wood fiber. It is screened for both minimum and maximum particle size. Medium Bark is popular with homeowners and is used in areas where a formal, uniform texture is desired. Medium Bark is easy to spread and easy to keep clean. It's a good choice for shrub beds and it will last longer than shredded barks. Medium Bark makes an excellent mulch to suppress weed growth and help conserve soil moisture.

SPECIFICATION GUIDELINES

Medium Decorative Bark shall be derived from the bark of Douglas Fir, Red Fir, or White Fir and shall be granular in structure with 100% falling in the range of 1 to 2 inches in diameter.

Suggested minimum application rate is 6 cubic yards per 1,000 square feet to provide a 2 inch layer or mulch.
