GOLDEN NUGGETS

Golden Nuggets are derived from the wood of the Coast Redwood tree. It's a woody bark mixture of shredded redwood bark and redwood wood chips. The mulch is a natural, light blonde color, which darkens to a richer brown over time. It is an economical groundcover very suitable for pathways and large landscape projects. Golden Nuggets control weeds and help retain soil moisture.

SPECIFICATION GUIDELINES

The mulch shall be a combination of redwood bark and redwood wood chips. The average particle size shall be 1 inch.

Suggested minimum application rate is 9 cubic yards per 1,000 square feet to provide coverage of approximately 3 inches.
